## HMC252AQS24E

v01.0316

# GaAs MMIC SP6T NON-REFLECTIVE SWITCH, DC - 3 GHz 

## Typical Applications

The HMC252AQS24E is ideal for:

- Base Station
- CATV / DBS
- MMDS \& WirelessLAN
- Test Equipment

## General Description

The HMC252AQS24E is low-cost non-reflective SP6T switches in 24-lead QSOP packages featuring wideband operation from $D C$ to 3.0 GHz. The switch offers a single positive bias and true TTL/CMOS compatibility. A 3:6 decoder is integrated on the switch requiring only 3 control lines and a positive bias to select each path. The HMC252AQS24E SP6T replaces multiple configurations of SP4T and SPDT MMIC switches and logic drivers.

The circuit board used in the application should be generated with proper RF circuit design techniques. Signal lines at the RF ports should have 50 ohm impedance while the package ground leads should be connected directly to the ground plane similar to that shown above. A sufficient number of via holes should be used to connect the top and bottom ground planes. The evaluation circuit board shown above is available from Analog Devices Inc. upon request.
