**Electronic Shearcutters and Pliers**

**Superior Quality and Value**

- Xcelite's Shearcutter flush cutting tools require less than half the operator force of most wire and lead cutting tools and transmit proportionately less shock to the component
- As a result, they comply with MIL-STD-2000, DOD-STD-2000 and WS-6536E standards
- Grips are molded of wide, shock absorbing material for operator comfort
- Models 175 and 2178 incorporate safety clips which effectively eliminate flying leads
- However, safety glasses are still recommended when using these tools

Total Operator Force = Less Than 1/2 F      Total Operator Force = F

In shearcutting, one edge acts as an anvil while the other edge shears off the lead.
