

Anaren Integrated Radio (AIR)

Low-power RF modules, firmware & development tools that make it easy to 'go wireless'

2500 Series

A2500R24A

Features

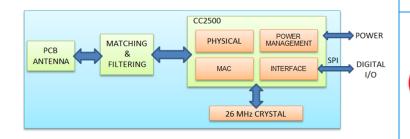

- Frequency range: 2400-2483.5 MHz
- FCC, IC and ETSI compliant, shielded package FCC ID: X7J-A10030501 // IC: 8975A-A10030501

The A2500R24A is a high-performance, FCC & IC certified and ETSI-

compliant radio module that incorporates the Texas Instruments CC2500 transceiver chip, all in the industry's smallest package: 9 x 12 x 2.5mm.

- **Digital RSSI output**
- Programmable output power up to +1.0dBm
- High sensitivity (2.4 kBaud, 1% packet error rate) -104 dBm at 2442 MHz (compliant to FCC/IC/ETSI)
- Ultra-small package size: 9 x 12 x 2.5mm
- LGA footprint .
- **RoHS** compliant .
- Operating temperature -40 to +85°C .
- Impedance-controlled, multi-layer PCB
- 1.8 to 3.6 VDC
- Low current consumption (16 mA in RX, 250 kBaud, 2442 MHz)
- 400 nA sleep mode current consumption
- Efficient SPI interface; all registers can be programmed with one "burst" transfer
- Available in tape & reel and matrix trav
- Module weight approximately 0.4 grams

Block diagram

Benefits

- Minimal RF engineering experience necessary
- No additional "Intentional Radiator" certification required (FCC 15.247a2, IC RSS-210, ETSI EN 300 328)
- Minimal real estate required
- Easily implemented on a two layer PCB
- No additional harmonic filtering required
- 100% RF-tested in production •
- Common footprint for similar products in family
- No additional DC decoupling required
- Integrated analog temperature sensor
- Excellent receiver selectivity and blocking performance
- Suitable for frequency hopping systems, thanks to a fast-settling frequency synthesizer with 90 µs settling time
- Impedance-matched balun for optimized efficiency
- Support for asynchronous and synchronous serial receive/transmit mode for backwards compatibility with existing radio

PLEASE NOTE: Additional information on the Texas Instruments CC2500 device can be found in the company's latest datasheet release at http://www.ti.com

> This product is not to be used in any implantable medical device or external medical device intended to regulate or monitor biological functions, including but not limited to devices such as pacemakers, defibrillators, cardiac resynchronization devices, pressure sensors, biochemical stimulators and neurostimulators. ANAREN MAKES NO WARRANTY OF FITNESS OR MERCHANTABILITY OF THIS PRODUCT FOR ANY USE OF THIS TYPE. Anaren shall not be responsible for any consequential damages arising from the sale or use of this product for any use of this type. Anaren Integrated Radio (AIR)

Low-power RF modules, firmware & development tools that make it easy to 'go wireless'

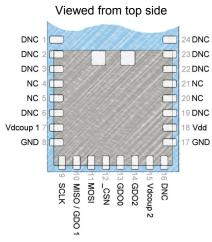

Product overview

The A2500R24A is a high-performance, FCC & IC certified and ETSI-compliant radio module that incorporates the Texas Instruments CC2500 transceiver chip in the industry's smallest package (9 x 12 x 2.5mm) and is compatible with all TI-approved software stacks.

With an LGA pad footprint, this module is designed to effortlessly integrate into a wide range of applications, including: industrial control, building automation, low-power wireless sensor networks, lighting control, and automated meter reading.

The A2500R24A has an RoHS-compliant ENIG finish and is packaged on tape & reel or in matrix trays for high-volume automated manufacturing.

Pin diagram

NC = "NO Connection" ^c Pin is NOT connected ^c internally.

DNC = "Do Not Connect" DNC Pin reserved for internal use, ensure mating footprint pads are isolated.

> **GND = "Ground"** Connect the maximum number possible (minimum **one** for proper operation).
