**CMOS TEMPERATURE SENSOR IC**

Rev.3.1_02

The S-58LM20A Series is a high-accuracy temperature sensor IC on a single chip, provides output voltage which is linear against the temperature change.
Each chip consists of a temperature sensor, a constant current circuit, and an operational amplifier.
The operating ambient temperature is from −55°C to 130°C. This IC has much better linearity than other conventional temperature sensors such as thermistor, it is possible to achieve the extensive application for temperature control.

## ■ Features

- Accuracy against temperature $\pm$2.5°C (−55°C to +130°C)
- Linear output voltage −11.77 mV/°C Typ.
  Ta = −30°C :    2.205 V Typ.
  Ta = +30°C :    1.515 V Typ.
  Ta = +130°C :    0.303 V Typ.
- Nonlinearity $\pm$0.4% Typ. (−20 to +80°C)
- Operation in wide range of power supply voltage $V_{DD}$ = 2.4 to 5.5 V (−30°C to +130°C)
  $V_{DD}$ = 2.7 to 5.5 V (−55°C to +130°C)
- Low current consumption 4.5 $\mu$A Typ. (+25°C)  6.0 $\mu$A Max. (−55°C to +130°C)
- Built-in operational amplifier
- Output voltage referred to $V_{SS}$
- Lead-free, Sn 100%, halogen-free[1]

  **1.** Refer to "■ **Product Name Structure**" for details.

## ■ Applications

- Compensation of high-frequency circuits such as cellular phones and radio equipment
- Compensation of oscillation frequency in crystal oscillator
- LCD contrast compensation
- Compensation of amplifier gain
- Compensation of auto focus circuits
- Temperature detection in battery management
- Overheating prevention for charged batteries or halogen lights

## ■ Package

- SC-82AB
- SNT-4A
- WLP-4B

■ **Block Diagram**

**Figure 1**

# ■ Product Name Structure

Users can select the product type in the S-58LM20A Series. Refer to "**1. Product name**" regarding the contents of product name, "**2. Package**" regarding the package drawings and "**3. Product name list**" regarding the product type.
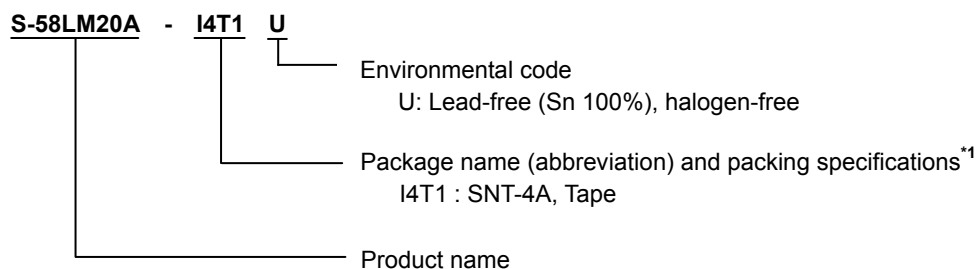

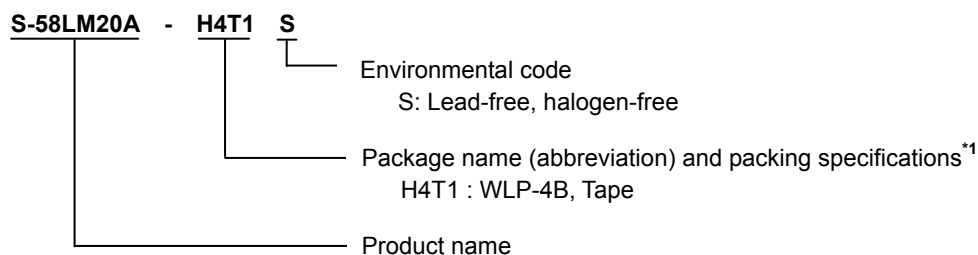

## 1. Product name

### (1) SC-82AB package

**S-58LM20A** - **N4T1** **x**

Environmental code
  U: Lead-free (Sn 100%), halogen-free
  G: Lead-free (for details, please contact our sales office)

Package name (abbreviation) and packing specifications[*1]
  N4T1 : SC-82AB, Tape

Product name

  **\*1.** Refer to the tape drawing.

### (2) SNT-4A package

**S-58LM20A** - **I4T1** **U**

Environmental code
  U: Lead-free (Sn 100%), halogen-free

Package name (abbreviation) and packing specifications[*1]
  I4T1 : SNT-4A, Tape

Product name

  **\*1.** Refer to the tape drawing.

### (3) WLP-4B package

**S-58LM20A** - **H4T1** **S**

Environmental code
  S: Lead-free, halogen-free

Package name (abbreviation) and packing specifications[*1]
  H4T1 : WLP-4B, Tape

Product name

  **\*1.** Refer to the tape drawing.

**ABLIC Inc.**

## ◼ Absolute Maximum Ratings

**Table 5**

(Ta = 25°C unless otherwise specified)

| Item | | Symbol | Absolute Maximum Rating | Unit |
|---|---|---|---|---|
| Power supply pin voltage | | $V_{DD}$ | $V_{SS} - 0.3$ to $V_{SS} + 6.5$ | V |
| Output voltage | | $V_{OUT}$ | $V_{SS} - 0.3$ to $V_{DD} + 0.3$ | V |
| Power dissipation | SC-82AB | $P_D$ | 350[*1] | mW |
| | SNT-4A | | 300[*1] | mW |
| | WLP-4B | | 290[*1] | mW |
| Operating ambient temperature | | $T_{opr}$ | −55 to +130 | °C |
| Storage temperature | | $T_{stg}$ | −65 to +150 | °C |

**\*1.** When mounted on board
　　　[Mounted board]
　　　　　(1) Board size:　114.3 mm × 76.2 mm × t1.6 mm
　　　　　(2) Board name: JEDEC STANDARD51-7

**Caution　The absolute maximum ratings are rated values exceeding which the product could suffer physical**
**　　　　　　damage.  These values must therefore not be exceeded under any conditions.**

**ABLIC Inc.**

■ **Electrical Characteristics**

**Table 6**

(Ta = 25°C, $V_{DD}$ = 2.7 V, $I_{OUT}$ = 0 A unless otherwise specified)

| Item | Symbol | Conditions | Min. | Typ. | Max. | Unit | Test Circuit |
|------|--------|-----------|------|------|------|------|--------------|
| Range of power supply voltage | $V_{DD}$ | −30°C ≤ Ta ≤ +130°C | 2.4 | — | 5.5 | V | 1 |
| | | −55°C ≤ Ta ≤ +130°C | 2.7 | — | 5.5 | V | 1 |
| Output voltage $V_{OUT}$ = $(−3.88 \times 10^{-6} \times T^2)$ $+(−1.15 \times 10^{-2} \times T) + 1.8639$ V | $V_{OUT}$ | Ta = −30°C | 2.177 | 2.205 | 2.234 | V | 1 |
| | | Ta = +30°C | 1.486 | 1.515 | 1.545 | V | 1 |
| | | Ta = +130°C | 0.272 | 0.303 | 0.335 | V | 1 |
| Temperature sensitivity | $V_{SE}$ | −30°C ≤ Ta ≤ +130°C | −12.20 | −11.77 | −11.40 | mV/°C | — |
| Nonlinearity | $\Delta N_L$ | −20°C ≤ Ta ≤ +80°C | — | ±0.4 | — | % | — |
| Operating temperature range | Topr | — | −55 | — | 130 | °C | — |
| Current consumption | $I_{DD}$ | −55°C ≤ Ta ≤ +130°C | — | 4.5 | 6.0 | μA | 1 |
| Current consumption − Power supply voltage | $\Delta I_{DD1}$ | $V_{DD}$ = 2.4 V to 5.5 V | — | 0.1 | — | μA | 1 |
| Current consumption − Temperature | $\Delta I_{DD2}$ | — | — | −11 | — | nA/°C | 1 |
| Line regulation | $\Delta V_{OUT1}$ | $V_{DD}$ = 2.4 V to 5.5 V | — | — | 3.3 | mV/V | 2 |
| Load regulation[*1] | $\Delta V_{OUT2}$ | $I_{OUT}$ = 0 μA to 16 μA | — | — | 0.156 | mV/μA | 2 |

**\*1.** Do not flow current into the output voltage pin.

■ **Test Circuit**

1.

**Figure 6**

2.

**Figure 7**

ABLIC Inc.
# ■ Explanation of Terms

### 1. Output voltage (V$_{OUT}$)

V$_{OUT}$ indicates the output voltage at Ta = −30°C, Ta = +30°C, and Ta = +130°C.

**Figure 8**

## 2. Temperature Sensitivity (V$_{SE}$)

V$_{SE}$ is the temperature coefficient of output voltage which is calculated from an output voltage when Ta = −30°C and Ta = +130°C.

V$_{SE}$ is calculated from the following formula.

$$V_{SE} = \frac{\left[ V_{OUT}^{*1} - V_{OUT}^{*2} \right]}{160^{*3}}$$

Output voltage

V$_{OUT}$ (when Ta = −30°C)

V$_{SE}$

V$_{OUT}$ (when Ta = +130°C)

−30°C     0°C     +30°C                    +130°C
Temperature [Ta]

**Figure 9**

**\*1.** V$_{OUT}$ value at Ta = +130°C [V]
**\*2.** V$_{OUT}$ value at Ta = −30°C [V]
**\*3.** The difference of the temperature between Ta = +130°C and Ta = −30°C [°C]

ABLIC Inc.

### 3. Nonlinearity ($\Delta N_L$)

$\Delta N_L$ is the nonlinearity of output voltage. Its deviation with the approximation line is shown below.
$\Delta N_L$ is calculated from the following formula.

$$\Delta N_L = \frac{a^{*1}}{b^{*2}} \times 100$$

**\*1.** The maximum deviation of the actual measurement of output voltage (B) and an approximation line (A) in temperature −20°C to +80°C. The approximation line is the one to be drawn so that "a" should be the minimum value.
**\*2.** The difference of the actual measured value of output voltage when −20°C and +80°C.

**Figure 10**

### 4. Line regulation ($\Delta V_{OUT1}$)

$\Delta V_{OUT1}$ indicates the dependency of output voltage against input voltage. This indicates how much the output voltage varies when changing the input voltage after fixing the output current constant.

### 5. Load regulation ($\Delta V_{OUT2}$)

$\Delta V_{OUT2}$ indicates the dependency of output voltage against output current. This indicates how much the output voltage varies when changing output current after fixing the input voltage constant.

### 6. Current consumption – Power supply voltage ($\Delta I_{DD1}$)

$\Delta I_{DD1}$ indicates the dependency of current consumption against power supply voltage. This indicates how much current consumption varies when changing the temperature after fixing an output current constant.

### 7. Current consumption − Temperature ($\Delta I_{DD2}$)

$\Delta I_{DD2}$ indicates the dependency of current consumption against temperature. This indicates how much current consumption varies when changing the temperature after fixing an output current constant.

### ■ Precautions

- Wire each pin of VDD, VSS and VOUT carefully in order to set them in low impedance when wiring an IC on a patterned board.

- In this IC, if load capacitance of the VOUT pin is large, VOUT pin voltage may oscillate. It is recommended not to use an external capacitor between the VOUT and VSS pin. When using an external capacitor, set near the VOUT pin.
  When connecting an A/D converter etc. to the VOUT pin, the input pin capacitance of the A/D converter and the parasitic capacitance component between wires are included as load capacitance.
  To prevent oscillation, it is recommended to use the following output load condition.

  Load capacitance of VOUT pin ($C_{L1}$) : 300 pF or less

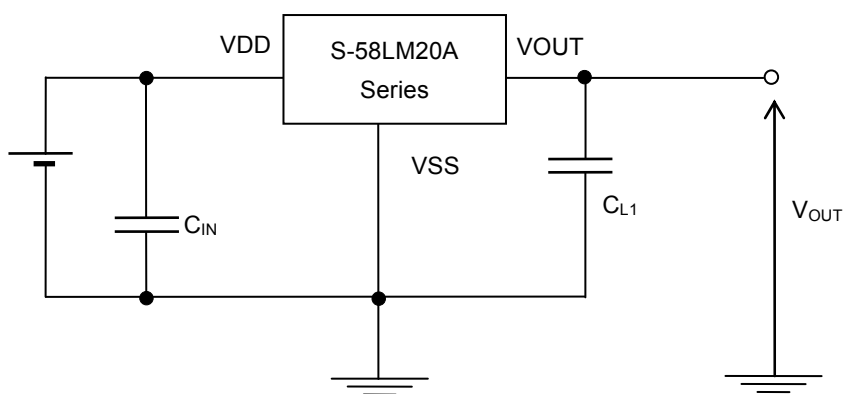

**Figure 11**

**Caution  The above connection diagram and constant will not guarantee successful operation.  Perform through evaluation using the actual application to set the constant.**

ABLIC Inc.

In this IC, it is necessary to add a capacitor from an output pin to GND with a series resistor in the ambience having excessive noise, as seen in **Figure 12** and **Figure 13**. In the combination shown in **Table 7**, a time constant against heat of this IC is much later than the time constant composed of RC, therefore it does not affect on the response time of this IC.

**Table 7**

| $R_{L2}$ ($\Omega$) | $C_{L2}$ ($\mu$F) |
|---|---|
| 200 | 1 |
| 470 | 0.1 |
| 680 | 0.01 |
| 1 k | 0.001 |

**Figure 12**

**Figure 13**

**Caution  The above connection diagram and constant will not guarantee successful operation. Perform thorough evaluation using the actual application to set the constant.**

- For stabilization, set a capacitor ($C_{IN}$) of approx. 0.1 $\mu$F between VDD and VSS pin.

- Do not connect a pull-up resistor to the output pin.

- The application condition for input voltage, output voltage and load voltage must not exceed the package power dissipation.

- Do not apply an electrostatic discharge to this IC that exceeds the performance ratings of the built-in electrostatic protection circuit.

- Regarding the current at the output pin, refer to load regulation and footnote **\*1** in **Table 6** "■ **Electrical Characteristics**".

- ABLIC Inc. claims no responsibility for any disputes arising out of or in connection with any infringement by products including this IC of patents owned by a third party.

# Disclaimers (Handling Precautions)

1. All the information described herein (product data, specifications, figures, tables, programs, algorithms and application circuit examples, etc.) is current as of publishing date of this document and is subject to change without notice.

2. The circuit examples and the usages described herein are for reference only, and do not guarantee the success of any specific mass-production design.
   ABLIC Inc. is not liable for any losses, damages, claims or demands caused by the reasons other than the products described herein (hereinafter "the products") or infringement of third-party intellectual property right and any other right due to the use of the information described herein.

3. ABLIC Inc. is not liable for any losses, damages, claims or demands caused by the incorrect information described herein.

4. Be careful to use the products within their ranges described herein. Pay special attention for use to the absolute maximum ratings, operation voltage range and electrical characteristics, etc.
   ABLIC Inc. is not liable for any losses, damages, claims or demands caused by failures and / or accidents, etc. due to the use of the products outside their specified ranges.

5. Before using the products, confirm their applications, and the laws and regulations of the region or country where they are used and verify suitability, safety and other factors for the intended use.

6. When exporting the products, comply with the Foreign Exchange and Foreign Trade Act and all other export-related laws, and follow the required procedures.

7. The products are strictly prohibited from using, providing or exporting for the purposes of the development of weapons of mass destruction or military use. ABLIC Inc. is not liable for any losses, damages, claims or demands caused by any provision or export to the person or entity who intends to develop, manufacture, use or store nuclear, biological or chemical weapons or missiles, or use any other military purposes.

8. The products are not designed to be used as part of any device or equipment that may affect the human body, human life, or assets (such as medical equipment, disaster prevention systems, security systems, combustion control systems, infrastructure control systems, vehicle equipment, traffic systems, in-vehicle equipment, aviation equipment, aerospace equipment, and nuclear-related equipment), excluding when specified for in-vehicle use or other uses by ABLIC, Inc. Do not apply the products to the above listed devices and equipments.
   ABLIC Inc. is not liable for any losses, damages, claims or demands caused by unauthorized or unspecified use of the products.

9. In general, semiconductor products may fail or malfunction with some probability. The user of the products should therefore take responsibility to give thorough consideration to safety design including redundancy, fire spread prevention measures, and malfunction prevention to prevent accidents causing injury or death, fires and social damage, etc. that may ensue from the products' failure or malfunction.
   The entire system in which the products are used must be sufficiently evaluated and judged whether the products are allowed to apply for the system on customer's own responsibility.

10. The products are not designed to be radiation-proof. The necessary radiation measures should be taken in the product design by the customer depending on the intended use.

11. The products do not affect human health under normal use. However, they contain chemical substances and heavy metals and should therefore not be put in the mouth. The fracture surfaces of wafers and chips may be sharp. Be careful when handling these with the bare hands to prevent injuries, etc.

12. When disposing of the products, comply with the laws and ordinances of the country or region where they are used.

13. The information described herein contains copyright information and know-how of ABLIC Inc. The information described herein does not convey any license under any intellectual property rights or any other rights belonging to ABLIC Inc. or a third party. Reproduction or copying of the information from this document or any part of this document described herein for the purpose of disclosing it to a third-party is strictly prohibited without the express permission of ABLIC Inc.

14. For more details on the information described herein or any other questions, please contact ABLIC Inc.'s sales representative.

15. This Disclaimers have been delivered in a text using the Japanese language, which text, despite any translations into the English language and the Chinese language, shall be controlling.
