

Evaluating the [ADN4651/ADN4652](#) 5 kV RMS, 600 Mbps LVDS Isolator (SOIC_W)

FEATURES

Isolated ground planes (logic side and bus side)
Convenient connections through SMA terminals
3.3 V or 2.5 V power on Side 1 (V_{IN1}/V_{DD1}) and Side 2 (V_{IN2}/V_{DD2})
Ground on Side 1 (GND_1) and Side 2 (GND_2)
LVDS input signals: D_{IN1+} , D_{IN1-} , D_{IN2+} , D_{IN2-}
LVDS output signals: D_{OUT1+} , D_{OUT1-} , D_{OUT2+} , D_{OUT2-}
Jumper-selectable supply power of 3.3 V or 2.5 V
Termination resistors on all LVDS drivers/receivers

EVALUATION KIT CONTENTS

[EVAL-ADN4651EB1Z](#) or [EVAL-ADN4652EB1Z](#) evaluation board

DOCUMENTS NEEDED

[ADN4650/ADN4651/ADN4652](#) data sheet

EQUIPMENT NEEDED

Signal generator
Oscilloscope

GENERAL DESCRIPTION

The [EVAL-ADN4651EB1Z](#) and [EVAL-ADN4652EB1Z](#) allow quick and easy evaluation of the [ADN4651/ADN4652](#) low-voltage differential signalling (LVDS) isolator without the need for external components. The [ADN4651/ADN4652](#) employ Analog Devices, Inc., *iCoupler*® technology to combine a 2-channel isolator with an LVDS receiver and driver into a single, 20-lead wide body SOIC package. They are capable of running at data rates of up to 600 Mbps with very low jitter.

The evaluation board has separate ground and power planes for each side of the isolator. This separation enables the evaluation of the [ADN4651/ADN4652](#) with galvanic isolation between both sides of the device. Jumper-selectable power supplies at 3.3 V or 2.5 V are required on each side of the [ADN4651/ADN4652](#). Using an on-chip LDO, 2.5 V can be provided from an external 3.3 V power supply.

Complete information about the [ADN4651/ADN4652](#) is available in the [ADN4650/ADN4651/ADN4652](#) data sheet, which should be consulted in conjunction with this user guide when using the evaluation boards.

EVALUATION BOARD CONFIGURATION

SETTING UP THE EVALUATION BOARD

On the [EVAL-ADN4651EB1Z/EVAL-ADN4652EB1Z](#), power supplies are configured using Jumpers P4 and P7 (see Table 1) and connected to the J9 and J10 SMA connectors (see Table 2 and Table 3). A 3.3 V power supply can be applied to Side 1 and/or Side 2 of the [ADN4651/ADN4652](#) by removing Jumpers P4 (Side 1) and P7 (Side 2). If a 2.5 V supply is connected to the board, the relevant jumper must be inserted (P4 for Side 1 and P7 for Side 2). At 300 MHz with a load resistance of 100 Ω , the maximum operating current from each power supply is 90 mA.

When using a 3.3 V power supply, V_{IN1} and V_{DD1} (Pin 1 and Pin 3 on the [ADN4651/ADN4652](#)) are bypassed to GND_1 using 1 μ F capacitors. V_{IN2} and V_{DD2} (Pin 20 and Pin 18 on the [ADN4651/ADN4652](#)) are bypassed to GND_2 using 1 μ F capacitors. When using a 2.5 V power supply, V_{IN1} or V_{IN2} is connected directly to V_{DD1} or V_{DD2} by shorting Jumpers P4 or P7, respectively. Both V_{DD1} pins are also bypassed to GND_1 with 0.1 μ F capacitors. Both V_{DD2} pins are also bypassed to GND_2 with 0.1 μ F capacitors.

An example operation of the [EVAL-ADN4651EB1Z](#) is shown in Figure 5 (signal generator and oscilloscope connections are reversed for [EVAL-ADN4652EB1Z](#), per Table 2 and Table 3). SMA connectors expose all LVDS inputs and outputs for the [EVAL-ADN4651EB1Z](#), but are reversed for the [EVAL-ADN4652EB1Z](#) (see Table 2 and Table 3). Connect a signal generator to the board using the J1 and J2 connectors and set up a 300 MHz square wave clock with an amplitude of 350 mV and an offset of 1.2 V. Connect the oscilloscope directly to the J5 and J6 connectors to perform timing measurements including propagation delay and skew. Precision measurements, for example, jitter, using a differential probe requires attaching the probe at the R7 or R3 resistors and potentially cutting the traces to the connectors to minimize reflections.

A plot of the oscilloscope connected via the J5 and J6 connectors is shown in Figure 3. Channel 3 (green) and Channel 4 (purple) show the J5 and J6 connectors separately (single-ended) with the differential signal (orange).

Operation of the second isolated LVDS channel is shown in Figure 4. In contrast to Figure 5, the oscilloscope now connects via the J3 and J4 connectors and the signal generator connects to the J7 and J8 connectors. Channel 3 (green) and Channel 4 (purple) show the J3 and J4 connectors separately (single-ended) with the differential signal (orange).

EVAL-ADN4651EB1Z Connector	EVAL-ADN4652EB1Z Connector	Description
J9	J9	Power supply, 3.3 V (Jumper P4 open) or 2.5 V (Jumper P4 closed)
J1	J3	D_{IN1+} , noninverted LVDS input for Channel 1
J2	J4	D_{IN1-} , inverted LVDS input for Channel 1
J3	J1	D_{OUT2+} , noninverted LVDS output for Channel 2
J4	J2	D_{OUT2-} , inverted LVDS output for Channel 2
J22	J22	Connects to Connector J21 (test trace for calibration)
J24	J24	Connects to Connector J23 (test trace for calibration)

Table 3. Side 2 Connector Descriptions

EVAL-ADN4651EB1Z Connector	EVAL-ADN4652EB1Z Connector	Description
J10	J10	Power supply, 3.3 V (Jumper P7 open) or 2.5 V (Jumper P7 closed)
J5	J7	D_{OUT1+} , noninverted LVDS output for Channel 1
J6	J8	D_{OUT1-} , inverted LVDS output for Channel 1
J7	J5	D_{IN2+} , noninverted LVDS input for Channel 2
J8	J6	D_{IN2-} , inverted LVDS input for Channel 2
J21	J21	Connects to Connector J22 (test trace for calibration)
J23	J23	Connects to Connector J24 (test trace for calibration)

RADIATED EMISSIONS TEST RESULTS (EN 55022)

- NOTES**
 1. SIGNAL GENERATOR OUTSIDE TEST CHAMBER
 2. INPUT SIGNAL: $|V_{ID}| = 300\text{mV}$, $V_{IC} = 1.1\text{V}$, 600MBPS PRBS7 OR 300MHZ CLOCK

13761-105

Figure 6. Test Setup for EN 55022 Radiated Emissions Testing for the EVAL-ADN4651EB1Z; Scope and Signal Generator Reversed for the EVAL-ADN4652EB1Z

Radiated emissions testing is performed with the EVAL-ADN4651EB1Z and EVAL-ADN4652EB1Z at an independent external test facility. Evaluating the EVAL-ADN4651EB1Z and EVAL-ADN4652EB1Z to the EN 55022 standard is undertaken in a 10 m radiated emissions test chamber, using the test setup shown in Figure 6. The setup comprises a battery-powered EVAL-ADN4651EB1Z/EVAL-ADN4652EB1Z connected to a signal generator located outside the chamber via coax cables. As specified by the EN 55022 standard, both horizontal and vertical peak scans are undertaken with any visible emissions peaks investigated using quasi-peak detector measurement. For each frequency measured using a quasi-peak detector, the unit under test rotates through 360 degrees to find the worst case angle. The receiving antenna then elevates from 1 m to 4 m in height to find the worst case elevation. The worst case quasi-peak measurements are compared to the EN 55022 Class B and Class A limits.

The test results for EVAL-ADN4651EB1Z and EVAL-ADN4652EB1Z are shown in Table 4 and a classification report for both evaluation boards is available on request (please contact Analog Devices or the distributor for support). Radiated emissions are measured across 30 MHz to 1 GHz and from 1 GHz to 3 GHz.

With a 600 Mbps PRBS7 input, the EVAL-ADN4651EB1Z/EVAL-ADN4652EB1Z passes the EN 55022 Class B limits. Plots for horizontal and vertical peak radiated emissions below 1 GHz are shown in Figure 7 and Figure 8, respectively, for the EVAL-ADN4651EB1Z; see the classification report for the EVAL-ADN4652EB1Z plots.

With a 300 MHz clock input, the EVAL-ADN4651EB1Z/EVAL-ADN4652EB1Z passes the EN 55022 Class A limits. To pass the Class B limits when isolating high frequency clocks, reduce the printed circuit board (PCB) clearance from the 8 mm implemented on the EVAL-ADN4651EB1Z/EVAL-ADN4652EB1Z to, for example, 2 mm.

Table 4. EN 55022 Radiated Emissions Classification

Test Condition	Result
600 Mbps PRBS	Passes EN 55022 Class B
300 MHz Clock	Passes EN 55022 Class A

NOTES

ESD Caution

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
