Product Warranty (2 years)

Advantech warrants to you, the original purchaser, that each of its products will be free from defects in materials and workmanship for two years from the date of purchase.

This warranty does not apply to any products which have been repaired or altered by persons other than repair personnel authorized by Advantech, or which have been subject to misuse, abuse, accident or improper installation. Advantech assumes no liability under the terms of this warranty as a consequence of such events.

Because of Advantech's high quality-control standards and rigorous testing, most of our customers never need to use our repair service. If an Advantech product is defective, it will be repaired or replaced at no charge during the warranty period. For outof-warranty repairs, you will be billed according to the cost of replacement materials, service time and freight. Please consult your dealer for more details.

If you think you have a defective product, follow these steps:

- 1. Collect all the information about the problem encountered. (For example, CPU speed, Advantech products used, other hardware and software used, etc.) Note anything abnormal and list any onscreen messages you get when the problem occurs.
- 2. Call your dealer and describe the problem. Please have your manual, product, and any helpful information readily available.
- 3. If your product is diagnosed as defective, obtain an RMA (return merchandize authorization) number from your dealer. This allows us to process your return more quickly.
- 4. Carefully pack the defective product, a fully-completed Repair and Replacement Order Card and a photocopy proof of purchase date (such as your sales receipt) in a shippable container. A product returned without proof of the purchase date is not eligible for warranty service.
- 5. Write the RMA number visibly on the outside of the package and ship it prepaid to your dealer.

Technical Support and Assistance

- 1. Visit the Advantech web site at www.advantech.com/support where you can find the latest information about the product.
- 2. Contact your distributor, sales representative, or Advantech's customer service center for technical support if you need additional assistance. Please have the following information ready before you call:
 - Product name and serial number
 - Description of your peripheral attachments
 - Description of your software (operating system, version, application software, etc.)
 - A complete description of the problem
 - The exact wording of any error messages

Safety Instructions

- 1. Read these safety instructions carefully.
- 2. Keep this User Manual for later reference.
- 3. Disconnect this equipment from any AC outlet before cleaning. Use a damp cloth. Do not use liquid or spray detergents for cleaning.
- 4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.
- 5. Keep this equipment away from humidity.
- 6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall may cause damage.
- 7. The openings on the enclosure are for air convection. Protect the equipment from overheating. DO NOT COVER THE OPENINGS.
- 8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
- 9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
- 10. All cautions and warnings on the equipment should be noted.
- 11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.
- 12. Never pour any liquid into an opening. This may cause fire or electrical shock.
- 13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.
- 14. If one of the following situations arises, get the equipment checked by service personnel:
 - The power cord or plug is damaged.
 - Liquid has penetrated into the equipment.
 - The equipment has been exposed to moisture.
 - The equipment does not work well, or you cannot get it to work according to the user's manual.
 - The equipment has been dropped and damaged.
 - The equipment has obvious signs of breakage.

Safety Precaution - Static Electricity

Follow these simple precautions to protect yourself from harm and the products from damage.

- To avoid electrical shock, always disconnect the power from your PC chassis before you work on it. Don't touch any components on the CPU card or other cards while the PC is on.
- Disconnect power before making any configuration changes. The sudden rush of power as you connect a jumper or install a card may damage sensitive electronic components.

General Information

This chapter gives background information on the SOM-6765 CPU System on Module. Sections include: ■ Introduction ■ Specifications

1.1 Introduction

SOM-6765 is an embedded COM-Express Compact COM.0 R2.0 Type 2 CPU module that fully complies with the PCI Industrial Computer Manufactures PICMG COM Express standard. The new CPU module supports Intel N2600 and D2700 processors with NM10 chipset which supports Intel Embedded GFX Core, MPEG2 Decode in HW, PCI Express and SATA interfaces. In a basic form factor of 95mm x 95mm, the SOM-6765 provides a scalable high performance and easy to integrate solution for customers' applications by utilizing a plug-in CPU module on an application-specific customer solution board. The SOM-6765 with advanced I/O capacity incorporates serial differential signaling technologies such as PCI Express, Serial ATA, USB 2.0, LVDS, and HD Audio interfaces. SOM-6765 offers customers more choices for their own applications needing higher computing speeds while maintaining a compact form factor.

SOM-6765 complies with the "Green Function" standard and supports Doze, Standby and Suspend modes. The small size (95 mm x 95 mm) and use of one high capacity connector based on the proven COM-Express Compact form factor, allow the modules to be easily and securely mounted onto a customized solution board or our standard SOM-DB5700 development board.

The SOM-6765 is a highly integrated multimedia COM module that combines audio, video, and network functions. It provides excellent processing capabilities via Intel N2600 and D2700 processors, single channel LVDS interface for middle size TFT LCD display, DDR3 memory up to 2 GB (N2600) or 4GB (D2700), high definition audio interface (HD Audio).

1.2 Specifications

1.2.1 Standard System On Module functions

- CPU: Onboard Intel® Atom N2600 processor Onboard Intel® Atom D2700 processor
 (Detail CPU support information please contact your sales representative)
- BIOS: AMI EFI 2MB Flash
- Chipset: Intel® NM10 Chipset
- Cache memory: Intel® Atom N2600 processor integrated 512KB L2 cache Intel® Atom D2700 processor integrated 512KB L2 cache
- System memory: 204-pin SODIMM supports 800MHz (N2600)/ 1066MHz (D2700) DDR3 memory only
 Up to 2GB memory at Intel® Atom N2600 processor
 Up to 4GB memory at Intel® Atom D2700 processor
- Power management: Supports power saving modes including Normal / Standby / Suspend modes. ACPI 2.0 compliant
- **SATA interface:** 2 SATAII Channels
- Watchdog timer: 256 levels timer interval, from 0 to 255 sec or min setup by software, jumper less selection, generates system reset
- USB interface: Supports 8 USB 2.0 ports
- Expansion Interface: Supports LPC, 2 PCIe x1 default setting (can be 1 PCIe x4 or 4 PCIe x1 option), 4 PCI masters

1.2.2 VGA/flat panel Interface

Chipset: Intel NM10, DX9, MPEG2 Decode controller

Display type: Dual display supports of CRT and LVDS. Supports 18-bit single channel LVDS interface for N2600 18&24-bit single channel LVDS interface for D2700

 Display mode: CRT Mode: Support up to 1920 x 1200 (N2600/D2700) LVDS Mode: Support up to 1366 x 768 (N2600) 1440 x 900 (D2700)

1.2.3 Audio function

Audio interface: Intel high definition audio interface

1.2.4 Ethernet

Chipset:

1.2.5 Mechanical and environmental

- Dimensions: COM-Micro form-factor, 95 mm x 95 mm (3.74" x 3.74")
- Power supply voltage: +12 V power only

(+5VSB is need for ACPI and ATX power)

- Power requirement: SOM-6765N (2GB DDRIII 1066) +12 V @ 0.5 A
 SOM-6765D (4GB DDRIII 1066) +12 V @ 0.63 A
- Operating temperature: 0 ~ 60°C (32 ~ 140°F)
- **Operating humidity:** 0% ~ 90% relative humidity, non-condensing
- Weight: 0.103 Kg (weight of total package)

¹⁰⁰⁰Mbps: Intel 82583V Gigabit Ethernet. Base on IEEE 10BASE-T, 100BASE-T X and 1000BASE-T standard.

Mechanical Information

This chapter gives mechanical and connector information on the SOM-6765 CPU System on Module.

Sections include:

- Connector Information
- Mechanical Drawing

2.1 Connectors

2.1.1 Board Connector

There are two connectors at the rear side of SOM-6765 for connecting to carrier board.

Pin Assignments for X2 connector

Please refer to Advantech_COM_Express_Design Guide, Chapter 2. You can download Advantech_COM_Express_Design Guide from http:// com.advantech.com/

2.1.2 Connector List

BIOS Setup Information

This chapter gives basic BIOS upgrade and Setup information on the SOM-7562 CPU System on Module. Sections include: Safety Precautions BIOS Update Basic BIOS Setup AMIBIOS has been integrated into many motherboards for over a decade. With the AMIBIOS Setup program, users can modify BIOS settings and control the various system features. This chapter describes the basic navigation of the SOM-6765 BIOS setup screens.

Figure 3.1 Setup program initial screen

AMI's BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This information is stored in flash ROM so it retains the Setup information when the power is turned off.

3.1 Entering Setup

Turn on the computer and then press <F2> or to enter Setup menu.

3.2 Main Setup

When users first enter the BIOS Setup Utility, users will enter the Main setup screen. Users can always return to the Main setup screen by selecting the Main tab. There are two Main Setup options. They are described in this section. The Main BIOS Setup screen is shown below.

Aptio Setup Utili Main Advanced Chip	<mark>ty – Copyright (C) 2011 A</mark> m set Boot Security Save	merican Megatrends, Inc. & Exit
BIOS Information BIOS Vendor Core Version Compliancy Project Version Build Date and Time Total Memory Memory Frequency	American Megatrends 4.6.5.1 0.13 UEFI 2.3 SOM 6765X016 01/16/2012 18:40:21 2048 MB (DDR3) 1067 MHz(DDR3)	Set the Time. Use Tab to switch between Time elements.
System Date System Time Access Level	[Sat 01/01/2011] [00:00:00] Administrator	<pre>++: Select Screen fl: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F3: Optimized Defaults F4: Save & Exit ESC: Exit</pre>
Version 2.14.121	9. Copyright (C) 2011 Amer	ican Megatrends, Inc. AB

Figure 3.2 Main setup screen

The Main BIOS setup screen has two main frames. The left frame displays all the options that can be configured. Grayed-out options cannot be configured; options in blue can. The right frame displays the key legend.

Above the key legend is an area reserved for a text message. When an option is selected in the left frame, it is highlighted in white. Often a text message will accompany it.

3.2.1 System time / System date

Use this option to change the system time and date. Highlight System Time or System Date using the <Arrow> keys. Enter new values through the keyboard. Press the <Tab> key or the <Arrow> keys to move between fields. The date must be entered in MM/DD/YY format. The time must be entered in HH:MM:SS format.

3.3 Advanced BIOS Features Setup

Select the Advanced tab from the SOM-6765 setup screen to enter the Advanced BIOS Setup screen. Users can select any item in the left frame of the screen, such as CPU Configuration, to go to the sub menu for that item. Users can display an Advanced BIOS Setup option by highlighting it using the <Arrow> keys. All Advanced BIOS Setup options are described in this section. The Advanced BIOS Setup screens are shown below. The sub menus are described on the following pages.

Main Advanced Chipset Boot Security S	Save & Exit

F1: General Help F2: Previous Values F3: Optimized Defaults F4: Save & Exit ESC: Exit

Figure 3.15 Console Redirection Settings

Terminal Type

Emulation: ANSI: Extended ASCII char set. VT100: ASCII char set. VT100+: Extends VT100 to support color, function keys, etc. VT-UTF8: Uses UTF8 encoding to map Unicode chars onto 1 or more bytes.

Bits per second

Select the serial port transmission speed. The speed must be matched on the other side. Long or noisy lines may require lower speeds.

Data Bits

Data Bits 7 or 8

Parity

A parity bit can be sent with the data bits to detect some transmission errors. Even: parity bit is 0 if the num of 1's in the data bits is even. Odd: parity bit is 0 if num of 1's in the data bits is odd. Mark: parity bit is always 1. Space: Parity bit is always 0. Mark and Space Parity do not allow for error detection. They can be used as an additional data bit.

Stop Bits

Stop bits indicate the end of a serial data packet. (A start bit indicates the beginning). The standard setting is 1 stop bit. Communication with slow devices may require more than 1 stop bit.

Flow Control

Flow control can prevent data loss from buffer overflow. When sending data, if the receiving buffers are full, a 'stop' signal can be sent to stop the data flow. Once the buffers are empty, a 'start' signal can be sent to re-start the flow. Hardware flow control uses two wires to send start/stop signals.

VT-UTF8 Combo Key Support

Enable VT-UTF8 Combination Key Support for ANSI/VT100 terminals

Recorder Mode

With this mode enabled only text will be sent. This is to capture Terminal data.

Resolution 100x31

Enables or disables extended terminal resolution

Legacy OS Redirection

On Legacy OS, the Number of Rows and Columns supported redirection

3.3.11.2 e Redirection Settings

Figure 3.27 Save & Exit

3.7.1 Save Changes and Exit

When users have completed system configuration, select this option to save changes, exit BIOS setup menu and reboot the computer if necessary to take effect all system configuration parameters.

3.7.2 Discard Changes and Exit

Select this option to quit Setup without making any permanent changes to the system configuration.

3.7.3 Save Changes and Reset

When users have completed system configuration, select this option to save changes, exit BIOS setup menu and reboot the computer to take effect all system configuration parameters.

3.7.4 Discard Changes and Reset

Select this option to quit Setup without making any permanent changes to the system configuration and reboot the computer.

3.7.5 Save Changes

When users have completed system configuration, select this option to save changes without exit BIOS setup menu.

3.7.6 Discard Changes

Select this option to discard any current changes and load previous system configuration.

3.7.7 Restore Defaults

The SOM-6765 automatically configures all setup items to optimal settings when users select this option. Optimal Defaults are designed for maximum system performance, but may not work best for all computer applications. In particular, do not use the Optimal Defaults if the users computer is experiencing system configuration problems.

3.7.8 Save User Defaults

When users have completed system configuration, select this option to save changes as user defaults without exit BIOS setup menu.

3.7.9 Restore User Defaults

The users can select this option to restore user defaults.

S/W Introduction & Installation

4.1 S/W Introduction

The mission of Advantech Embedded Software Services is to "Enhance quality of life with Advantech platforms and Microsoft Windows embedded technology." We enable Windows Embedded software products on Advantech platforms to more effectively support the embedded computing community. Customers are freed from the hassle of dealing with multiple vendors (Hardware suppliers, System integrators, Embedded OS distributor) for projects. Our goal is to make Windows Embedded Software solutions easily and widely available to the embedded computing community.

4.2 Driver Installation

The Intel Chipset Software Installation (CSI) utility installs the Windows INF files that outline to the operating system how the chipset components will be configured.

4.2.1 Windows OS

To install the drivers please connect to internet and browse the website http://support.advantech.com.tw and download the drivers that you want to install and follow Driver Setup instructions to complete the installation.

4.2.2 Other OS

Please contact our local office or channel partners for Drivers/BSP support.

4.2.3 Step 2- Install Intel INF Update Driver for Windows XP

- 1. Click on the "Chipset" folder and double click the "infinst_autol.exe" file.
- 2. Follow the driver installation wizard's instructions to complete driver installation.

4.2.4 Step 3- Install Intel Graphic Driver for Windows XP

- 1. Click on the "VGA" folder and double click the "Setup.exe" file.
- 2. Follow the driver installation wizard's instructions to complete driver installation.

Note! Intel Graphic Driver allows users to switch display modes with hot keys.

Mode	Key 1	Key 2	Key 3	
CRT	CTRL	ALT	F1	
LCD	CTRL	ALT	F3	
Graphic Control Panel	CTRL	ALT	F12	

Press Key1 + Key2 + Key3 simultaneously to change display mode

4.2.5 Step 4- Install Audio Driver for Windows XP

- 1. Click on the "Audio" folder and double click the "WDM_R228_XP.exe" file.
- 2. Follow the driver installation wizard's instructions to complete driver installation.

4.2.6 Step 5- Install Intel Ethernet Driver for Windows XP

- 1. Click on the "LAN" folder and double click the "Autorun.exe" file.
- 2. Follow the driver installation wizard's instructions to complete driver installation.

Watchdog Timer

This appendix gives you the information about the watchdog timer programming on the SOM-6765 CPU System on Module. Sections include:

Watchdog Timer Programming

A.1 Programming the Watchdog Timer

Trigger Event	Note
IRQ	IRQ7, 9, 11 (default disable) IRQ can be set in BIOS
NMI	N/A
SCI	Power button event
Power Off	Support
H/W Restart	Support
External WDT	N/A

For details, please refer to iManager & Software API User Manual Chapter 6. Programming Overview 6.2 Watchdog (WDog) Function Class. Please contact our local office for iManager & Software API User Manual.

Programming GPIO

This Appendix gives the illustration of the General Purpose Input and Output pin setting. Sections include: ■ GPIO Mapping

B.1 GPIO Mapping

GPIO Byte	H/W Pin Name
BIT0	GPO0
BIT1	GPO1
BIT2	GPO2
BIT3	GPO3
BIT4	GPO0
BIT5	GPO1
BIT6	GPO2
BIT7	GPO3

For details, please refer to iManager & Software API User Manual.

System Assignments

This appendix gives you the information about the system resource allocation on the SOM-6765 CPU System on Module. Sections include:

- System I/O ports
- DMA Channel Assignments
- Interrupt Assignments
- 1st MB Memory Map

C.1 System I/O Port

Table C.1: System	/O Ports
Addr.range(Hex)	Device
0000 - 001F	Direct memory access controller
0000 - 0CF7	PCI bus
0010 - 001F	Motherboard resources
0020 - 0021	Programmable interrupt controller
0022 - 003F	Motherboard resources
0024 - 0025	Programmable interrupt controller
0028 - 0029	Programmable interrupt controller
002C - 002D	Programmable interrupt controller
002E - 002F	Motherboard resources
0030 - 0031	Programmable interrupt controller
0034 - 0035	Programmable interrupt controller
0038 - 0039	Programmable interrupt controller
003C - 003D	Programmable interrupt controller
0040 - 0043	System timer
0044 - 005F	Motherboard resources
004E - 004F	Motherboard resources
0050 - 0053	System timer
0060 - 0060	Standard PS/2 Keyboard
0061 - 0061	Motherboard resources
0062 - 0062	Microsoft ACPI-Compliant Embedded Controller
0062 - 0063	Motherboard resources
0063 - 0063	Motherboard resources
0064 - 0064	Standard PS/2 Keyboard Keyboard
0065 - 0065	Motherboard resources
0065 - 006F	Motherboard resources
0066 - 0066	Microsoft ACPI-Compliant Embedded Controller
0067 - 0067	Motherboard resources
0070 - 0070	Motherboard resources
0070 - 0077	System CMOS/real time clock
0072 - 007F	Motherboard resources
0080 - 0080	Motherboard resources
0080 - 0080	Motherboard resources
0081 - 0091	Direct memory access controller
0084 - 0086	Motherboard resources
0088 - 0088	Motherboard resources
008C - 008E	Motherboard resources
0090 - 009F	Motherboard resources
0092 - 0092	Motherboard resources
0093 - 009F	Direct memory access controller
00A0 - 00A1	Programmable interrupt controller
00A2 - 00BF	Motherboard resources
00A4 - 00A5	Programmable interrupt controller
00A8 - 00A9	Programmable interrupt controller

Table C.1: System	I/O Ports
00AC - 00AD	Programmable interrupt controller
00B0 - 00B1	Programmable interrupt controller
00B2 - 00B3	Motherboard resources
00B4 - 00B5	Programmable interrupt controller
00B8 - 00B9	Programmable interrupt controller
00BC - 00BD	Programmable interrupt controller
00C0 - 00DF	Direct memory access controller
00E0 - 00EF	Motherboard resources
00F0 - 00F0	Numeric data processor
0290 - 029F	Motherboard resources
029C - 029D	Motherboard resources
02F8 - 02FF	Communications Port (COM2)
0378 - 037F	ECP Printer Port (LPT1)
03B0 - 03BB	Intel(R) Graphic Media Accelerator 3600 Series
03C0 - 03DF	Intel(R) Graphic Media Accelerator 3600 Series
03F8 - 03FF	Communications Port (COM1)
0400 - 047F	Motherboard resources
0400 - 047F	Motherboard resources
04D0 - 04D1	Motherboard resources
04D0 - 04D1	Programmable interrupt controller
0500 - 053F	Motherboard resources
0500 - 057F	Motherboard resources
0600 - 061F	Motherboard resources
0680 - 069F	Motherboard resources
06A0 - 06AF	Motherboard resources
06B0 - 06EF	Motherboard resources
0778 - 077F	ECP Printer Port (LPT1)
0B78 - 0B7F	Motherboard resources
0D00 - FFFF	PCI bus
0F78 - 0F7F	Motherboard resources
1000 - 100F	Motherboard resources
D000 - DFFF	Intel(R) N10/ICH7 Family PCI Express Root Port -27D6
E000 - E00F	Standard Dual Channel PCI IDE Controller
E000 - EFFF	Intel(R) N10/ICH7 Family PCI Express Root Port -27D6
E010 - E013	Standard Dual Channel PCI IDE Controller
E020 - E027	Standard Dual Channel PCI IDE Controller
E030 - E033	Standard Dual Channel PCI IDE Controller
E040 - E047	Standard Dual Channel PCI IDE Controller
F000 - F01F	Intel(R) N10/ICH7 Family SMBus Controller - 27DA
F020 - F03F	Intel(R) N10/ICH7 Family USB Universal Host Controller - 27CB
F040 - F05F	Intel(R) N10/ICH7 Family USB Universal Host Controller - 27CA
F060 - F07F	Intel(R) N10/ICH7 Family USB Universal Host Controller - 27C9
F080 - F09F	Intel(R) N10/ICH7 Family USB Universal Host Controller - 27C8
F0A0 - F0AF	Intel(R) N10/ICH7 Family Serial ATA Storage Controller - 27C0
F0B0 - F0B3	Intel(R) N10/ICH7 Family Serial ATA Storage Controller - 27C0
F0C0 - F0C7	Intel(R) N10/ICH7 Family Serial ATA Storage Controller - 27C0
F0D0 - F0D3	Intel(R) N10/ICH7 Family Serial ATA Storage Controller - 27C0

Table C.1: System I/O Ports		
F0E0 - F0E7	Intel(R) N10/ICH7 Family Serial ATA Storage Controller - 27C0	
F0F0 - F0F7	Intel(R) Graphic Media Accelerator 3600 Series	
FFFF - FFFF	Motherboard resources	
FFFF - FFFF	Motherboard resources	

C.2 DMA Channel Assignments

Table C.2: DMA Channel Assignments		
Channel	Function	
0	Available	
1	Available	
2	Available	
3	ECP Printer Port	
4	Direct memory access controller	
5	Available	
6	Available	
7	Available	

C.3 Interrupt Assignments

Table C.3: Interrupt	Assignment
Interrupt#	Interrupt source
NMI	Parity error detected
IRQ0	System timer
IRQ1	Standard PS/2 Keyboard
IRQ2	Available
IRQ3	Communications Port (COM2)
IRQ4	Communications Port (COM1)
IRQ5	Available
IRQ6	Available
IRQ7	Available
IRQ8	System CMOS/real time clock
IRQ9	Available
IRQ10	Available
IRQ11	Intel(R) N10/ICH7 Family SMBus Controller ®C 27DA
IRQ12	Microsoft PS/2 Mouse
IRQ13	Numeric data processor
IRQ14	Available
IRQ15	Available
IRQ16	Intel(R) N10/ICH7 Family PCI Express Root Port -27D6
IRQ16	Intel(R) N10/ICH7 Family USB Universal Host Controller ®C 27CB
IRQ18	Intel(R) N10/ICH7 Family PCI Express Root Port -27D6
IRQ18	Intel(R) N10/ICH7 Family USB Universal Host Controller - 27CB
IRQ18	Standard Dual Channel PCI IDE Controller

Table C.3: Int	errupt Assignment
IRQ19	Intel(R) N10/ICH7 Family PCI Express Root Port - 27D6
IRQ19	Intel(R) N10/ICH7 Family Serial ATA Storage Controller - 27C0
IRQ19	Intel(R) N10/ICH7 Family USB Universal Host Controller - 27C9
IRQ22	High Definition Audio Controller
IRQ 23	Intel(R) N10/ICH7 Family USB Universal Host Controller ®C 27C8
IRQ 23	Intel(R) N10/ICH7 Family USB2 Enhanced Host Controller - 27CC
MSI	Intel(R) 82583V Gigabit Network Connection
MSI	Intel(R) Graphics Media Accelerator 3600 Series

C.4 1st MB Memory Map

Table C.4: 1st MB Memory Map	
Addr. range (Hex)	Device
00000000 - 00000FFF	Motherboard resources
00000000 - 00000FFF	Motherboard resources
00000000 - 00003FFF	Motherboard resources
000A0000 - 000BFFFF	Intel(R) Graphic Media Accelerator 3600 Series
000A0000 - 000BFFFF	PCI Bus
000C0000 - 000DFFFF	PCI Bus
000E0000 - 000EFFFF	PCI bus
000F0000 - 000FFFFF	PCI Bus
BF800000 - BFFFFFFF	PCI Bus
C0000000 - FEBFFFFF	PCI Bus
DFC00000 - DFCFFFFF	Intel(R) Graphic Media Accelerator 3600 Series
DFD00000 - DFD1FFFF	82583V Gigabit Network Connection
DFD00000 - DFDFFFFF	Intel(R) N10/ICH7 Family PCI Express Root Port -27D6
DFD20000 - DFD23FFF	82583V Gigabit Network Connection
DFE00000 - DFEFFFFF	Intel(R) N10/ICH7 Family PCI Express Root Port -27D4
DFF00000 - DFE03FFF	High Definition Audio Controller
DFF04000 - DFF043FF	Intel(R) N10/ICH7 Family Serial ATA Storage Controller - 27C0
DFF05000 - DFF053FF	Intel(R) N10/ICH7 Family USB2 Enhanced Host Controller - 27CC
E0000000 - EFFFFFF	System board
FEC00000 - FEC00FFF	Motherboard resources
FED00000 - FED003FF	High precision event timer
FED14000 - FED19FFF	System board
FED1C000 - FED1FFFF	Motherboard resources
FED1C000 - FED1FFFF	Motherboard resources
FED20000 - FED8FFFF	Motherboard resources
FED45000 - FED8FFFF	Motherboard resources
FEE00000 - FEE00FFF	Motherboard resources
FF000000 - FFFFFFFF	Intel 82802 Firmware Hub Device
FF000000 - FFFFFFF	Intel 82802 Firmware Hub Device
FFE00000 - FFFFFFFF	Motherboard resources
