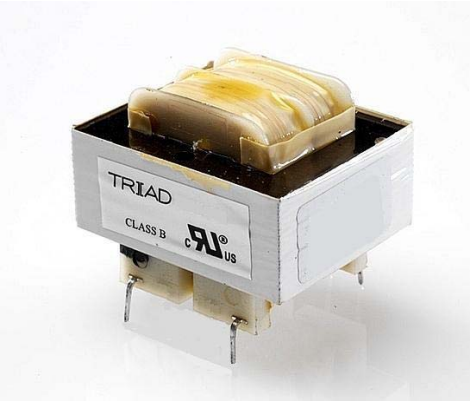
POWER TRANSFORMER
PC MOUNT: SPLIT PACK

F56-350



Description:
The F56-350 is a single primary and dual secondary, split bobbin design which operates with an input of 115V. The output voltage will be either 56.0V with a center-tap under a 0.35A load with the secondaries wired in series, or 28.0V under a 0.7A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
