Description

The **Akyga® AK-ND-C10 adapter** is dedicated to **DELL** laptops with a **4.5x3.0 mm connector**. It is the perfect solution for those looking for a universal way to charge their electronic devices. Thanks to the adapter, it is possible to charge your laptop using a **USB-C PD** charger. In this way, you will be able to charge different devices using a single charger. The adapter is also very easy to use and its compact design allows it to be stored in a bag or backpack, making it ideal for travel. What's more, the adapter allows you to charge at a maximum power of **100 W**, as long as the parameters of the power supply allow it. This makes it easy to power even very powerful laptops.

It is worth remembering that the USB-C adapter does not increase the power of the charger it is used with. Therefore, before using it, make sure that the power adapter has enough power to power our device.
