**Amphenol Daeshin Korea**

## The Company

**Amphenol** Corporation is one of the world's largest designers, manufacturers and marketers of electrical, electronics and fiber optic connectors, interconnect systems and coaxial and flat-ribbon cable. The primary end markets for our products are in the fast growing segments of telephone, wireless and data communication systems; commercial and military aerospace electronics; cable television systems; automotive and mass transportation application; and industrial factory automation equipment.

**Amphenol Daeshin Electronics Precision Ltd ( ADS )**, located in Bucheon Korea, is a subsidiary of Amphenol corporation, a worldwide manufacturer and supplier of connector and interconnects products. We are supplying wide range of interconnect solution and design, manufacture, supply Mil-C-5015 style circular connectors. The primary end markets for ADS is Military, Aerospace and Industrial with full range of Amphenol product group.

## Amphenol Daeshin Korea

### Introduction

#### MS / Standard MIL-C-5015 Style Connector

Amphenol MIL-C-5015 connectors meet the latest performance requirements of MIL-C-5015.

These connectors represent well-proven electrical capability at an acceptable cost for most equipment where durability is important.

MIL-C-5015 features threaded coupling & single key & keyway polarization maximum simplicity in design.

Applications include industrial machines, military ground support equipment, ordnance & shipboard installation.

Amphenol MIL-C-5015 connectors are available in classes A, B, E/F, R, and also offers a range of pre-earth connectors.

Therefore, you will always find the right connector in Amphenol, with us, for conditions & performance requirements you may have.

#### ADGC Series(Bayonet Coupling Connectors)

The connectors presented in this catalog are identified as ADGC.

They are used principally in the transit rail industry and heavy applications;

Their main characteristic is the fast and precise coupling of the receptacle and plug connectors.

Three bayonet ramps on the receptacle allow for the fast and perfect mating with only a one quarter turn of the coupling nut.

ADGC Bayonet coupling connectors in accordance with VG95234.

They withstand exposure to moisture, oil and vibration.

Bayonet lock coupling.

ADGC series connectors meet the performance required for subway coupler applications.

#### AMHTC Series(Amphenol High Tension Connectors)

Amphenol "AMHTC" , high tension connector series for railway vehicle installable power distribution systems, offers the ultimate in safety and reliability under the most severe operating conditions.

The AMHTC series connectors allow the user to connect electrical equipment quickly with ultimate safety.

AMHTC is available in two standard formats, which allow complete hook up through the standard daisy chain principle.

# Amphenol Daeshin Korea

## Introduction

By taking advantage of the expertise in connector production, we upgraded our capability to support railway requirements.

Currently our major railway parts are inter-vehicle jumpers for power and/or signal transmission, junction boxes and harness for traction motor.

We possess designing/engineering capability and resources to satisfy the requirements of railway customers and even those of railway operators.

We not only produce and supply those products but we also participate in designing stage with customer and provide optimal interconnection solution.

We have completed various railway projects with our own design and we are ready to propose reliable solution.

## Amphenol MIL-C-5015 Connectors

### MS General Information, Class Designations

#### DESIGN CHARACTERISTICS

- Medium to heavy weight cylindrical
- Durable, field-proven design
- Environmental resistant
- Resilient inserts
- Operating voltage to 3000 VAC (RMS) at sea level
- Threaded couplings
- Single key / keyway shell polarization
- Cost effective

#### CUSTOMER OPTIONS

- Five shell styles
- Fourteen shell sizes
- Five class designations
- Alternate insert positioning
- Zinc alloy plating (cadmium-free) available

**MS connectors** meet the latest performance requirements of MIL-C-5015.

These connectors represent well proven electrical capability at an acceptable cost for most equipment where durability is important.

MIL-C-5015 features threaded couplings and single key/ keyway polarization, representing maximum simplicity in design.

Applications include military ground support equipment, ordnance and shipboard installations.

Amphenol Industrial Operations manufactures five classes of connectors to meet different requirements.

Class designations and brief descriptions are listed below.

**A** - Solid Shell - for general, non-environmental applications.

**B** - Split end bell, for general, non-environmental applications.

**E/F** - Environmental Resisting with Strain Relief-designed for applications where the connector will be exposed to moisture, vibration, and rapid changes in pressure and temperature.

**R** - Lightweight Environmental Resisting-shorter in length and lighter in weight than the E and F classes, the MS-R offers a high degree of reliability under adverse conditions: recommended for new design applications.

**MS/Standard  
A,E(F),R Class**

# Amphenol MIL-C-5015 Connectors MS-A Class

Wall Mounting Receptacle

Cable connecting Receptacle

Box Mounting Receptacle

Straight Plug

Right Angle Plug

## MS-A

MS-A class connectors perform many of the virtual functions in powering, testing and ground support system. Class A applications include communication equipment, computers and shipboard installation where mechanical forces and physical parameters are not subject to extreme or rapid environmental changes.

## Shells:

Shell components are fabricated from high grade aluminum alloy.

Electrically Zinc plate finish with an olive drab chromate after treatment offers corrosion resistance.

## Contacts:

Pins and sockets are machined from copper alloy with silver plated finish.

Size 16 and 12 socket contacts incorporate a closed entry design.

## Inserts:

Inserts are resilient synthetic rubber, offering high dielectric strength, high arc resistance to vibration.

Proprietary design permits pressurization of either pin or socket insert.

# Amphenol MIL-C-5015 Connectors

## MS3100A

### Wall mounting receptacle

MS3100A wall mounting receptacles are used with the MS3057 cable clamp or with conduit to eliminate need for the conduit box in applications where wires are carried thru walls or bulkheads.

## MS3102A

### BOX Mounting Receptacle

(Available with Plastic or Rubber insulators)

MS3102A box mounting receptacles are used on boxes and equipment cases where no cable support is required.

Wall Mounting Receptacle

Cable connecting Receptacle

Box Mounting Receptacle

Straight Plug

Right Angle Plug

These MS connectors satisfy all the performance requirements of MIL-C-5015 and are recommended for conditions where vibration, moisture, pressure and/ or temperature and extreme. Strain relief is supplied on most shell sizes.

**Shells:**

Shell components are fabricated from high grade aluminum alloy.

The standard hardware plating is electrically zinc plated finish with an olive drab chromate after treatment for corrosion resistance.

Consult Amphenol Daeshin for other plating options.

**Contacts:**

Contacts are silver plated copper alloy for maximum corrosion resistance, maximum current carrying capacity and low millivolt drop.

Size 16 and 12 socket contacts incorporate a closed entry design.

**Inserts:**

Inserts are resilient synthetic rubber, offering high dielectric strength, high arc resistance arc resistance to vibration.

Proprietary design permits pressurization of either pin or socket insert.

**Strain relief clamp:**

Strain relief clamp minimizes tension at the solder well connection and provides a positive mechanical moisture seal.

Complete field serviceability is possible with the strain relief clamp.

Wall Mounting Receptacle

Cable connecting Receptacle

Box Mounting Receptacle

Straight Plug

Right Angle Plug

Specification requirements for greater reliability in a shorter, lighter weight environmental resistant connector led to the design of the MS-R.

These low profile assemblies were attained by moving the axial compression nut and grommet assembly forward and flash with the rear of the insert.

The silicon rubber grommet, with its low coefficient of friction, assures easier threading of wire bundles and quicker assembly and serviceability of the unit.

Molded webs in each wire hole insure a moisture barrier around each wire.

The addition 'O'ring at the main joint of all MS3106R plugs provide a main joint seal supplementary to interfacial seal, thus insuring of higher degree of reliability when connectors halves from different sources are employed.

MS-R types are recommended for new design applications.

#### Shells:

Shell component are fabricated from high grade aluminum alloy. All components have the standard electrically zinc plated finish with an olive drab chromate after treatment for corrosion resistance. Consult Amphenol Daeshin for other plating options.

#### Contacts:

Contacts are machined from copper alloy for maximum current carrying capacity and low millivolt drop.

#### Inserts:

Resilient synthetic rubber insert provide an outstanding moisture barrier, maximum vibration resistance and high dielectric strength. Either pin or socket insert can be pressurized.

## MS3106R

### Straight Plug

MS3106R straight plugs are identical in purpose to the MS3106F.  
The MS3106R has the shorter endbell.

## MS3108R

### Right Angle Plug

MS3108R Right angle plugs are used where there is limited space and where wires must be brought at abrupt angles.

### Accessories

Plug Protection Cap

Receptacle Protection Cap

Cable Clamp

Telescoping Bushing

Sealing Gasket

#### Protection Caps

These metal dust caps are used to protect the plugs and receptacles. They are furnished with sash chains and are available with bead chains.

#### MS3057 Cable Clamp

MS3057 style cable clamp was designed for use with jacketed cable or wire protected by tubing. Both clamping halves float maximum strain relief. For unjacketed cable or wires, Use corresponding MS3420 telescoping bushing. Telescoping bushings keep dirt, oil and moisture out of end bell.

#### Sealing Gasket

Sealing Gasket is being supplied separately

# Amphenol MIL-C-5015 Connectors MS Basic Construction

Amphenol MIL-C-5015 connectors meet the latest performance requirements of MIL-C-5015. These connectors represent well-proven electrical capability at an acceptable cost for most equipment where durability is important. MIL-C-5015 features threaded coupling & single key & keyway polarization representing maximum simplicity in design. Applications include industrial machines, military ground support equipment, ordnance & shipboard installation. Amphenol MIL-C-5015 connectors are available in classes A, B, E/F, R, and also offer a range of pre-earth connectors. Therefore, you will always find the right connector in Amphenol, with us, for conditions & performance requirements you may have.

Cable Connecting Receptacle

Box mounting Receptacle

Straight Plug

Right Angle Plug

**MS-B class** connector is a general duty standard cylindrical connector. It is a widely used for the automotive machine tool & welding industries, as well as numerous other commercial applications, mechanical forces and physical parameters not subject to extreme or rapid environmental changes [UL](#), approved.

**Shells:**

Shell components are split endbell and fabricated from high aluminum alloy. Electrically zinc plate finish with an olive drab chromate after-treat offers corrosion resistance.

**Contacts:**

Pins and sockets are machined from copper alloy with silver plated finish. Size 16 incorporate a closed entry design.

**Inserts:**

Inserts are plastic, offering high dielectric strength, high arc resistance to vibration proprietary design permits pressurization of either pin or socket

# Amphenol MIL-C-5015 Connectors

## MS3101B

### Cable Connecting Receptacle

MS3101B split endbell cable connecting receptacles are used for cable extension requirements where mounting provisions are unnecessary.

## Amphenol MIL-C-5015 Connectors

### DL Series

#### Pre-earth type

Box mounting Receptacle

Straight Plug

Right Angle Plug

**DL Series** are highly reliable circular connectors (wire soldering type) approved by TÜV satisfying European safety standards and UL standards.

They feature IP67 class water and dust proof, when mated and a protective earth circuit with first mate break grounding contacts.

They are ideal for use in machine tools, robots, and other industrial machines. Compatible with MS connector.

#### **Shells:**

Shell components are fabricated from high grade aluminum alloy. Electrically zinc plate finish with a black chromate after treatment offers corrosion resistance.

Consult Amphenol Daeshin for other plating options.

#### **Contacts:**

Pins and sockets are machined from copper alloy with silver plated finish. Size 16 and 12 socket incorporate a closed entry design.

#### **Insulators:**

Front inserts are Silicone rubber and Rear inserts are PPS resin for box mount receptacle only. and also straight & right angle plug's insert is PPS resin.

### Accessories Dimension

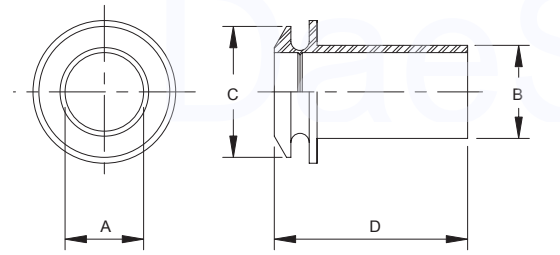

#### Cable Clamp DL3057

Part Number	Size	Ø A	B	Ø C	D	I Thread-2B
DL3057-4A	10SL	6.0	20.3	23.3	53.3	5/8-24 NEF
DL3057-10A	18	14.0	23.6	32.2	54.4	1-20 NEF
DL3057-12A	20,22	15.9	23.6	37.8	57.3	1 3/16-18 NEF
DL3057-16A	24	18.0	26.0	43.4	56.4	1 7/16-18 NEF

DL3057 style cable clamp was designed for use with jacketed cable or wire protected by tubing. Both clamping halves float maximum strain relief. for unjacketed cable or wires, use corresponding DL3420 telescoping bushing. To order clamp without bushing, add -1 to the P/N.

#### Telescoping Bushing DL3420

Part Number	Size	Ø A Max	Ø B Max	Ø C	D
DL3420-4	10SL	6.0	7.7	12.0	47.5
DL3420-10	18	14.0	15.6	20.7	52.2
DL3420-12	20,22	15.9	18.8	24.5	52.3
DL3420-16	24	18.0	23.6	30.0	56.0

Telescoping grand bushings (used with 3057 clamp) keep dirt, oil and moisture out of endbell. Taping or wrapping wires is eliminated since bushing protects wires going thru clamp. Combinations of bushing may be used to decrease cable entry diameter to improve sealing.

**Bayonet Coupling -  
Connector  
ADG, ADGC Series**

## Amphenol MIL-C-5015 Connectors ADG, ADGC Series

**ADG Bayonet coupling connectors** in accordance with VG95234, well known as Amphenol ADG bayonet connectors, are basically MIL-C-5015 type connectors. They withstand exposure to moisture, oil and vibration. Bayonet lock coupling. ADG series connectors meet the performance most subway coupler applications.

**Shells:**

- Five shell styles
- Fourteen shell sizes
- Solder or crimp contacts, sizes 16-0 accepting 22-0 AWG.
- Five class designations
- Alternate insert positioning

**Contacts:**

- Pins and sockets are machined from copper alloy with silver plated finish.
- Size 16 and socket contacts incorporate a closed entry design.

**Insulators:**

- Inserts are resilient synthetic rubber for ADG series, and chloroprene rubber for ADGC series offering high dielectric strength, high arc resistance arc to vibration.
- Proprietary design permits pressurization of pin or socket insert..

## ADG, ADGC Series

### Characteristics

#### 1. Material characteristics

<b>Shell</b>	Aluminium or Aluminium alloy	Indicated for indoor and outdoor not particularly heavy application.
<b>Insulator</b>	Synthetic rubber Plastic with silicon gasket	Under 36 size shell / Synthetic rubber. Over 48 size shell / Plastic with silicon gasket.  Fire resistant & temperature range -40°C to 125°C
<b>Contact</b>	Copper alloy	Silver or gold plating.
<b>Durability</b>	500 Cycle connection/Disconnection	

#### 2. Contact arrangement service rating & Dielectric strength

Service rating	MIN.Flashover AC(rms)	Test voltage AC(rms)*	Operating voltage	
			AC	DC
Inst	1,400V	1,000	200	250
A	2,800V	2,000	500	700
D	3,600V	2,800	900	1,250
E	4,500V	3,500	1,250	1,750
B	5,700V	4,500	1,750	2,450
C	8,500V	7,000	3,000	4,200

\* According to Mil-C-5015

The connectors do not show any signs of breakdown when the test voltage indicated in the table is applied for one minute between the two closets contacts and between the shell any of the contacts to the shell.

#### 3. Electrical data

Size	MAX.Current*	Test current DC A	MAX.Voltage drop** (mV)
#16	22A	13A	74
#12	41A	23A	65
#8	73A	46A	63
#4	135A	80A	58
#0	245A	150A	53
#4/0	450A	350A	53

\* Applicable for short time.

\*\* Accordibg to MIL-C- 39029D, Test with nickel-plated wire.

# Amphenol High Tension Connectors AMHTC Series

## 1. Introduction

Amphenol “AMHTC” high tension connector series for railway vehicle installable power distribution systems, offers the ultimate in safety and reliability under the most severe operating conditions.

The AMHTC series connectors allow the user to connect electrical equipment quickly with ultimate safety.

AMHTC is available in two standard formats, which allow complete hook up through the standard daisy chain principle.

## 2. Features

- Dead front contacts: An insulated tip on the contact element prevents accidental touching of current carry parts. Both the male and female contacts are protected.
- Super High impact Insulators: High impact, flame retardant thermoplastic insulators prevent impact and abrasion damage through continued use in harsh environment applications and also guarantee a high degree of insulation, with maximum resistance to oil, acids and water.
- Water proof when mated: Sealing is guaranteed through IP rated interfacial and cable gland compression seals. Connectors when mated are rated at up to IP67.

Item	Material	Finish	Remarks
Shell	Plastic	-	Fire resistant -30~125°C
Contact	Copper alloy	Sliver Plating	-

## 4. Technical Data

Item	High Lock		Low Lock
	AMPF, AMLM	HLPF, HLLM	SLPF, SLLM

## The Company

Amphenol Corporation is one of the world's largest designers, manufacturers and marketers of electrical, electronics and fiber optic connectors, interconnect systems and coaxial and flat-ribbon cable. The primary end markets for our products are in the fast growing segments of telephone, wireless and data communication systems; commercial and military aerospace electronics; cable television systems; automotive and mass transportation application; and industrial factory automation equipment.

Amphenol Daeshin Electronics Precision Ltd ( ADS ), located in Bucheon Korea, is a subsidiary of Amphenol corporation, a worldwide manufacturer and supplier of connector and interconnects products. We are supplying wide range of interconnect solution and design, manufacture, supply Mil-C-5015 style circular connectors. The primary end markets for ADS is Military, Aerospace and Industrial with full range of Amphenol product group.
