Description

Akyga® AK-EC-08 cable is an irreplaceable accessory for anyone who owns a car imported from overseas. Currently, not every charging point has a suitable **cable with a Type 1 connector**, so it is worth equipping yourself to own one. The thick **copper cable** has two connectors. Type 1, found on American cars, and **Type 2**, available at charging stations across Europe. These connectors are characterised by solid workmanship and high-quality components. **The robust construction** guarantees not only a high resistance to falls, but also to accidental impact with a car wheel. What is more, the long 6 m cable will allow comfortable charging of the vehicle with current up to **32 A** and maximum power of **7.2 kW**.

Akyga® AK-EC-08 electric car charging cable will prove useful in charging the batteries of vehicles such as Nissan Leaf, Nissan NV200 SE VAN, Citroen C-Zero, Fisker Karma, Ford Focus Electric, Ford C-Max Energi, Peugeot iOn, Peugeot Galicia, Opel Ampera, Chevrolet Volt, Smiths Edison VAN, Smiths Newton, Tata Indica Vista EV, Toyota Prius, Mistubishi I-Miev, Mitsubishi Outlander PHEV, Mia Electric Van, Mia Electric Car, Kia Soul.
