

FCM-100TM FAN CHARACTERIZATION MODULE

The FCM-100[™] Fan Characterization Module is a specialized unit designed to test and characterize fans of various sizes and performance outputs.
Using the FCM-100[™] Module in conjunction with

the FCMC-100[™] it is possible to develop fan curves (ΔP vs. Flow rate) that can be used to verify fan manufacturer data or to characterize fans of unknown performance.

The FCM-100™ is constructed of sturdy corrosion resistant sheet metal. A removable and customizable lexan mounting plate is provided to which fans of various diameters can be secured. Six (6) perforated removable plates and one (1) solid plate for the 0 flow data point is provided. This allows the user to control the pressure drop through the module for fans under testing.

Customizable options include various sized specialized mounting plates can be made for the characterization of multiple fans simultaneously, including fan tray assemblies.

FCMC-100[™] Fan Characterization Module Controller

OVERALL DIMENSIONS (L X W X H)

92 CM X 47.5 CM X 50 CM (36.2" X 18.7" X 19.7")

FLOW RATE

70 CFM TO 2080 CFM

PRESSURE RANGE

UP TO 0.15 PSI

ACCURACY

+/-3%

FAN/FRAME SIZES

ROUND: DIA 200 AND DIA 172 SQUARE: 150MM, 140MM, 127MM, 120MM, AND 92MM

For further technical information, please contact Advanced Thermal Solutions, Inc. at 1-781-769-2800 or ats-hq@.qats.com.

FEATURES:

» Flow Restriction Plates

Includes six removable perforated flow restriction plates allowing the user to control the pressure drop through the module

Sturdy Construction

For integration into control circuits that require analog voltage as input signals

» Multiple Fan Sizes

Accepts 2 round frames, the DIA 200 and DIA 172, and 5 square sizes, 150x150, 140x140, 127x127, 120x120, and 92x92 mm

» Customizable Options

Options include specialized mounting plates for the chracterization of multiple fans simultaneously, including fan tray assemblies.

» Compatible Instruments

Can be used in conjunction with FCMC-100TM to develop fan curves that can be used to characterize fans or verify manufacturer data.

APPLICATIONS:

- » Telecommunications
- » Networking
- » Embedded Systems
- » Thermal Management

X-ON Electronics
