

Magnetic rotary angle and position sensor-control.

Through-hole contactless sensor.

MTS-360PCB

Designed with the sensor directly mounted onto a PCB, the innovative MTS-360 Sensor/PCB Combo package allows engineers to easily mount a fully featured rotary sensor without first having to design a printed circuit board for the sensor. The result is time-savings and convenience.

The MTS-360 Sensor/PCB assembly is available with or without 2.54 mm pitch connector, both easily secured with standard M3 screws. The entire assembly measures just 35mm wide by 36mm long, allowing for applications with tight packaging constraints.

The new MTS-360PCB Mechanical Mount sensor model incorporates all the breakthrough sensor technology performance features of the original MTS-360 by merging a through-shaft design with 360° absolute position feedback in a small size package. The result is an extremely small fully featured rotary sensor with reliability up to 50 million cycles. The MTS-360 relies on patented Hall effect technology to enable true non-contacting through-hole shaft sensing now using a simple three eared mounting. The standard model features a 4mm double D-flat through-hole and (3) slotted mounting holes allowing final rotational adjustment at assembly.

Mechanical specifications

Rotational life (depends on application and mounting)		up to 50.000.000 cycles.
Operating temperature ¹	with connector	up to -40°C to +105
	without connector	up to -40°C to +125°C
Sealing ¹		IP50

Electrical specifications

Linearity ^{1,2}	±1% absolute (±0.5% check availability).	
Angular range	Programmable from 15 to 360 degrees (without dead band).	
Output	Analog (Ratiometric), PWM, Serial Protocol.	
Switch output	Yes, programmable.	
Angular Resolution (depends on electrical angle and rotational speed)	Analog & PWM: up to 12 bits.	
	Serial Protocol (SPI): up to 14 bits.	
Supply voltage ¹	5V ±10%	
Supply current	Typ 8.5mA for single version. Typ 17mA for redundant version.	

¹ Others check availability.

² Ferromagnetic materials close to the sensor (i.e. shaft, mounting surface) may affect the sensor's linearity. Please contact Piher for advise.

Key features

- Simple & robust magnetic design.
- Low profile.
- Endless rotation.
- Two programmable switch outputs (6 pin version).
- Programmable Linear Transfer Characteristic:
(some positive slopes & one negative slope can be programmed in the same transfer characteristic;
up to 4 programmable points; see last page).
- Self-diagnostic features.
- Over voltage protection and reverse voltage protection.
- Shaft insertable from both sides.

Also upon request:

- True full redundant version.

Applications

- Non-Contacting long life angle/position sensor.
- Absolute rotary position sensor
- Pedal position Sensor.
- Optical imaging stabilization.
- Biomedical devices.
- Optical zoom devices.
- Consumer electronics.
- HVAC systems.
- Automotive control systems.
- Marine controls.
- Fork lift trucks.
- Farm equipment.
- Sports and recreational equipment.
- Unmanned vehicles and aircraft.
- Industrial vehicles.
- Instrumentation.
- Valve position sensors.
- Robotic and automation feedback system.

Piher Sensors & Controls SA

Magnetic rotary angle and position sensor-control.

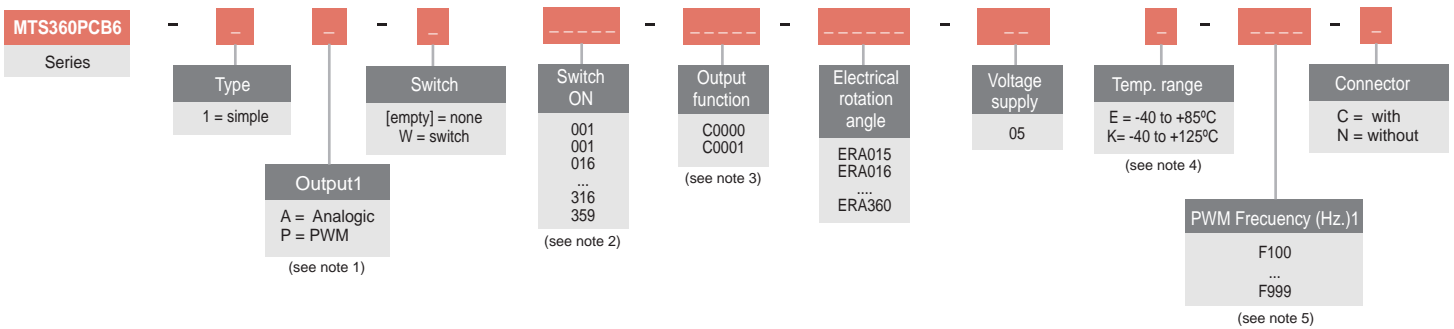

Through-hole contactless sensor. MTS-360PCB

How to order.

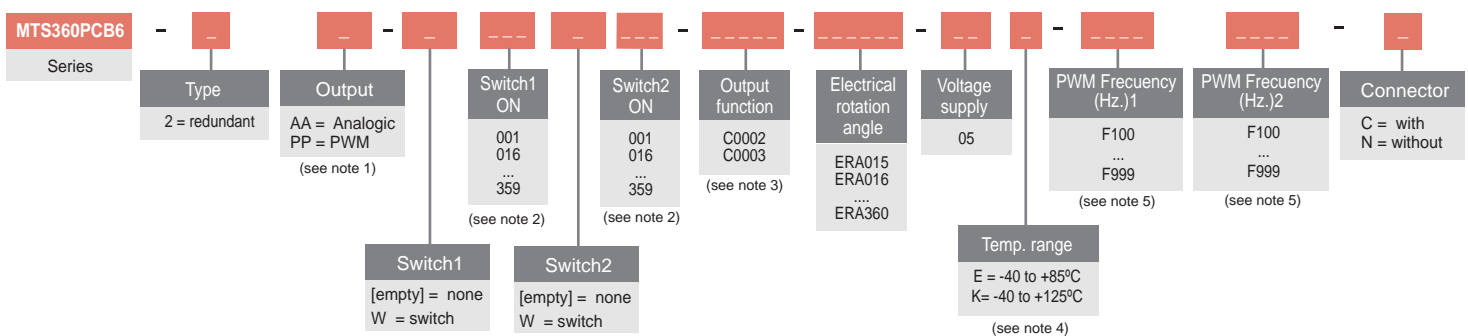

3 pin version - Simple output (analogic / PWM)

6 pin version - Simple output (analogic / PWM)

6 pin version - Redundant output (analogic / PWM)

Other product configurations will be studied case by case.

(1) The analog output is a ratiometric output, proportional to input supply voltage.

(2) Leave empty if no applicable.

Switch function diagram:

Positive slope

Negative slope

(3) Other output functions available check availability. In the How To Order reference, enter CXXXX meanwhile the new output function reference is not defined.

(4) If "with" connector, then K is limited to +105°C

(5) Leave empty if no applicable. Default frequency is 200 Hz

Notes

Piher Sensors & Controls SA

Our product competencies and services:
Potentiometers | Position / angle sensors | Rotary switches | Incremental encoders
Printed circuit resistors | Mechatronics | Value added assemblies

Magnetic rotary angle and position sensor-control.

Through-hole contactless sensor. MTS-360PCB

Options

- Special outputs slopes and protocols.
- Full redundant version with switches.
- Energy harvesting versions.
- Fast versions.
- Connectors.
- IP sealing.
- Shaft interfaces.
- Contact the factory for other options.

Mounting instructions.

Electronic semiconductor products are sensitive to Electro Static Discharge (ESD).

Always observe Electro Static Discharge control procedures whenever handling semiconductor products.

By default this sensor is programmed at the factory using a ferromagnetic actuator. If your application's actuator/shaft is not ferromagnetic please let us know before ordering.

Connections scheme.

Disclaimer

Ferromagnetic parts close to the sensor, including the shaft, may modify the performance of the sensor. Therefore, this has to be communicated to Piher for prior analysis.

No external magnetic perturbations are considered on the application where the sensor is mounted. If so, amplitude and direction of flux density generator type and characteristics (magnet, cable, motor...) must be notified to Piher.

The product information in this catalogue is for reference purposes. Please consult for the most up to date and accurate design information.

Piher Sensors & Controls S.A., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Piher"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained herein or in any other disclosure relating to any product described herein.

Piher disclaims any and all liability arising out of the use or application of any product described herein or of any information provided herein to the maximum extent permitted by law. The product specifications do not expand or otherwise modify Piher's terms and conditions of sale, including but not limited to the warranty expressed therein, which apply to these products.

No licence, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Piher.

The products shown herein are not designed for use in medical, life-saving, or life-sustaining applications unless otherwise expressly indicated. Customers using or selling Piher products not expressly indicated for use in such applications do so entirely at their own risk and agree to fully indemnify Piher for any damages arising or resulting from such use or sale. Please contact authorised Piher personnel to obtain written terms and conditions regarding products designed for such applications.
