Description

The **Akyga® AK-SW-07 adapter** is used to charge **Samsung Galaxy Fit 2** smartwatches. This small-sized adapter is no way inferior to the original charger version. It has two **practical latches** that hold the watch in position, thus protecting it from accidental disconnection during charging. What's more, the adapter has a **built-in 15 cm cable** with a **USB connector**. It allows you to connect the charger to any power source equipped with a suitable connector. This may be a socket in a powerbank, notebook, as well as in the traditional power supply. The compact size of the charger makes it an ideal source of energy for your smartwatch, also when travelling.
