

## LM78Mxx Precision 500mA regulators

### Features

- Output current to 0.5 A
- Output voltages of 5; 6; 8; 9; 10; 12; 15; 24 V
- Thermal overload protection
- Short circuit protection
- Output transition SOA protection
- $\pm 2\%$  output voltage tolerance
- Guaranteed in extended temperature range

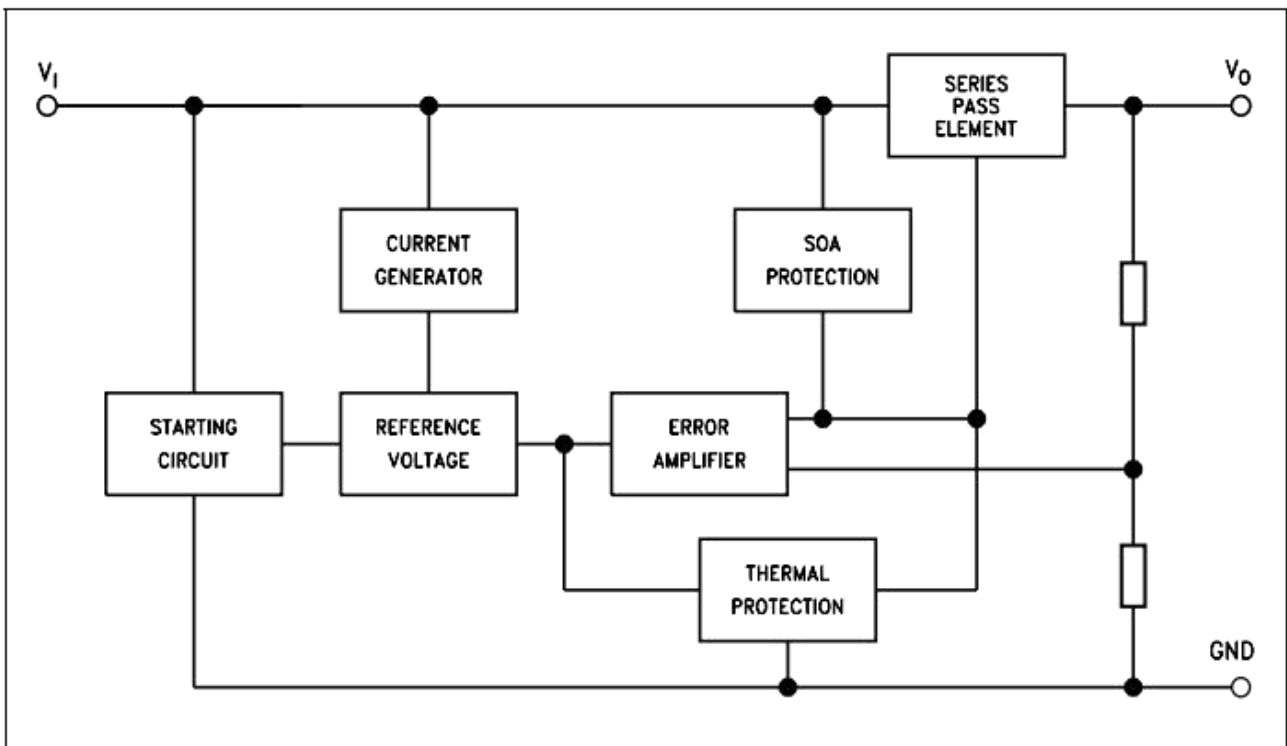

### Ordering Information

### Description

The LM78Mxx series of three-terminal positive regulators is available in DPAK .packages and with several fixed output voltages, making it useful in a wide range of applications. These regulators can provide local on-card regulation eliminating the distribution problems associated with single point regulation. Each type employs internal current limiting, thermal shutdown and safe area protection, making it essentially indestructible. If adequate heat sinking is provided, they can deliver over 0.5 A output current. Although designed primarily as fixed voltage regulators, these devices can be used with external components to obtain adjustable voltage and currents.

**Pin Configuration**

**Figure 1. Block diagram**

## Maximum ratings

**Table 2. Absolute maximum ratings**

Symbol	Parameter	Value	Unit
$V_i$	DC input voltage	for $V_o = 5$ to $18$ V	35
		for $V_o = 20, 24$ V	40
$I_o$	Output current	Internally limited	mA
$P_D$	Power dissipation	Internally limited	mW
$T_{STG}$	Storage temperature range	-65 to 150	°C
$T_{OP}$	Operating junction temperature range	0 to 125	°C
$T_L$	Lead Temperature (Soldering, 10 seconds)	245	°C

Note: Absolute maximum ratings are those values beyond which damage to the device may occur.

Functional operation under these condition is not implied.

**Table 3. Thermal data**

Symbol	Parameter	DPAK	Unit
RthJC	Thermal resistance junction-case	8	°C/W
RthJA	Thermal resistance junction-ambient	100	°C/W

## Physical Dimensions

TO-252-2

**Dimensions In Millimeters(TO-252-2)**

Symbol:	A	A1	B	B1	C	C1	D	E	a	b	d
<b>Min:</b>	2.10	0.45	6.30	5.10	9.20	5.30	0.90	0	0.50	4.45	0.70
<b>Max:</b>	2.50	0.70	6.75	5.50	10.6	6.30	1.75	0.23	0.80	4.75	1.20

SOT-223

**Dimensions In Millimeters(SOT-223)**

Symbol:	A	A1	B	C	C1	D	Q	a	b	e
<b>Min:</b>	1.50	0.05	6.30	6.70	3.30	0.65	0°	0.66	2.30 BSC	3.00 BSC
<b>Max:</b>	1.70	0.20	6.70	7.30	3.70	1.10	8°	0.84		

## Revision History

DATE	REVISION	PAGE
2014-6-8	New	1-12
2023-7-24	Update encapsulation type、 Update Lead Temperature	1、 3

**IMPORTANT STATEMENT:**

Hanschip Semiconductor reserves the right to change its products and services without notice. Before ordering, the customer shall obtain the latest relevant information and verify whether the information is up to date and complete. Hanschip Semiconductor does not assume any responsibility or obligation for the altered documents.

Customers are responsible for complying with safety standards and taking safety measures when using Hanschip Semiconductor products for system design and machine manufacturing. You will bear all the following responsibilities: select the appropriate Hanschip Semiconductor products for your application; Design, validate and test your application; Ensure that your application meets the appropriate standards and any other safety, security or other requirements. To avoid the occurrence of potential risks that may lead to personal injury or property loss.

Hanschip Semiconductor products have not been approved for applications in life support, military, aerospace and other fields, and Hanschip Semiconductor will not bear the consequences caused by the application of products in these fields. All problems, responsibilities and losses arising from the user's use beyond the applicable area of the product shall be borne by the user and have nothing to do with Hanschip Semiconductor, and the user shall not claim any compensation liability against Hanschip Semiconductor by the terms of this Agreement.

The technical and reliability data (including data sheets), design resources (including reference designs), application or other design suggestions, network tools, safety information and other resources provided for the performance of semiconductor products produced by Hanschip Semiconductor are not guaranteed to be free from defects and no warranty, express or implied, is made. The use of testing and other quality control technologies is limited to the quality assurance scope of Hanschip Semiconductor. Not all parameters of each device need to be tested.

The documentation of Hanschip Semiconductor authorizes you to use these resources only for developing the application of the product described in this document. You have no right to use any other Hanschip Semiconductor intellectual property rights or any third party intellectual property rights. It is strictly forbidden to make other copies or displays of these resources. You should fully compensate Hanschip Semiconductor and its agents for any claims, damages, costs, losses and debts caused by the use of these resources. Hanschip Semiconductor accepts no liability for any loss or damage caused by infringement.
