

## MECHANICAL SPECIFICATIONS

- Mechanical rotation angle:
- Electrical rotation angle:
- Torque:
$220^{\circ} \pm 20^{\circ}$
0.4 to 2 Ncm . (0.6 to 2.7 in-oz)
- Stop torque:
- Life*:
$>5 \mathrm{Ncm}$. (>7 in-oz)
Up to 10 K cycles

## PTC-10 <br> 10 mm Cermet Potentiometer

## FEATURES

- Cermet resistive element.
- IP54 protection according to IEC 60529.
- Plastic material according to UL94V-0.
- Alumina substrate.
- Also upon request:
- Low torque version.
- Available as SPDT switch.
- Laser trimming for tighter tolerances.
- Wiper positioned at initial, $50 \%$ or fully clockwise.
- Supplied in magazines for automatic insertion.
- Long life model for low cost control applications.
- Special tapers.
- Mechanical detents.

## ELECTRICAL SPECIFICATIONS

- Range of values*:
$100 \Omega \leq \mathrm{Rn} \leq 5 \mathrm{M}$ (Decad. 1.0-2.0-2.2-2.5-4.7-5.0)
- Tolerance*: $\quad 100 \Omega \leq \operatorname{Rn} \leq 1 \mathrm{M} \Omega \ldots+. . \pm 20 \%$
$1 \mathrm{M} \Omega<\mathrm{Rn} \leq 5 \mathrm{M} \Omega \ldots-\ldots \pm 30 \%$
- Max. Voltage: 200 VDC (lin) 100 VDC (no lin)
- Nominal Power $70^{\circ} \mathrm{C}\left(158^{\circ} \mathrm{F}\right)$ (see power rating curve) 0.33 W (lin) 0.17 W (no lin)
- Taper* (Log. \& Alog. only Rn $\geq 1 \mathrm{~K}$ ) Lin ; Log; Alog.
-Residual resistance*: $\leq 0.5 \% \operatorname{Rn}(5 \Omega \mathrm{~min}$.)
-Equivalent Noise Resistance: $\leq 3 \% \operatorname{Rn}(3 \Omega \mathrm{~min}$.)
- Operating temperature: standard: $-40^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+194^{\circ} \mathrm{F}\right)$ upon request: $-40^{\circ} \mathrm{C}$ to $+120^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+248^{\circ} \mathrm{F}\right)$
* Others check availability

HOW TO ORDER

NOTES:
(1) "Z" adjustment only available on "H" versions. Rotor "G" only available in purple (shaft/rotor colour "VI").
(2) Terminal styles: "P" \& "J" are crimped terminals. V=Vertical adjust; H=Horizontal Adjust
(3) Value Example: Code: $101=100 \Omega$

Numb of zeros
$\rightarrow$ First two digits of the value. $000=\mathrm{CM}:$ SPDT switch $45^{\circ}$
(4) Non standard tolerance, check Example: $+7 \%$ Code: 0705
(5) - Standard $=1000$ cycles $\cdot$ Long $=10 \mathrm{~K}$ cycles $-5 \% \quad \square \quad$ negative tolerance

Others check availability. $\longrightarrow$ positive tolerance
(6) Magazines: not available with the H10, V05 and V13 models, nor with adjustment types $\mathrm{X}, \mathrm{W}, \mathrm{Y}, \mathrm{Z}$. Non flammable: housing, rotor and shaft.
(7) Colour shaft/rotor: - Potentiometer without shaft: only rotor • Potentiometer with shaft: only shaft
(8) Low Torque: $\leq 1 \mathrm{Ncm}$

No detent option available for low torque models.
(9) If you want to use your own custom plastic shaft/knob/actuator please contact Piher for advice about compatible materials.

HOW TO ORDER CUSTOM DRAWING

## STANDARD OPTIONS

| Detents | None |
| :---: | :---: |
| Packing | Bulk |
| Rotor colour | Natural |
| Shaft colour | Natural |
| Wiper position | Initial |
| Torque | Standard |
| Life | 1000 cycles |

## ROTORS

Rotors (Default delivery is at initial position. Wipers are shown positioned at $50 \%$ for the picture)

Without shaft or knob.

## MOUNTING METHODS

V = horizontal mounting - vertical adjustment

## V11

$H=$ vertical mounting - horizontal adjustment

V13

## DETENT CONFIGURATIONS EXAMPLES

This innovative PT's with detents family has been specifically developed to allow the integration of otherwise large and expensive external mechanisms into the body of the majority of the $10 \& 15 \mathrm{~mm}$.
PS/PT/PTC potentiometer series thus allowing a high range of configurations: special tapers, torque, tolerances, linearity, cut track, etc.

This detent design not only adds a "click" sensation of position, but also offers enormous savings in both cost and space for any given application.

Strong and weak detents can be mixed as per customer's request.

Detent number and positions can be made or fitted to the customer needs or preferences.

- Relative detent positions along the total mechanical travel.
Unless otherwise specified the detents are evenly spaced (using the end points as reference)

## NOTES FOR DETENTED VERSIONS:

(1) Detents not available for V05 mounting.

These cases are studied individually.
(2) For more than 10 detents versions please contact your nearest PIHER authorised distributor.
(3) Standard mechanical life is 500 cycles.
(4) Long life versions are available under request and have the following characteristics at $\mathrm{T}^{\mathrm{a}}$ :

- Potentiometers with 1 to 3 detents: up to 10K cycles
- Potentiometers with 4 and more detents: up to 5 K cycles
(5) Detent torque can vary from 1.2 to 2.5 times the standard potentiometer torque.
(6) Please consult your nearest Piher supplier if unique non-overlapping values at each detent position or LOG/ALOG tapers are required.
(7) Different output voltage values can be matched at each detent position (upon request).

Detents detail.

## STEPPED OUTPUTS

Constant value zones can be combined with strategically located stops matching the flat areas of the output. If you require this feature, please, send us your requirements to sales@piher.net

Stepped outputs version example (10 steps version):

Improved repeatability

By combining the constant value zones with the detents, engineers can align the same voltage values with each of the detent stops when rotating the control both forward and backward.

This provides clear mechanical positions that are not only repeatable, but perfectly aligned electrical outputs at each of the (detent) angles.

Piher's detents also prevent output values from changing due to vibration or accidental rotor movements, furthering reliable control consistency.

PIHER's potentiometers can feature special stepped outputs or 'constant voltage zones' for the 10 mm and 15 mm product families.

These constant voltage zones can be combined with PIHER's mechanical detents to provide exact alignment between the electrical output (flat areas) and the mechanical detent position. The result is a higher level of precision in controlling lighting, temperature, motor or other electronic control systems.

In addition to established catalogue detent configurations, we will design and manufacture any other configuration on our tried-andtested carbon/cermet \& THM/SMD potentiometer technology and processes.

With its precise control capabilities, our 10 mm and 15 mm potentiometers series are well suited for many consumer applications such as lighting (dimmers), power hand tools, relays, timers and HVAC systems.

## RECOMMENDED CONNECTIONS

Piher potentiometer's recommended connection circuit for a position sensor or control application. (voltage divider circuit electronic design).
