Description

Akyga® AK-B1-950 ATX power supply 950W is one of the basic power supplies in our offer dedicated to power desktop computers. It has an active PFC filter, which makes the power supply has much higher efficiency than regular power supplies with a passive filter.

Made of high quality components, the power supply has 5x SATA connectors, 2x MOLEX connectors, mini-MOLEX connector, EPS12V 4+4pin connector, PCI-E 6-pin connector, PCI-E 6+2pin connector and an universal 24pin motherboard connector. Silent 12 cm fan with chromed grill provide efficient cooling. Manual on/off switch allows for safe power cut off without the need of disconnecting the network cord. High efficiency and stable operation of the power supply affects the reliability of all computer components.

Several important protectors (OVP, OCP, OPP, OTP, SCP) and active PFC filter protect and prevent main computer parts from damage and stabilize the operation of the power supply so that it works without any unwanted interference.
