# General Information

Liquid Tight Strain Reliefs (Cord Grips) serve two main purposes:

- A. Seal cable entries and keep contaminants from entering into enclosures.
- B. Provide strain relief to reduce stress on components and termination points mounted inside of enclosures.

Altech offers three Liquid Tight Strain Relief Series:

## Standard

Offering an excellent price / performance ratio. Suitable for most applications. Widely used.

1. Straight-Through

## High Performance

Excellent for demanding applications, special requirements, and tough environmental conditions.

2. Increased Strain

## Economy

Suitable for basic applications.

3. Bend Protection

## Functions

Altech Cord Grips are available for a wide range of functions:

1. Straight-Through
2. Increased Strain Relief
3. Bend Protection
4. Pull / Bend Protection
5. Multi-Conductor
6. Flat Cable
7. EMI / RFI

4. Pull / Bend Protection

## PG and NPT Threads

Most Cord Grips are available with PG and NPT external threads. Metric sizes and extended length thread versions are available. Please consult Altech.

## Cable and Cord Types

Use Liquid Tight Strain Reliefs with almost any type of cable, cord or conductor – solid, stranded, flat, shielded, high temperature, etc.

## Wide Range of Materials

Altech provides Cord Grips in a wide range of Body and Sealing materials to meet difficult environmental conditions. Please see the next page for available materials, functions and protection ratings.

## Temperature Rating

Temperature ratings for Cord Grip materials of construction are listed throughout the catalog. Please see each ordering page for specific temperature ratings.

To determine the minimum / maximum usable temperature rating of any Cord Grip combination, compare the individual temperature rating of each component and use the rating of the component with the lesser temperature as the limiting factor.

## Ready for Installation

Cord Grips are supplied complete and ready to install.

5. Multi-Conductor

6. Flat Cable

7. EMI / RFI

## Accessories

Altech offers Locknuts, Seal Rings, Socket Wrenches and Sealing Plugs for Cord Grips. Order Locknuts and Seal Rings separately as required. Refer to pages 52 to 54 for more information.

## Technical Data

General technical data can be found on pages 5 through 10. Specific technical information can be found in the Intro Section for each product group and the ordering pages.

## How to Select Cord Grips

To properly select Altech Cord Grips, the following should be considered.

## Protection Rating

Determine the Protection Rating Required. Refer to Chart I "International Protection (IP) Codes" and Chart II "NEMA / IP Cross Reference" on page 6. Protection Ratings are listed in on each ordering page.

## Material

Select a Cord Grip that will withstand expected environmental conditions. Refer to Chart III, "Chemical Resistance" and Chart IV, "Selection Criteria" on page 7.

## Function

Refer to Chart V "Possible Combinations of Body and Sealing Materials by Function" on pages 8 and 9.

### Thread Definitions for Cord Grips

#### PG

Current European Standard. Large installed base, widely used. Use with PG Locknuts.

#### NPT

National Pipe Thread (US). Use with NPT Locknuts.

#### Metric

Future European Standard. Will be phased in for PG after 1998. Not commonly used at this time and not always readily available. Not shown in this catalog. Please contact Altech for availability.

## Standard, page 12

## High Performance, page 22

## Economy, page 50

Sealing Sleeve

### Body Materials

- Polyamide (PA)
- Brass, Nickel Plated (BN)

### Sealing Sleeve Material

- Neoprene (NE)

### Sealing Insert Material

- Multi-Conductor: PVC Polyvinylchloride (PV)
- Flat Cable: Neoprene (NE)

### Functions

- Straight-Through
- Pull / Bend
- Multi-Conductor
- Bend
- Flat Cable

### Protection Rating

Up to IP68  
(NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13)<sup>1</sup>

Tubular Sealing Insert

### Body Materials

- Polyamide (PA)
- PVDF Polyvinylidene (PO)
- Brass, Nickel Plated (BN)
- Stainless Steel (SS)

### Tubular Sealing Insert Materials

- PVC Polyvinylchloride (PV)
- Santoprene (ST)
- TPE Polyolefin (TP)
- Silicone (SI)

### Functions

- Straight-Through
- Pull / Bend
- Multi-Conductor
- Increased Strain Relief
- Bend
- Flat Cable
- EMI / RFI

### Protection Rating

Up to IP68  
(NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13)<sup>1</sup>

### Pressure Rating

Up to 10 Bar (140 psi)

Sealing Ring

### Body Materials

- Polystyrene (PS)
- Brass, Nickel Plated (BN)

### Sealing Ring Material

- Rubber (RU)

### Function

- Straight-Through

### Protection Rating

Up to IP55  
(NEMA 1, 2, 5, 12, 13)<sup>1</sup>

<sup>1</sup>Please refer to Chart I, IP Codes and Chart II, NEMA Codes on page 6.

## INSTALLATION

Liquid Tight Strain Reliefs can be installed into threaded or nonthreaded holes (order Locknuts separately for installation in nonthreaded holes). Locknuts are shown on the ordering pages for each product and on page 54. For Mounting Hole Diameters refer to the dimensional information on each ordering page. If installation is into threaded holes, please contact Altech for required Hole Diameters and tap sizes.

Once the Cord Grip is mounted, insert cable(s) or cord(s) and tighten the Pressure Nut or Pressure Dome.

For high density installation of Cord Grips, please refer to the Installation Worksheet on page 55 for minimum clearance distances. Socket Wrenches for installing Cord Grips are shown on page 53.

### Recommended Tightening Torques

- Use torque listed for Cord Grip installation in threaded or nonthreaded holes
- Use 2/3 of the listed torque to fasten Pressure Dome

②

③

④

⑤

### Recommended Tightening Torques

External Thread	Recommended Tightening Torques	
	Metal Nm (lbin)	Nonmetallic Nm (lbin)
PG7	6.25 (55.31)	2.50 (22.12)
PG9	6.25 (55.31)	3.75 (33.19)
PG11	6.25 (55.31)	3.75 (33.19)
PG13.5	6.25 (55.31)	3.75 (33.19)
PG16	7.50 (66.37)	5.00 (44.25)
PG21	10.00 (88.50)	7.50 (66.37)
PG29	10.00 (88.50)	7.50 (66.37)
PG36	10.00 (88.50)	7.50 (66.37)
PG42	10.00 (88.50)	7.50 (66.37)
PG48	10.00 (88.50)	7.50 (66.37)
NPT3/8	6.25 (55.31)	3.75 (33.19)
NPT1/2	6.25 (55.31)	3.75 (33.19)
NPT3/4	10.00 (88.50)	7.50 (66.37)

# CHART I

## International Protection (IP) Ratings to IEC 529

First digit of IP Number - Ingress of foreign objects			Second digit of IP Number - Ingress of water								
			IP 0	IP 1	IP 2	IP 3	IP 4	IP 5	IP 6	IP 7	IP 8
	Meaning for the protection of equipment against ingress of solid foreign objects	Meaning for the protection of persons against access to hazardous parts with	Non-protected	Protected against vertically falling water drops.	Protected against vertically falling water drops when device is tilted up to 15°	Water sprayed at an angle up to 60° on either side of the vertical shall have no harmful effects	Water splashed from any direction shall have no harmful effects	Water projected in jets from any direction shall have no harmful effects	Water projected in powerful jets from any direction shall have no harmful effects	Protected against temporary immersion	Protected against continuous immersion
IP 0	non-protected	non-protected	IP 00								
IP 1	Protected against solid foreign objects larger in diameter than 50mm (1.97 in.)	Protected against access to hazardous parts with the back of the hand	IP 10	IP 11	IP 12						
IP 2	Protected against solid foreign objects larger in diameter than 12.5mm (.49 in.)	Protected against access to hazardous parts with a finger	IP 20	IP 21	IP 22	IP 23					
IP 3	Protected against solid foreign objects larger in diameter than 2.5mm (.10 in.)	Protected against access to hazardous parts with a tool larger in diameter than 2.5 mm (.10 in.)	IP 30	IP 31	IP 32	IP 33	IP 34				
IP 4	Protected against solid foreign objects larger in diameter than 1.0mm (.04 in.)	Protected against access to hazardous parts with a wire larger in diameter than 1.0mm (.04 in.)	IP 40	IP 41	IP 42	IP 43	IP 44				
IP 5	Ingress of dust is not totally prevented, but dust shall not penetrate in a quantity to interfere with satisfactory operation of the apparatus or to impair safety	Protected against access to hazardous parts with a wire larger in diameter than 1.0mm (.04 in.)					IP 54	IP 55			
IP 6	No ingress of dust	Protected against access to hazardous parts with a wire larger in diameter than 1.0mm (.04 in.)							IP 66	IP 67	IP 68

Note: Protection Rating for each product is shown on ordering page.

## CHART IV SELECTION CRITERIA

### Key

- = Good
- ▶ = Limited

### Material Key

- PS = Polystyrene
- PA = Polyamide
- PO = PVDF Polyvinylidene-fluoride
- BN = Brass, Nickel Plated
- SS = Stainless Steel

<sup>1</sup>Refer to page 6 for explanation. Refer to appropriate ordering pages for exceptions.

<sup>2</sup>Temperature may be limited by seal or body materials. Refer to each ordering page.

<sup>3</sup>Except for Multi-Conductor and Flat Cable Liquid Tight Strain Reliefs, which use a Sealing Ring.

## CHART V

### POSSIBLE COMBINATIONS OF BODY AND SEALING MATERIALS BY FUNCTION

To simplify selection, possible material combinations are shown. Please refer to the pages indicated for technical and ordering information.

#### 1. Straight-Through

Sealing plus standard strain relief.

Sealing Material	STANDARD			HIGH PERFORMANCE			ECONOMY	
	Body Material	Polyamide (PA)	Brass, Nickel Plated (BN)	Polyamide (PA)	PVDF Polyvinylidene (PO)	Brass, Nickel Plated (BN)	Stainless Steel (SS)	Polystyrene (PS)
Neoprene (NE)	16	17						
PVC Polyvinylchloride (PV)			28	30	32	34		
Santoprene (ST)			29	31	33	35		
TPE Polyolefin (TP)				31	33	35		
Silicone (SI)				31	33	35		
Rubber (RU)							51	51

#### 2. Increased Strain Relief

Sealing plus increased strain relief.

Sealing Material	STANDARD			HIGH PERFORMANCE			ECONOMY	
	Body Material	Polyamide (PA)	Brass, Nickel Plated (BN)	Polyamide (PA)	PVDF Polyvinylidene (PO)	Brass, Nickel Plated (BN)	Stainless Steel (SS)	Polystyrene (PS)
Neoprene (NE)		19						
PVC Polyvinylchloride (PV)			36	37	37			
Santoprene (ST)								
TPE Polyolefin (TP)								
Silicone (SI)								
Rubber (RU)	19							

#### 3. Bend

Sealing plus bend protection and standard strain relief.

Sealing Material	STANDARD			HIGH PERFORMANCE			ECONOMY	
	Body Material	Polyamide (PA)	Brass, Nickel Plated (BN)	Polyamide (PA)	PVDF Polyvinylidene (PO)	Brass, Nickel Plated (BN)	Stainless Steel (SS)	Polystyrene (PS)
Neoprene (NE)	18							
PVC Polyvinylchloride (PV)			38	39	39			
Santoprene (ST)								
TPE Polyolefin (TP)								
Silicone (SI)								
Rubber (RU)								

## 4. Pull / Bend

Sealing plus bend protection and increased strain relief.

Sealing Material	STANDARD			HIGH PERFORMANCE			ECONOMY	
	Body Material	Polyamide (PA)	Brass, Nickel Plated (BN)	Polyamide (PA)	PVDF Polyvinylidene (PO)	Brass, Nickel Plated (BN)	Stainless Steel (SS)	Polystyrene (PS)
Neoprene (NE)		19						
PVC Polyvinylchloride (PV)			40		41			
Santoprene (ST)								
TPE Polyolefin (TP)								
Silicone (SI)								
Rubber (RU)	19							

## 5. Multi-Conductor

Sealing plus strain relief for multiple conductors, cables or cords of identical or different diameters.

Sealing Material	STANDARD			HIGH PERFORMANCE			ECONOMY	
	Body Material	Polyamide (PA)	Brass, Nickel Plated (BN)	Polyamide (PA)	PVDF Polyvinylidene (PO)	Brass, Nickel Plated (BN)	Stainless Steel (SS)	Polystyrene (PS)
Neoprene (NE)								
PVC Polyvinylchloride (PV)	20		42 - 45 <sup>1</sup>		42 - 45 <sup>1</sup>			
Santoprene (ST)								
TPE Polyolefin (TP)								
Silicone (SI)								
Rubber (RU)								

1. Multi-Conductor Bodies page 42; Multi-Conductor Inserts pages 43 - 45.

## 6. Flat Cable

Sealing plus strain relief for flat cables.

Sealing Material	STANDARD			HIGH PERFORMANCE			ECONOMY	
	Body Material	Polyamide (PA)	Brass, Nickel Plated (BN)	Polyamide (PA)	PVDF Polyvinylidene (PO)	Brass, Nickel Plated (BN)	Stainless Steel (SS)	Polystyrene (PS)
Neoprene (NE)	21							
PVC Polyvinylchloride (PV)			48 - 49 <sup>2</sup>		49			
Santoprene (ST)								
TPE Polyolefin (TP)								
Silicone (SI)								
Rubber (RU)								

2. Flat Cable Bodies page 48; Flat Cable Inserts page 49.

## 7. EMI / RFI

Sealing and strain relief plus shielding against electromagnetic and radio frequency interference.

Sealing Material	STANDARD			HIGH PERFORMANCE			ECONOMY	
	Body Material	Polyamide (PA)	Brass, Nickel Plated (BN)	Polyamide (PA)	PVDF Polyvinylidene (PO)	Brass, Nickel Plated (BN)	Stainless Steel (SS)	Polystyrene (PS)
Neoprene (NE)								
PVC Polyvinylchloride (PV)								
Santoprene (ST)					47			
TPE Polyolefin (TP)								
Silicone (SI)								
Rubber (RU)								

# How To Order Liquid Tight Strain Reliefs From Altech

We have provided this sample page to help you order Liquid Tight Strain Reliefs from Altech. This page provides you with information on how to read the ordering pages inclusive of a legend and abbreviations used, which are consistent throughout the catalog.

**STANDARD** \_\_\_\_\_ 1

**STRAIGHT-THROUGH** \_\_\_\_\_ 2

**Polyamide (PA)** \_\_\_\_\_ 3

- IP68 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13).
- PG, NPT standard. Metric available.
- Integral Sealing Ridges (Only PG7 to PG21 and NPT3/8 to NPT3/4). Order Seal Rings separately if required.
- Preinstalled Perbunan (PR) Seal Rings (Only PG29 to PG48).
- Standard Color: Light Gray and Black, Dark Gray available.

# Product Bulletin

## Introducing Pulsotronic Proximity Sensors. . . The Newest Addition to Altech Corp.'s Line of Control and Automation Products!

Altech / Pulsotronic now offer a comprehensive line of Proximity Sensors to satisfy today's diverse sensor applications. Our sensors are used for a wide range of functions in industrial plants and machinery.

Typical applications of our sensors include automatic machinery, conveyor systems, machine tools, packaging machines, production lines, robotic systems, etc.

Altech / Pulsotronic Proximity Sensors are available in DC (PNP and NPN) and AC, n.o./n.c. and flush and non-flush configurations. They are available in Tubular, Limit, Block and Ring models.

*Proximity Sensor in a conveyer application.*

### Pulsotronic Proximity Sensors:

- π 25 years of proven quality and reliability
- π Pulsotronic manufacturing is ISO 9001 Certified
- π Selection of Quick Disconnects
- π Choose from Tubular, Limit, Block, and Ring Sensors
- π Immediate delivery of most models
- π New line of rotatable, 25-position Limit Style Sensors now available
- π Short circuit, overload, and reverse polarity protection

### Specifications:

- π Digital output standard. Linear output available
- π Meet or exceed IP67 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13) protection specifications
- π 10 - 30 VDC and 20 - 250 VAC, 120 - 500 mA current
- π 0.5mm to 1600mm (0.01 to 63 in.) sensing range

---

---

Offering an excellent price / performance ratio, the Standard Liquid Tight Strain Reliefs are suitable for a wide range of applications. They can be used with cables, cords, etc. in a wide range of diameters.

Select the most suitable Cord Grip for your application from a variety of Functions, Body and Sealing Insert material combinations.

**Body Materials**

- Polyamide (PA)
- Brass, Nickel Plated (BN)

**Sealing Sleeve Material**

- Neoprene (NE)

**Sealing Insert Material**

- Multi-Conductor: PVC  
Polyvinylchloride (PV)
- Flat Cable: Neoprene (NE)

**Functions**

- Straight-Through
- Bend
- Pull / Bend
- Multi-Conductor
- Flat Cable

**Protection Rating**

Up to IP68  
(NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13)

---

# STANDARD

Standard Cord Grips are supplied complete and ready to install. The illustration below shows the various components of the Nonmetallic and the Metal Straight-Through Cord Grips. Basic functions for each component are described below.

## Pressure Dome

The conical interior of the Pressure Dome transfers pressure to the Pressure Fingers when the Dome is tightened.

“Secur-Grip” grooves, molded into the outer surface of the Dome, provide a secure gripping surface (Polyamide (PA) types).

## Pressure Fingers

Pressure Fingers are an integral part of the Cord Grip Body and Polyamide (PA) Insert (Brass, Nickel Plated (BN)) and are arranged concentrically. When the Pressure Dome is tightened, they push the Sealing Sleeve against the cable or cord and help provide sealing and strain relief functions.

## Sealing Sleeve

The Sealing Sleeve is contained by the Pressure Fingers and a circular

groove inside the Body and Polyamide (PA) Insert. It provides strain relief and prevents rotation of the cable when the Pressure Dome is tightened.

## Polyamide (PA) Insert

The Brass, Nickel Plated (BN) Cord Grip Body contains a Polyamide (PA) Insert with Pressure Fingers. Molded-in splines fit into grooves at the lower end of the Brass, Nickel Plated (BN) Body and prevent rotation of the insert and cable during installation.

## External Seal

The External Seal provides a hermetic seal between the Cord Grip and the enclosure wall. Integral Sealing Ridges are standard on Polyamide (PA) Cord Grips sizes PG7 to PG21, and NPT 3/8, 1/2, 3/4 sizes. Sizes PG29 through PG48 have factory

installed Seal Rings. If required, Seal

Rings can also be used for sizes PG7 through PG21 and NPT 3/8, 1/2 and 3/4. Please refer to page 52 for ordering information.

All Standard Series Brass, Nickel Plated (BN) Cord Grips are delivered with preinstalled Perbunan (PR) Seal Rings.

## External Thread

Most Standard Series Cord Grips are offered with external PG or NPT threads. For metric and extended length threads, please contact Altech.

## Locknuts

Use Locknuts for installation into nonthreaded holes. Order Locknuts separately. Please refer to each ordering page or to page 54 for technical and ordering information.

## Straight-Through, pages 16 and 17

Provide a liquid-tight seal and reliable strain relief for most applications.

### Sealing Function

The sealing function for the Polyamide (PA) and the Brass, Nickel Plated (BN) Cord Grips is identical.

When tightening the Pressure Dome, the conical interior surface applies pressure to the tips of the concentrically arranged Pressure Fingers, forcing them to move towards the center. This movement is transferred to the Sealing Sleeve, causing it to contract and provide a seal to the installed cable.

### Installation

Please refer to page 5 to install Cord Grips.

## Bend Protection, page 18

Bend Protection Cord Grips provide standard Pull-Out (Strain Relief) plus Bend protection. The increased bending radius is achieved by a "Pigtail" extension, which reduces punctual stress and the possibility of cable/cord damage.

### Sealing Function

Uses the same sealing function as Straight-Through Cord Grips.

### Installation

Please refer to page 5 to install Cord Grips.

## Pull / Bend Protection, page 19

Trumpet-shaped Pull / Bend Cord Grips provide increased Strain Relief and Bend protection by increasing the bending radius of the cable/cord, reducing the possibility of cable/cord damage.

Polyamide (PA)

Brass, Nickel Plated (BN)

### Sealing Function

When tightening the trumpet-shaped extension, the Neoprene (NE) (Brass, Nickel Plated (BN)) or Rubber (RU) Sealing Ring (Polyamide (PA)) is compressed, providing a seal to the installed cable.

### Installation

Please refer to page 5 to install Cord Grips.

1. Install Cord Grip.
2. Loosen stainless steel screws and open clamp.
3. Insert cable/cord
4. Tighten trumpet-shaped Pressure Nut.
5. Tighten screws until cable/cord is securely installed.

	Function					
	Straight -Through		Bend	Pull / Bend		
Body Material	Polyamide (PA)		Brass, Nickel Plated (BN)	Polyamide (PA)		
Standard Color	Lt. Gray, Black	—	Lt. Gray, Black	Lt. Gray	—	
Sealing Ring / Sleeve	NE	NE	NE	RU	NE	
Seal Ring Preinstalled	Yes†	Yes	No	No	No	
Sizes	PG	PG7 - PG48	PG7 - PG21	PG9 - PG29	PG9 - PG29	
	NPT	NPT3/8-3/4	NPT3/8-3/4	—	—	
Cable	mm	2.0 - 44.0	2.0 - 44.0	3.5 - 18.0	5.5 - 25.0	
Diameter	(in.)	(.08 - 1.73)	(.08 - 1.73)	(.14 - .71)	(.22 - .98)	
				(.24 - 1.18)		

**Key**  
 NE = Neoprene  
 RU = Rubber  
 † = PG29 - PG48 only

## Multi-Conductor page 20

For limited space applications whenever two or more cables, cords or conductors must be installed through a single Cord Grip.

Insert Sealing Inserts with premolded holes for cables, cords or conductors of identical diameters.

Use Sealing Plugs to seal unused holes, ensuring proper strain relief and IP54 (NEMA 1, 2, 5, 12, 13) protection for installed cables. Please refer to page 52.

### Sealing Function

When tightening the Pressure Dome, the conical interior surface applies pressure onto the tips of the concentrically arranged Pressure Fingers, forcing them to move towards the center. This movement is transferred to the Sealing Insert, causing it to contract and seal the cables/cords or conductors.

### Installation

Please refer to page 5 to install Cord Grips. Insert Cables after installing Cord Grips. Plug unused holes to obtain rated protection and strain relief after cables have been installed, but before tightening Pressure Dome.

## Flat Cable page 21

Flat Cable for Cord Grips are typically used with festooning cables. The openings in the sealing insert have rounded corners to match the shape of the cable, providing a liquid tight seal and reliable strain relief.

### Sealing Function

When the Pressure Nut is tightened, pressure is applied to the Galvanized Steel Washers. This pressure is transferred to the Sealing Insert, causing it to contract and seal the cable.

### Installation

Please refer to page 5 to install Cord Grips.

1. Remove Pressure Nut, Washers and Sealing Insert.
2. Slide Pressure Nut, Washer 1, Sealing Insert and Washer 2 onto the Flat Cable.
3. Install the cable with the installed parts into the Cord Grip Body.
4. Tighten Pressure Nut.

## Material and Temperature Ranges By Function

### Straight-Through Polyamide (PA)

Body: Polyamide (PA)  
 -20 to 100°C (-4 to 212°F)  
 Sealing Sleeve: Neoprene (NE)  
 -40 to 100°C (-40 to 212°F)

### Brass, Nickel Plated (BN)

Body: Brass, Nickel Plated (BN)  
 -40 to 300°C (-40 to 572°F)  
 Sealing Sleeve: Neoprene (NE)  
 -40 to 100°C (-40 to 212°F)  
 Seal Ring: Perbunan (PR)  
 -20 to 120°C (-4 to 248°F)

### Multi-Conductor

Body: Polyamide (PA)  
 -20 to 100°C (-4 to 212°F)  
 Sealing Insert: PVC Polyvinylchloride (PV)  
 -20 to 80°C (-4 to 176°F)

### Flat Cable

Body: Polyamide (PA) Glass-Fiber Reinforced  
 -20 to 100°C (-4 to 212°F)  
 Sealing Insert: Neoprene (NE)  
 -40 to 100°C (-40 to 212°F)

### Bend

Body: Polyamide (PA)  
 -20 to 100°C (-4 to 212°F)  
 Sealing Sleeve: Neoprene (NE)  
 -40 to 100°C (-40 to 212°F)

### Pull / Bend

Polyamide (PA)  
 Body: Polyamide (PA) Glass-Fiber Reinforced  
 -20 to 100°C (-4 to 212°F)  
 Sealing Ring: Rubber (RU)  
 -20 to 60°C (-4 to 140°F)

### Brass, Nickel Plated (BN)

Body: Brass, Nickel Plated (BN)  
 -40 to 300°C (-40 to 572°F)  
 Sealing Sleeve: Neoprene (NE)  
 -40 to 100°C (-40 to 212°F)  
 Seal Ring: Perbunan (PR)  
 -20 to 120°C (-4 to 248°F)

## Accessories

Ordering information for Accessories is shown on each ordering page. Please refer to pages 52 through 54 for detailed information.

## STANDARD STRAIGHT-THROUGH

### Brass, Nickel Plated (BN)

- IP68 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13).
- PG, NPT standard. Metric available.
- Preinstalled Perbunan (PR) Seal Rings (All sizes).

<sup>1</sup> For installation into nonthreaded holes with Locknuts. Please refer to page 5 for installation instructions.

<sup>2</sup> Order Locknuts separately if required. Please refer to page 54 for more information.

#### Installation

To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

# STANDARD BEND PROTECTION

## Polyamide (PA)

- IP68 (NEMA1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13).
- PG, NPT standard. Metric available.
- Integral Sealing Ridges (Only PG7 to PG21 and NPT3/8 to NPT3/4). Order Seal Rings separately if required.
- Standard Color: Light Gray and Black.

<sup>1</sup> For installation into nonthreaded holes with Locknuts. Please refer to page 5 for installation instructions.

<sup>2</sup> Order Locknuts separately if required. Please refer to page 54 for more information.

<sup>3</sup> Order Seal Rings separately if required. Please refer to page 52 for more information.

#### Installation

To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

## STANDARD PULL / BEND PROTECTION

- IP55 (NEMA 1, 2, 5, 12, 13).
- PG standard.
- Standard Color: Light Gray Polyamide (PA) or Brass, Nickel Plated (BN).
- We recommend the use of Polyethylene (PE) Seal Rings with Polyamide (PA) Cord Grips and Perbunan (PR) Seal Rings with Brass, Nickel Plated (BN) Cord Grips. Order Seal Rings separately. Refer to page 52 for technical and ordering information.
- Order Locknuts separately if required. We recommend the use of Polyamide (PA) Locknuts with Polyamide (PA) Cord Grips and Brass, Nickel Plated (BN) Locknuts with Brass, Nickel Plated (BN) Cord Grips. Refer to page 54 for technical and ordering information.

Temperature Ranges	
Body	Sealing Ring
Polyamide (PA) -20 to 100°C (-4 to 212°F)	Rubber (RU) -20 to 60°C (-4 to 140°F)
Brass, Nickel Plated (BN) -40 to 300°C (-40 to 572°F)	Neoprene (NE) -40 to 100°C (-40 to 212°F)

**Polyamide (PA)**  
with Rubber (RU) Sealing Ring

**Brass, Nickel Plated (BN)**  
with Neoprene (NE) Sealing Ring

<sup>1</sup> For installation into nonthreaded holes with Locknuts. Please refer to page 5 for installation instructions.

#### Installation

To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

# STANDARD MULTI-CONDUCTOR

## Polyamide (PA)

- IP54 (NEMA 1, 2, 5, 12, 13).
- PG standard, NPT available.
- Integral Sealing Ridges (Only PG11 to PG21). Order Seal Rings separately if required. Refer to page 52.
- Preinstalled Perbunan (PR) Seal Rings (Only PG29).
- Plug unused holes with Sealing Plugs. Refer to page 52.
- Standard Color: Light Gray and Black.

<sup>1</sup> For installation into nonthreaded holes with Locknuts. Please refer to page 5 for installation instructions.

<sup>2</sup> Order Locknuts separately if required. Please refer to page 54 for more information.

<sup>3</sup> Order Seal Rings separately if required. Please refer to page 52 for more information.

#### Installation

To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

## STANDARD FLAT CABLE

### Polyamide (PA)

- IP 55 (NEMA 1, 2, 5, 12, 13).
- PG standard.
- Galvanized Steel Washers.
- Standard Color: Light Gray.
- Sealing Insert Color: Black.
- We recommend the use of Polyethylene (PE) Seal Rings with the Cord Grips shown on this page. Please order separately. Refer to column below and page 52 for additional information.
- Other sizes available, please contact Altech.

#### \*Tolerances

Minimum cable size should not be less than .5mm (.02 in.) in length and height than opening in Cord Grip.

<sup>1</sup> For installation into nonthreaded holes with Locknuts. Please refer to page 5 for installation instructions.

<sup>2</sup> Order Locknuts separately if required. Please refer to page 54 for more information.

<sup>3</sup> Order Seal Rings separately if required. Please refer to page 52 for more information.

#### Installation

To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

---

Excellent for demanding applications, special requirements, and tough environmental conditions. High Performance Liquid Tight Strain Reliefs (Cord Grips) can be used with cables, cords, etc. in a wide range of diameters.

Select the most suitable Cord Grip for your application from a variety of Functions, Body and Tubular Sealing Insert material combinations.

#### **Body Materials**

- Polyamide (PA)
- PVDF Polyvinylidene Fluoride (PO)
- Brass, Nickel Plated (BN)
- Stainless Steel (SS)

#### **Tubular Sealing Insert Materials**

- PVC Polyvinylchloride (PV)
- Santoprene (ST)
- TPE Polyolefin (TP)
- Silicone (SI)

#### **Functions**

- Straight-Through
- Increased Strain Relief
- Bend
- Pull / Bend
- Multi-Conductor
- EMI / RFI
- Flat Cable

#### **Protection Rating**

Up to IP68  
(NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13)

#### **Pressure Rating**

Up to 10 Bar (140 psi)

---

# HIGH PERFORMANCE

High Performance Cord Grips are supplied complete and ready to install. The illustration below shows the various components of the Nonmetallic and the Metal Straight-Through Cord Grips. Basic functions of each component are described below.

## Pressure Dome

The conical interior of the Pressure Dome transfers pressure to the Tubular Sealing Insert when the Dome is tightened.

## Tubular Sealing Insert

The Sealing Insert is extended in length to provide a Protection Rating of IP68 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13), up to 10 Bar (140 psi). The knurled outer surface of the Insert interlocks with the knurled inner surface of the Cord Grip to prevent the twisting of cable, cord, etc. when the Pressure Dome is tightened.

The Membrane at the lower end of the Insert has a reduced diameter. By simply pushing the cable/cord through, IP54 (NEMA 1, 2, 5, 12, 13) protection is provided without tightening the Pressure Dome.

PVC Polyvinylchloride (PV) Tubular Sealing Inserts are color-coded by cable diameter for easy identification.

## External Seal

Provides a hermetic seal between the Cord Grip and the enclosure wall. Seal Rings are not preinstalled on

nonmetallic Cord Grips. Please order separately if required, page 52.

Metal Cord Grips have preinstalled Perbunan (PR) or Silicone (SI) Seal Rings. Please refer to the ordering pages or to page 52.

## External Thread

High Performance Cord Grips are offered with external PG or NPT threads. For metric and extended length threads, please contact Altech.

## Locknuts

Use Locknuts for installation of Cord Grips into nonthreaded holes. Order Locknuts separately. Please refer to ordering pages or to page 54 for technical and ordering information.

## Straight-Through pages 28 - 35

Provide a liquid-tight seal and reliable strain relief for demanding applications.

### Sealing Function

When the Pressure Dome is tightened, its conical interior surface applies pressure to the Tubular Sealing Insert. This pressure causes the Tubular Insert to move toward the center of the Cord Grip to securely grip the cable over a wide surface area. As this occurs, the Tubular Insert will bulge along the cable and slightly out of the top of the Pressure Dome to seal the entire Cord Grip.

The Membrane at the lower end of the Insert has a reduced diameter. By simply pushing the cable/cord through, IP54 (NEMA 1, 2, 5, 12, 13 ) protection is provided without tightening the Pressure Dome.

**Installation**  
Please refer to page 5 to install Cord Grips.

## Increased Strain Relief pages 36 and 37

For applications requiring increased strain relief.

Increased pull-out protection is achieved by using a Polyamide (PA) "Grip" Ring, which is integrated into the PVC Tubular Sealing Insert.

### Sealing Function

Cord Grips with Increased Pull-Out Protection use the same sealing function as the Straight-Through Cord Grips.

### Installation

Please refer to page 5 to install Cord Grips.

## Bend Protection pages 38 and 39

Prevents sharp bending plus provides strain relief, extending cable life.

An Extended Tubular Sealing Insert/Sleeve provides strain relief and Bend Protection in one. It increases the bending preventing sharp bend punctual stress. The cable in the sleeve can be easily changed to different cable/cord diameters.

### Sealing Function

Cord Grips with Bend Protection use the same sealing function as the Straight-Through Cord Grips.

### Installation

Please refer to page 5 to install Cord Grips.

### Key

- PV = PVC Polyvinylchloride
- ST = Santoprene
- TP = TPE Polyolefin
- SI = Silicone
- PP = Polyamide (PA) "Grip" Ring molded into PVC Polyvinylchloride (PV) Sleeve

## Pull / Bend Protection pages 40 and 41

Provide Bend Protection and increased strain relief.

The Extended Tubular Insert/Sleeve has a molded in "Grip" Ring that provides increased Pull-Out protection. The sleeve determines the bend radius, preventing sharp bending of the cable/cord. The conical tip of the sleeve can be easily cut to fit different cable/cord diameters.

### Sealing Function

Cord Grips with Pull / Bend protection use the same sealing function as the Straight-Through Cord Grips.

### Installation

Please refer to page 5 to install Cord Grips.

## Multi-Conductor pages 42 - 45

Saves cost, space and installation time. Multi-Conductor Cord Grips provide strain relief for multiple cables, cords and/or conductors of the same or varying diameters through a single Cord Grip.

Altech Multi-Conductor Cord Grip bodies are sold without Sealing Inserts and are constructed of Polyamide (PA) and Brass, Nickel Plated (BN). See page 42 for details.

We offer three types of PVC Polyvinylchloride (PV) Sealing Inserts; A.) Solid Core for shop drilling to meet various cable diameter combination(s), B.) A wide variety of premolded patterns and C.) Custom molding patterns. Please consult Altech with your custom or high volume requirements.

Sealing Plugs are available to seal unused holes, ensuring strain relief and IP65 (NEMA 1, 2, 3, 3R, 5, 12, 13) protection rating. Please refer to page 52 for Sealing Plug selection.

For your convenience, a handy Worksheet with Solid Core Sealing Insert Templates is provided on page 46.

### Installation

Please refer to page 5 to install Cord Grips.

## Flat Cable pages 48 and 49

Typically used with festooning and other flat cables. Rounded Sides and Oval Openings help to provide a better seal and maintain a Protection Rating of IP65 (NEMA 1, 2, 3, 3R, 5, 12, 13).

High Performance Flat Cable Cord Grips are supplied with a PVC Polyvinylchloride (PV) Tubular Sealing Insert.

Rounded Sides

Oval Openings

### Installation

Please refer to page 5 to install Cord Grips.

**EMI / RFI page 47**

Provide sealing and strain relief plus shielding against electromagnetic and radio frequency interference.

Electromagnetic and radio frequency interference can cause costly interruptions of industrial machinery, etc. Therefore, associated control systems must be protected.

The most common way to provide EMI / RFI protection is to install electronics, controls, etc. into a shielded enclosure. However, the protective function of the enclosure shield can be greatly reduced if the

cable entries are not protected as well.

Altech's new generation of EMI / RFI Liquid Tight Strain Reliefs help prevent unwanted interference from entering and exiting the shielded enclosure. They become an integral part of the overall shield. The shielding function is obtained by producing a continuous ground connection between the cable shield and the enclosure itself.

**Shielding Function**

When the Pressure Dome is tightened, a Circular Spring is forced against the cable shield by two tapered Pressure Rings. At the same time, the Pressure Rings are grounded to the Strain Relief Body, which in turn is connected to the enclosure and its shield.

**Sealing Function**

EMI / RFI Cord Grips provide the same sealing function as the Straight-Through Cord Grips.

**Installation**

*Installation into nonthreaded holes*

To ensure a good ground connection between the Cord Grip and a **Metal Enclosure**, we strongly recommend the use of EMI / RFI Locknuts for nonthreaded mounting. The Locknut has six cutting edges, which will cut through paint and coatings into the metal of the enclosure.

EMI / RFI Locknut  
Side View

If **Nonmetallic Enclosures**

used, we suggest to connect the cable shield to a reliable ground potential within the enclosure and use a regular Locknut for the installation.

*Installation into threaded holes*

If a **Metal Enclosure** is used, be sure that the threads are free and clean of grease, lubricants, dust and other foreign materials, so that positive ground contact is ensured.

If the installation is into a **Nonmetallic Enclosure**, we must be taken to ensure continuity of the ground connection between the cable shield and the enclosure shield.

*Installation*

1. Install the Cord Grip body into the enclosure. Refer to page 5.
2. Remove Pressure Dome, Tubular Sealing Insert, Pressure Ring 1, Circular Spring and Pressure Ring 2.
3. Strip outer sheath from shielded cable. Make sure that sufficient wire length is available for connection.
4. Install the Pressure Dome and the Sealing Insert onto the cable sheath. Refer to photograph over the center column.
5. Install Pressure Ring 1 onto the exposed shield, with the tapered side facing the enclosure, and push against Cable Sheath.
6. Install the Circular Spring onto the shield.
7. Install Pressure Ring 2 onto the cable shield with the tapered side facing the Circular Spring.
8. Insert the cable with the installed parts into the Cord Grip Body. Make sure the outer cable sheath is firmly inserted into the Tubular Sealing Insert to obtain the specified IP/NEMA Rating.
9. Push the Tubular Sealing Insert with the installed cable into the Cord Grip Body.
10. Tighten down the Pressure Dome.

# HIGH PERFORMANCE STRAIGHT-THROUGH PVDF Polyvinylidene (PO)

- IP68 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13) / 10 Bar (140 psi).
- PG, NPT standard.
- Long Thread 15mm (.59 in.) available.
- Order Seal Rings and Locknuts separately if required.
- Standard color: Opaque or Black. Blue available.

## Accessories

Locknuts (Additional information on page 54.)	
Material	Brass, Nickel Plated (BN)
Temperature Range	-40 to 300°C (-40 to 572°F)
Size	Cat. No. Std. Pk.
PG7	86.500 100
PG9	86.501 100
PG11	86.502 50
PG13.5	86.503 50
PG16	86.504 50
PG21	86.505 50
PG29	86.506 25
PG36	86.507 10
PG42	86.508 5
PG48	86.509 5

# HIGH PERFORMANCE STRAIGHT-THROUGH

## Stainless Steel (SS)

- IP68 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13) / 10 Bar (140 psi).
- PG standard.
- Preinstalled Perbunan (PR) or Silicone (SI) Seal Ring.
- Order Locknuts separately if required.

## Stainless Steel (SS) with PVC Polyvinylchloride (PV) Tubular Sealing Insert

### Liquid Tight Strain Reliefs (Cord Grips)

# HIGH PERFORMANCE INCREASED STRAIN RELIEF PROTECTION

- IP54 (NEMA 1, 2, 5, 12, 13).
- PG standard.
- Brass, Nickel Plated (BN) Cord Grips feature preinstalled Perbunan (PR) Seal Rings. Order Seal Rings separately for Polyamide (PA) and PVDF Polyvinylidene (PO) Cord Grips (all sizes) if required.
- Order Locknuts separately if required.
- Standard color: Beige or Black Polyamide (PA), Opaque or Black PVDF Polyvinylidene (PO) or Brass, Nickel Plated (BN).

# HIGH PERFORMANCE MULTI-CONDUCTOR BODIES

## Polyamide (PA) and Brass, Nickel Plated (BN)

High Performance Multi-Conductor Strain Reliefs are used to install several cables, cords, etc. of identical or different diameters through one Cord Grip into an enclosure.

Typically used when space is restricted or when multiple cables must be installed, Multi-Conductors seal and provide strain relief. They are available with Polyamide (PA) and Brass, Nickel Plated (BN) bodies. The Sealing Insert material is PVC Polyvinylchloride (PV) and is available in three different variations:

1. Premolded with a number of holes of the same or different diameters. Please refer to pages 43 to 45 for available patterns, keeping in mind that the hole size selected for specific cables should match the actual diameter closely. A tolerance of -1mm (0.04 in.) should not be exceeded to ensure proper sealing. If all of the holes are not required when using a Premolded Multi-Conductor Insert, refer to page 52 for the appropriate size Sealing Plug. Sealing Plugs should be inserted into unused holes to maintain the rated seal and strain relief rating.

2. Solid Inserts for self customization are available for sizes PG9 to PG36 bodies. Please refer to page 45 for more information on Solid Inserts and to page 46 for a shop drilling worksheet. Order inserts and Cord Grip bodies separately.

3. Custom drilled or Custom Molded Inserts can also be supplied. For low to medium quantities, Altech will gladly drill custom holes into the inserts for you. If higher volumes are required, special molding tools may help to keep the cost down. Please challenge us to help you solve your problem.

To select the proper insert, determine the number and diameters of cables/cords to be installed, then choose the matching body in the material and color you prefer and any accessories (page 52). Order bodies, inserts and accessories separately.

- IP65 (NEMA 1, 2, 3, 3R, 5, 12, 13).
- PG standard.
- Brass, Nickel Plated (BN) Cord Grips feature preinstalled Perbunan (PR) Seal Rings. Order Seal Rings separately for Polyamide (PA) Cord Grips if required. Please Refer to page 52.
- Standard color of body: Beige or Black Polyamide (PA) or Brass, Nickel Plated (BN).
- Insert color: White.
- Order Locknuts separately if required. Please refer to page 54.

#### Installation

To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

## HIGH PERFORMANCE PVC POLYVINYLCHLORIDE(PV) MULTI-CONDUCTOR INSERTS

Insert Technical and Ordering Information. Order Bodies Separately.

Sealing Insert Material **PVC Polyvinylchloride (PV)**

Sealing Insert Temperature Range **-20 to 80°C  
(-4 to 176°F)**

## HIGH PERFORMANCE PVC POLYVINYLCHLORIDE(PV) PREMOLDED MULTI-CONDUCTOR INSERTS

A wide variety of Premolded Inserts are available from stock with holes of identical or different diameters. Inserts are shown on pages 43 to 45. They have been organized by PG sizes as well as number and diameter of holes. To select the proper Cord Grip assemblies for your application, first determine the number and diameter of cables to be inserted through the Multi-Conductor Strain Relief(s). Next, select a suitable Insert from page 43 to 45, then select the body that matches the PG size of the selected Insert from page 42. Choose the body from Polyamide (PA) or Brass, Nickel Plated (BN) types, depending on your preference and environmental conditions expected. Spare holes should be plugged with Sealing Plugs (page 52) to obtain the rated protection level. Order Inserts (page 43 to 45), bodies (page 42) and any accessories (page 52) separately. Use the worksheet on page 46 when holes must be drilled. Use the same worksheet to communicate to Altech the quantity, diameter(s) and location of any holes you want us to drill or to order Custom Molded Inserts (a tooling charge may be required).

Metric to Inch Measurement Conversion  
Millimeters ÷ (25.4) = Inches  
Inches x (25.4) = Millimeters

## General Information

Use this worksheet to determine drill patterns or to communicate hole locations, quantity and diameters to Altech if you want us to drill holes for you (low to medium quantities) or, for higher quantities, to instruct us how to create a special molding tool to custom mold inserts for you.

Drill holes by using a standard high-speed steel drill bit of the proper size at approx. 800 RPM<sup>1</sup>. To facilitate drilling we recommend to cool the solid core inserts to 7°C (45°F). Drill holes with Insert installed into Cord Grip. See cutaway illustration below. Keep a distance of 1mm (.04 in.) between holes on all sides. However, the outside holes can be located right against the lip of the strain relief body (shown on top of cutaway illustration) as sufficient insert material remains between the hole and the body wall, due to the design of the Cord Grip.

The useable area of the various Cord Grip sizes is shown by PG size in mm and inches at a 1:1 scale. Please feel free to copy this worksheet and use the template to prepare your own drilling pattern or to communicate the pattern to Altech.

## Shop Drilling

- Slip Insert into Cord Grip.
- Tighten Pressure-Dome of Cord Grip prior to drilling.
- Place Cord Grip into vise.
- Drill holes.
- Cool drill bit with air or water if required.
- A tolerance of + 1 mm (0.04 in.) should not be exceeded to ensure proper sealing.
- Keep a distance of 1mm(.04 in.) between holes on all sides.

<sup>1</sup> Do not exceed 1,000 RPM as PVC Polyvinylchloride (PV) insert material might overheat and possibly melt.

## HIGH PERFORMANCE EMI / RFI

### Brass, Nickel Plated (BN)

Provide sealing and strain relief plus shielding against electromagnetic and radio frequency interference. For more information about EMI / RFI Cord Grips, please refer to page 26.

- IP68 (NEMA 1, 2, 3, 3R, 4, 4X, 5, 6, 12, 13) / 10Bar (140 psi).
- PG standard.
- Preinstalled Perbunan (PR) Seal Ring.
- Order EMI / RFI or regular Locknuts separately if required. Please refer to pages 26 for general information and page 54 for ordering.

<sup>1</sup> For installation into nonthreaded holes with Locknuts. For additional information please refer to the Installation Worksheet, page 55.

#### Installation

To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

# HIGH PERFORMANCE FLAT CABLE

## Polyamide (PA) and Brass, Nickel Plated (BN)

- IP 65 (NEMA 1, 2, 3, 3R, 5, 12, 13).
- PG standard.
- Brass, Nickel Plated (BN) Cord Grips feature preinstalled Perbunan (PR) Seal Rings. Order Seal Rings separately for Polyamide (PA) Cord Grips if required.
- Order Locknuts separately if required.
- Standard color of body: Beige or Black Polyamide (PA) or Brass, Nickel Plated (BN) if required.

### \*Tolerances

Minimum cable size should not be less than .5mm (.02 in.) in width and height than opening in Cord Grip.

**Installation**  
To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

---

Economy Liquid Tight Strain Reliefs (Cord Grips) are ideal for basic, straight-through applications. These Cord Grips seal cable/cord entries and prevent contaminants from entering into enclosures. They can be used with cables, cords, etc.

**Body Material**

- Polystyrene (PS)
- Brass, Nickel Plated (BN)

**Sealing Ring Material**

- Rubber (RU)

**Function**

- Straight-Through

**Protection Rating**

Up to IP54  
(NEMA 1, 2, 5, 12,13)

---

# ECONOMY

## ECONOMY STRAIGHT-THROUGH

### Polystyrene (PS) and Brass, Nickel Plated (BN)

- IP54 (NEMA 1, 2, 5, 12,13).
- PG standard.
- We recommend the use of Polyethylene (PE) Seal Rings with Polyamide (PA) and Perbunan (PR) with Brass, Nickel Plated (BN) Cord Grips. Order Seal Rings separately. Refer to page 52 for technical and ordering information.
- Order Locknuts separately if required. We recommend the use of Polyamide (PA) Locknuts with Polyamide (PA) Cord Grips and Brass, Nickel Plated (BN) Locknuts with Brass, Nickel Plated (BN) Cord Grips. Refer to page 54 for more information on Locknuts.
- Standard color: Light Gray Polystyrene (PS) or Brass, Nickel Plated (BN).

Temperature Ranges	
Body	Sealing Ring
Polystyrene (PS) -20 to 65°C (-4 to 149°F)	Rubber (RU) -20 to 80°C (-4 to 176°F)
Brass, Nickel Plated (BN) -40 to 300°C (-40 to 572°F)	Rubber (RU) -20 to 80°C (-4 to 176°F)

**Polystyrene (PS)  
with Rubber (RU) Sealing Ring**

**Brass, Nickel Plated (BN)  
with Rubber (RU) Sealing Ring**

(Polystyrene (RS) Cord Grip Shown)

<sup>1</sup> For installation into nonthreaded holes with Locknuts. Please refer to page 5 for installation instructions.

### Installation

To install, we recommend the use of Socket (Refer to page 53), Metric Open-end or Adjustable Wrenches. Please refer to column "E" in the Dimensions Table for sizes.

## ACCESSORIES

### Seal Rings - page 52

Provide an external seal between the Cord Grip body and the enclosure wall. Some Cord Grips have preinstalled Seal Rings. If the material of the preinstalled Seal Ring is not suitable for your application due to presence of chemicals, temperature or environmental conditions, choose a Seal Ring that will stand up to the expected environment.

Altech offers four different Seal Ring materials:

- Polyethelene (PE)
- Perbunan (PR)
- Silicone (SI)
- Centellen (CT)

### Sealing Plugs - page 52

Sealing Plugs are available to seal unused holes, ensuring strain relief and IP65 (NEMA 1, 2, 3, 3R, 5, 12, 13) protection rating.

### Socket Wrenches - page 53

We recommend the use of Socket Wrenches to install Cord Grips into enclosure walls. These Socket Wrenches are especially useful for high density installations. Please refer to page 53 for ordering information.

### Locknuts - page 54

Use Locknuts for installations of Cord Grips into nonthreaded holes. Polyamide (PA) Locknuts are typically used for nonmetallic Cord Grips. However, Brass, Nickel Plated (BN) and Stainless Steel (SS) Locknuts can be used as well with these Cord Grips, especially if the available thread length is short or space is limited.

Brass, Nickel Plated (BN) Locknuts are typically used with Brass, Nickel Plated (BN) Cord Grips and Stainless Steel (SS) Locknuts are typically used with Stainless Steel (SS) Cord Grips.

EMI / RFI Locknuts have a specific function. Please refer to page 26 for information about these Locknuts.

Ordering information can be found on page 54.

## Seal Rings

### Standard

Polyamide (PA):

- Sizes PG7 to PG21 and NPT 3/8" to 3/4" have Integral Sealing Ridges
- Sizes PG29 to PG48 feature preinstalled Perbunan (PR) Seal Rings.

### High Performance

Nonmetallic:

- Seal Rings not included - order separately if required.

Metal:

- Perbunan (PR) or Silicone (SI) Seal Ring are preinstalled depending on type. Refer to ordering pages.

### Economy

Polystyrene (PS) and Brass, Nickel Plated (BN):

- Seal Rings not included - order separately if required.

Polyethylene (PE) - Opaque

## Sealing Plugs

- Seal Unused Holes.
- Maintain Protection Rating of IP65 (NEMA 1, 2, 3, 3R, 5, 12, 13).

Sealing Plugs should be inserted into unused holes to maintain the rated seal and strain relief rating.

## Socket Wrenches

These metric tools are ideal for installing Cord Grips into enclosure walls and are especially useful for high density installations.

Numbers in the “**TYPE**” column refer to the “E” dimensions in millimeters stated throughout the catalog for all Liquid Tight Strain Reliefs and Locknuts. The “E” dimension is the width across the flats of Cord Grip bodies or Locknuts.

- Hardened steel, zinc plated.
- Movable handle.

# LOCKNUTS

Use Locknuts to install Cord Grips into nonthreaded holes

- PG, NPT standard.
- Metric available.
- Standard color: Light Gray and Black Polyamide (PA), Brass, Nickel Plated (BN) or Stainless Steel (SS).

**Polyamide (PA)**

**Brass, Ni Plated (BN)**

**Stainless Steel (SS)**

**EMI / RFI Brass, Ni Plated (BN)**

## INSTALLATION WORKSHEET FOR HIGH DENSITY APPLICATIONS

High density installation of Cord Grips is called for whenever a large number of cables or cords must be installed into an Enclosure, or the Enclosure is relatively small and a larger one can not be used.

By following some basic guidelines, multiple Cord Grips, even different sizes and materials, can be installed into a small area.

Before starting the layout, please make sure that the mechanical integrity of the Enclosure is not compromised. Also, make sure that the Locknuts and Cord Grips can be turned for fastening and that there is no interference with corners, walls and bottoms of the Enclosure or with installed items such as Mounting Plates, DIN Rails or other components.

In order to use Socket Wrenches (refer to page 53) or other tools to tighten the Cord Grips and Locknuts, a minimum clearance of "Y" (please see table below) must be maintained between the "tips" of the Cord Grips or Locknuts and Enclosure walls, bottoms, covers, etc. The same clearance must also be maintained (please see table below) between the "tips" of adjacent Cord Grips and/or Locknuts.

To help you determine the clearance required we provided the instructions and dimensional tables below:

### Instructions:

Determine the B dimensions for adjacent Strain Reliefs and Locknuts from the tables below. Please note that either the B dimension of the Strain Relief or the Locknut of any combination may be larger. Use the largest of both for the calculations outlined in the example below to determine X, the spacing between the centers of adjacent Mounting Holes.

Example: B1, a PG16 Polyamide (PA) High Performance Cord Grip has to be installed by using a PG16 Polyamide (PA) Locknut next to B2, a PG21 Polyamide (PA) Cord Grip with a PG21 Brass, Nickel Plated (BN) Locknut.

A) PG16 Polyamide (PA) Cord Grip: B = 30mm (1.18 in.)  
 PG16 Polyamide (PA) Locknut: B = 33mm (1.30 in.)  
 Result: The Locknut is larger, it's B dimension should be used for B1.

B) PG21 Polyamide (PA) Cord Grip: = 36.6mm (1.44 in.)  
 PG21 Brass, Nickel Plated (BN) Locknut = 35.5mm (1.40 in.)  
 Result: In this case the Cord Grip B dimension is larger and should be used for B2.

### Mathematical Spread

$$\text{Millimeters: } X = \frac{B1 + B2}{2} + Y \text{ mm} = \frac{33 + 36.6}{2} + 4.0 = 38.8 \text{ millimeters}$$

$$\text{Inches: } X = \frac{B1 + B2}{2} + Y \text{ in.} = \frac{1.3 + 1.44}{2} + .16 = 1.53 \text{ inches}$$

Thus, the minimum distance X between the center points of the Mounting Holes should be the 38.8 millimeters or 1.53 inches.

Repeat this calculation as many times as required. If Cord Grips are installed into Nonthreaded Holes use the "B" dimension of the Cord Grip, as no Locknuts are used.

If you prefer, prepare a drawing, showing the useable space available and draw circles with 1/2 the largest B dimension of any Cord Grip / Locknut combination, again maintaining the clearance of "Y" between the "tips" and "tips" to walls, bottoms, etc.

## Thank You

We hope this catalog has helped you in your selection of Liquid Tight Strain Reliefs. To learn more about other Altech products, please complete this form and fax it to us.

Name \_\_\_\_\_ Title \_\_\_\_\_

Company \_\_\_\_\_ Div./MS \_\_\_\_\_

Address \_\_\_\_\_

City \_\_\_\_\_ State \_\_\_\_\_ Zip \_\_\_\_\_

Phone (    ) \_\_\_\_\_ Fax (    ) \_\_\_\_\_

Please contact me to discuss my application.

Our product(s) are exported.  Yes  No

### My company is best classified as a(n):

- |  |   |
|--|---|
| <input type="checkbox"/> OEM               | <input type="checkbox"/> Systems Integrator |
| <input type="checkbox"/> End User/MRO      | <input type="checkbox"/> Distributor        |
| <input type="checkbox"/> Contractor        | <input type="checkbox"/> Consultant         |
| <input type="checkbox"/> Government/School | <input type="checkbox"/> Other _____        |

### My primary job function is:

- |   |  |
|---|--|
| <input type="checkbox"/> Product Design                   | <input type="checkbox"/> Sales/Marketing |
| <input type="checkbox"/> System Design                    | <input type="checkbox"/> Purchasing      |
| <input type="checkbox"/> Plant Operations/<br>Maintenance | <input type="checkbox"/> Other _____     |

### In my job, I

- |                                    |                                    |
|------------------------------------|------------------------------------|
| <input type="checkbox"/> Specify   | <input type="checkbox"/> Authorize |
| <input type="checkbox"/> Recommend | <input type="checkbox"/> Purchase  |

### Which best describes the end-product produced by your firm?

- |  |   |
|--|---|
| <input type="checkbox"/> Controls & Instrumentation      | <input type="checkbox"/> Electrical Machinery & Equipment |
| <input type="checkbox"/> Electronic Systems & Components | <input type="checkbox"/> Specialty Machinery & Equipment  |
| <input type="checkbox"/> Transportation Equipment        | <input type="checkbox"/> Other _____                      |

### Which industry(ies) does your company serve? (Please check all that apply)

- |  |   |   |  |  |
|--|---|---|--|--|
| <input type="checkbox"/> Aerospace         | <input type="checkbox"/> Automatic Vending  | <input type="checkbox"/> Agricultural       | <input type="checkbox"/> Automotive          | <input type="checkbox"/> Chemical Processing |
| <input type="checkbox"/> Commercial        | <input type="checkbox"/> Construction       | <input type="checkbox"/> Dairy              | <input type="checkbox"/> Defense/Military    | <input type="checkbox"/> Food Processing     |
| <input type="checkbox"/> Industrial & HVAC | <input type="checkbox"/> Industrial Process | <input type="checkbox"/> Machine Tool       | <input type="checkbox"/> Material Handling   | <input type="checkbox"/> Medical & Dental    |

### Please rush literature on products circled below:

#### TERMINAL BLOCKS

- 311 DIN Rail
- 312 Mini DIN Rail
- 313 Panel
- 314 Eurostrips
- 315 Busbar System
- 316 Ceramic
- 317 PCB - Fixed
- 318 PCB - Pluggable

#### CIRCUIT BREAKERS

- 341 Miniature
- 342 Motor Controllers
- 343 Earth Leakage
- 344 Power Busbars

#### SENSORS

- 411 Inductive Proximity
- 412 Capacitive Proximity
- 413 Photoelectric Proximity
- 414 Ultrasonic Proximity
- 415 Magnetic Proximity
- 416 Liquid Level Controls

#### OTHER

- 261 Foot Switches
- 251 Disconnect Switches
- 231 European Fuses
- 239 Power Semiconductors
- 271 Safety Devices
- 279 Timers, Monitoring Sensing Devices

#### ENCLOSURE PRODUCTS

- 371 Industrial
- 391 Electronic
- 381 DIN
- 361 Strain Reliefs

#### INTERFACES

- 319 Interface Modules
