

Disconnect and test terminals are an ideal choice for measuring control and regulatory circuits. The terminals provide a clear functional advantage for devices having utility instruments and associated transformers.

CKT4U and CKT4U/4 - disconnection is achieved by lifting the knife contact lever.

CKT4U/4 Terminal has standard screws on the upper level clamps and socket screws on the lower level clamps.

Specially designed socket head screws act as test/monitoring points in the CKT4U.

Important: The disconnecting device is not suitable for interrupting load. The supply must be switched off before operating the slide link/lever.
