Resistors

Ultra Precision Metal Film Resistors

CAR series

- Tolerance down to 0.01%
- Low TCR's
- High reliability
- Superior moisture performance
- Non standard values available
- Highest stability metal film available
- Matched sets and networks

All Pb-free parts comply with EU Directive 2011/65/EU (RoHS2)

General Note

Ultra Precision Metal Film Resistors

CAR series

Construction

Ceramic rods are coated with a metal film and plated steel caps are force fitted. A helical cut is used to adjust the film to its final value.

Termination wires are welded to the caps and the resistor is protected with a specially formulated epoxy coating.

Terminations

Material Solderable finish copper wire.

Strength The terminations meet the requirements of

IEC 68.2.21

Solderability The terminations meet the requirements of

IEC 115-1, Clause 4.17.3.2

Marking

Type reference, TCR code, resistance value and tolerance code

The resistance value marking conforms to IEC 62.

Solvent Resistance

The body protection and marking are resistant to all normal industrial cleaning fluids suitable for printed circuits.

Application Notes

Resistors can be supplied matched for tolerance and TCR down to $\pm 0.005\%$ and ± 1 ppm/°C, respectively, either as separate resistors or pre-assembled and encapsulated within a plastic box.

The individual resistors within a set or module can be manufactured with a tolerance of $\pm 0.01\%$ and a TCR of ± 5 ppm/°C.

Body location $f_1 - f_2 \le 1.4 \text{ mm}$
