Description

Akyga® AK-AG-03A is a **1,5-metre long power cable** also known as radio cable. It has two solidly made plugs. One with a **BS 1363 (G) fused plug** compatible with UK mains sockets. The other with an **IEC C7 connector**, known as an eight. It is used, among others, to power home cinema sets, DVD players, printers, game consoles and laptop power supplies. The cable is characterised by high resistance to breaking, thanks to reinforcements used at connecting the plugs with the cable. This makes it ideal as a replacement for a damaged cable.
