

POWER TRANSFORMER P.C. M.O.U.N.T.: SPLIT PACK

FS56-650

Description:

The FS56-650 is a dual primary and dual secondary, split bobbin design which operates with either a parallel input of 115V or a series input of 230V. The output voltage will be either 56.0V with a center-tap under a 0.65A load with the secondaries wired in series, or 28.0V under a 1.3A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
