PXIS-2630

Introduction

The PXIS-2700/2670/2630 PXI chassis provides 18/14/8 slots in a standard 19" 4U configuration and supports both PXI and CompactPCI modules. The PXIS-2700/2670/2630 chassis are compliant with PXI specification Rev. 2.2 and highlight PXI features including a 10 MHz reference clock, start trigger, local bus, and a trigger bus divided into two segments by a single PCI bridge.

The PXIS-2700 promote operating efficiency with a redundant power subsystem ensuring reliable, round-the-clock power, and hot-swappable cooling fans. Combined solutions considerably reduce MTTR and ensure continuous operation. The PXIS-2700/2670/2630 also provide effective monitoring of system power, temperature, and fans via a chassis-integrated alarm module. Notice is provided by LED buzzer alarms in the event of power supply or fan module malfunction.
