

POWER TRANSFORMER PC MOUNT: SPLIT PACK

F10-600

Description:

The F10-600 is a single primary and dual secondary, split bobbin design which operates with an input of 115V. The output voltage will be either 10.0V with a center-tap under a 0.6A load with the secondaries wired in series, or 5.0V under a 1.2A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
