## Xinger

Ultra Low Profile 0805 $3 \mathrm{~dB}, 90^{\circ}$ Hybrid Coupler

## Description

The C2023J503A00 is a low cost, low profile sub-miniature high performance 3 dB coupler in an easy to use surface mount package. It is designed for WiMax,WiBro, UMTS, and IMT2000 applications. The C2023J503A00 is ideal for balanced power and low noise amplifiers, plus signal distribution and other applications where low insertion loss and tight amplitude and phase balance are required. The C2023J503A00 is available on tape and reel for pick and place high volume manufacturing.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having $X$ and Y thermal coefficient of expansion (CTE) of $17 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$

## Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having $X$ and $Y$ thermal coefficient of expansion (CTE) of $17 \mathrm{ppm} / /^{\circ} \mathrm{C}$.

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances.

Dimensions are in Inches [Millimeters] Mounting Footprint

## Packaging and Ordering Information

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
