

EMI Filtered D-Sub Connectors

From performance to board space, to cost, APITech offers many reasons and options for managing EMI at the signal and power I/O.

Advantages of a Filtered Connector

- **Low ground impedance:** Full ground plate and metallic shell provide minimal impedance and superior performance compared to on-board filter with high impedance
- **Eliminate re-radiation:** Filtered connector at interface leaves no path for bypassing the filter
- **Ground plane shielding:** APITech’s filtered connector ground planes shield the box even at the connector port
- **Efficient space utilization:** Filters located in the connectors provide additional space on PCB board
- **Consistent performance:** Filtered connectors provide more consistent pin to pin performance
- **Fewer components:** Filtered connectors reduce component count creating cost savings
- **Reliability:** APITech tests 100% of filters, on-board filters are usually spot tested

Series F Ferrite Filtered Connectors

Offer a low cost, space saving solution for high frequency interference see pages 3-7.

Series 500 Low-Profile Feedthrough Connectors

Deliver reliable EMI filtering in 90° PCB and straight PCB connectors see pages 8-11.

Series 600 High-Density Filtered Connectors

Meet the growing need for increased circuit densities in smaller packages see pages 12-13.

Series 700 High Performance Connectors

Feature feedthrough capacitive and Pi filters for the most effective filtering see pages 16-37.

Filtered Combo D-Sub Connectors

Use tubular capacitors for high insertion loss in signal, power and coaxial contacts see pages 40-47.

Micro D Series Connectors

Allow designers to incorporate EMI filtering into even smaller packages see pages 49-54.

5G D-Sub Filtered Connector

For test enclosures of high frequency testing, including 5G cellular hardware see page 55.

Custom Engineered Solutions see page 56.

Performance Specifications & Board/Panel Cutouts see pages 57-59.

Advantages of API Filtered Connectors

APITech's offers the industry's most complete line of filtered D-subminiature connectors. Our connectors are available in shell sizes from 9 to 50, and come in many termination types, such as PC mount, wire wrap, solder cup, and 90° PCB. In addition, APITech offers a wide range of filtering options, allowing you to find the right balance between performance and economy.

EMI filter options include our Pi filter configuration, which provides 45-60 dB per decade slope to insertion loss curve, our capacitive-only C filters that provide cost-effective EMI attenuation, ferrite filtered series F connectors (designed for filtering in situations that do not tolerate capacitive loading of circuit), as well as our series 500 connectors, with small .318" footprints.

The construction of our high performance Series 600 and 700 connectors features a one-piece zinc diecast shell, which is subsequently nickel-plated. Each filter is constructed with 360° grounding with ground plate, and our patented coaxial springs ensure ground continuity. And with APITech's advanced in-house ceramic tube design, you'll get a reliable, high performance filter from start to finish.

Advantages of an API Filtered Connector

- **Low ground impedance:** Full ground plate and metallic shell provide minimal impedance and superior performance compared to on-board filter with high impedance
- **Eliminate re-radiation:** Filtered connector at interface leaves no path for bypassing the filter
- **Ground plane shielding:** APITech's filtered connector ground planes shield the box even at the connector port
- **Efficient space utilization:** Filters located in the connectors provide additional space on PCB board
- **Consistent performance:** Filtered connectors provide more consistent pin to pin performance

- **Fewer components:** Filtered connectors reduce component count creating cost savings
- **Reliability:** APITech tests 100% of filters, on-board filters are usually spot tested

D-Subminiature Connectors

On-Board Filters

Series F Ferrite Filtered Connectors

The Series F EMI filtered D-subminiature connectors incorporate a solid slab of ferrite material as the filtering element. This rugged one-piece design provides a compact connector that is a drop-in replacement for standard connectors. The ferrite material has been chosen for optimum filtering performance in the 10 to 300 MHz range.

Series F Applications

- Personal computers, microcomputer-applied products, and peripheral/terminal equipment
- Eliminates common-mode noise along data lines in data communication terminals and digital equipment

Features

- Low cost, high performance ferrite filter
- No distortion of wave forms
- Replaces individual ferrite bead filters, saving cost, and space
- Provides both pin to ground and pin to pin filtering
- Effective in helping meet requirements of FCC, VDE, EN55022, and Japan's VCCI
- Short, space saving .318" footprint
- Interchangeable with standard D-subminiature connectors
- Can be installed directly over PCB trace pattern with no shorting
- 4-40 UNC locking insert eliminates loose hardware
- Metal shielding front shell
- Gold plated contacts
- RoHS compliant versions available (replace 56- with 56F)

Mechanical Specifications

- Front Shell* Steel (Tin plated)
- Housing* UL 94V-0 Rated thermoplastic, black
- Contacts* Phosphor bronze (sockets) or brass (pins)
- Contact Plating* Gold Flash (<10µ in.) over nickel
- Operating Temperature* 10C to +105C

Electrical Specifications

Series 500 High Performance Filtered Connectors

APITech's Series 500 are cost effective, highly reliable EMI filtered D-subminiature connectors that feature a .318" footprint for 90 degree PCB connectors and a low profile housing on straight PCB connectors. Series 500 filtered D-sub connectors are "drop-in" replacements for standard unfiltered D-sub connectors.

The ability of these connectors to achieve EMI filtering within the smaller footprint is the result of technical advances in ceramic capacitors. Series 500 connectors use tubular capacitors for high performance EMI filtering. Quality features for these connectors include board lock mounting, metal front shells, and gold plated contacts.

Series 500 capacitive filtered D-sub connectors are an ideal solution to FCC/EC/VCCI emissions problems. These connectors are designed to protect equipment from external EMI noise and eliminate system glitches.

Series 500 Applications

- Personal computers
- Industrial process equipment
- Graphics workstations
- PBX telecommunications equipment
- Cellular base stations and medical electronics

Features

- "Drop-in" replacements for unfiltered D-subminiatures
- Compact design, featuring .318" footprint
- Tubular feedthrough capacitors provide filtering superior to on-board components
- Ground plane design provides EMI shielding
- Full interchangeability; based on MIL-C-24308
- Each connector position is tested 100% for critical electrical parameters to ensure consistent performance
- Insulators are UL recognized UL94-V0 flammability rated
- 9, 15, and 25 shell sizes
- Available with board lock feature and 4-40 mounting threads
- Selective filtering available
- UL/CSA approved
- Greater than 40 dB filtering up through 1 GHz without resonances
- Bi-directional control of EMI at the I/O ports

Series 500 Low Profile Filtered Connectors

Mechanical Specifications

- Shell** Steel, tin plated
- Insulators** Glass-filled polyester, flammability UL94V-O
- Pin Contacts** Copper alloy CA725, 15 microinch (0.38 μ m) gold plated* over nickel
- Socket Contacts** Copper alloy CA725, 30 microinch (0.76 μ m) gold plated* over nickel
*Heavier gold plating available upon request.

- Ground Plane** Phosphor bronze, nickel plated

- Operating Temperature** -40°C to +125°C

- Capacitors** Proprietary barium titanate ceramic formulations

Other environmental tests such as shock, vibration, humidity, etc. are performed as detailed in our filtered connector performance specifications on page 5.

Electrical Specifications

- Current Rating** 5 Amps
- R.F. Current Rating** 0.3 Amps
- Contact Resistance** 10 milliohms maximum
- Capacitance** 120, 440, 840, 1000, 1500 pF \pm 30%
- Working Voltage** 100 VDC
- Dielectric Withstanding Voltage** 300 VDC
- Insulation Resistance** 1 Gohm minimum
- UL Recognized** Under category of communication circuit accessories, File #E149046

840 pF is typically within 2 dB of 1000 pF curve.

Filter Performance

Cap. (pF) Value \pm 30%	3 dB Cut-off Freq. (MHz)	Insertion Loss (dB)					
		20 MHz	100 MHz	500 MHz	1 GHz	2 GHz	5 GHz
120	40	-	4	21	26	26	20
440	11	3	15	27	33	32	25
840	6	6	19	32	38	37	25
1000	3	8	21	35	41	38	25
1500	2	10	25	40	47	42	25

Insertion loss measured per MIL-STD-220, no load, 50 ohm source and load. Above data represents guaranteed minimum.

Series 500 Low Profile Filtered Connectors

Ordering Information

Example: **56-524-013-GBL**

This part number represents a Series 500 filtered D-sub connector with 25 contacts, socket to 90° PCB mount configuration. The filter has a capacitance value of 1000 pF and the connector includes a grounded board lock.

For special needs or combinations of features, contact APITech engineering.

GBL Option

Features

- Snap-in retention to PC board, requires no hardware
- Ensures low ground impedance for superior filtering
- 4-40 threads on mounting flange eliminate loose hardware

Series 600 High Density

Filtered Connectors

The miniaturization of electronic systems and sub-systems is pushing designers to increase circuit densities within smaller packages. To address this growing need, APITech has developed a line of filtered High-Density D-subminiature connectors. This new line of connectors incorporates the high performance and reliable filtering of APITech's standard D-sub in the High-Density format.

Features

- Connectors designed to MIL-C-24308
- Capacitance values from 85 pF to 4000 pF
- Filter type feedthrough C
- Selectively specify and filter each contact position
- Available in feedthrough capacitive configurations

Mechanical Specifications

Same as Series 700. See page 2 of Series 700 High Performance Connectors data sheet.

Electrical Specifications: High-Density Connectors

Filter Designations	Filter Circuits	Capacitance		3 dB Cut-off Frequency Max. (MHz)	Dielectric With-standing Voltage	Working Voltage DC -55°C to +125°C	Minimum Insertion Loss - Decibels (dB)

High-Density Filtered Adapter for Telecommunications

Within the telecommunications industry, it has been standard practice to use an adapter (male/female) type of EMI filtered connector as the interface between the switching system electronics and the premise wiring. These filtered adapters provide effective containment of EMI compared to either D-subminiature or 50-position "ribbon" contact type connectors.

The following several factors have mandated the development of a new generation of filtered adapters.

Special Requirements

- Higher density wiring
- The need for more contacts, usually a multiple of 16
- Higher reliability contact geometries
- Bellcore TR-NWT-001089 requirements
 - 1000 volts AC withstand for one minute
 - 2500 volts spike surge testing
- Improved flammable resistant plastic insulators

APITech's, in response to these unique requirements of the telecommunication industry, has developed a new high-density filtered adapter.

Features

- New ceramic technology and filter element construction to accept higher voltages
- Improved reliability compared to "ribbon" type connectors
- Integral ground plane and one-piece diecast housing for the highest level of EMI integrity
- More contacts/wires per square inch of panel space through high-density arrangements
- 64 contact positions standard, with 78 positions available by request in any filter combination

Mechanical Specifications

<i>Shell</i>	Zinc or aluminum diecast, nickel plated 150 μ inches (3.81 μ m) min.
<i>Insulators</i>	Thermoplastic, UL94V-0
<i>Contacts</i>	One-piece, screw machined Copper alloy, contact area plated 50 μ inches (1.27 μ m) gold over 50 μ inches (1.27 μ m) nickel
<i>Ground Plane</i>	Brass, solder plated
<i>Ground Springs</i>	Beryllium copper, tin plated per MIL-T-10727
<i>Operating Temperature</i>	-55°C to +125°C
<i>Capacitor</i>	High performance ceramic feedthrough utilizing ultra low ESR design

Electrical Specifications

<i>Rated Voltage</i>	100 VDC
<i>Current Rating</i>	3 Amps
<i>DC Resistance</i>	15 milliohm max
<i>Dielectric Withstanding Voltage</i>	1000 VRMS (FCC Part 68 test)
<i>Capacitance</i>	1000pF, \pm 25%
<i>Voltage Surge</i>	Meets 2500 volts surge (10/1000) (See Wave form figure on next page)

High-Density Filtered Adapter for Telecommunications

Filter Performance

Minimum Insertion Loss	
20 MHz	7 dB
50 MHz	14 dB
100 MHz	20 dB
500 MHz	32 dB
1 GHz	35 dB
2 GHz	41 dB
5 GHz	39 dB

Insertion loss measured per MIL-STD-220, no load, 50 ohm source and load. Above data represents guaranteed minimum.

Part Number for Ordering: #56-645-002

Dimensions in inches (mm)

Series 700 High Performance Filtered Connectors

Filter Selection

APITech's Series 700 connectors offer the highest performance filtering for all types of professional applications.

Features

- Available in 9, 15, 25, 37, and 50 shell sizes
- Variety of termination configurations including right angle and straight PCB for both pin and socket contact and as an adapter
- Capacitive and Pi type filters in a full range of capacitance values

The catalog data for this series is presented in order of shell size, and grouped by pin and socket contacts. Part numbers must be selected from the tables within the series section.

Insertion loss measured per MIL-STD-220, no load, 50ohm source and load.

Electrical Specifications: High Performance Connectors

Filter designation "G" for grounded contacts, "I" for insulated (not filtered) contacts. Above data represents guaranteed minimum.
 Filter designation "O" for omitted contact and no hole in ground plane.

Series 700 High Performance Filtered Connectors

Specifications and Connector Ordering

Mechanical Specifications

<i>Shell</i>	Zinc or aluminum diecast, nickel plated 150 μ inches (3.81 μm) min.
<i>Insulators</i>	Glass-filled polyester, flammability UL94V-0
<i>Pin Contacts</i>	Copper alloy, 15 μ inches (0.38 μm) gold plated * over nickel
<i>Socket Contacts</i>	Copper alloy, 30 μ inches (0.76 μm) gold plated * over nickel * Heavier gold plating available upon request. See pg. 24: Connector Options
<i>Terminations</i>	Gold flash for PCB mount and solder cups. Solder dipped also available.
<i>Ground Plane</i>	Brass, solder plated
<i>Grounding Springs</i>	Beryllium copper, tin plated per MIL-T-10727
<i>Operating Temperature</i>	-55°C to +125°C
<i>Capacitors</i>	Proprietary barium titanate ceramic formulations

Electrical Specifications

<i>Current Rating</i>	5 Amps
<i>R.F. Current Rating</i>	0.3 Amps
<i>Contact Resistance</i>	10 milliohms maximum
<i>UL Recognized</i>	Under category of communication circuit accessories, File #E149046
<i>Inductance on PI Filters</i>	~ 860 nH between 100 kHz and 1 MHz

Solder cups accept up to a 20 gauge wire.

Ordering Your Connector

Step 1: Selecting the Filter

- Using the insertion loss graphs on page 1 determine which filters provide the required attenuation at the troublesome frequency, while not affecting the signal frequency by more than 3 to 6 dB.
- Choose the filter type, either feedthrough capacitor or Pi. Pi is generally considered better due to its superior high frequency performance and steeper curve. The feedthrough capacitor is lower cost.
- Select capacitance value.
- Note the APITech letter designation for the filter chosen from the table on page 1.

Step 2: Selecting the Connector

- Turn to the appropriate size section (9, 15, 25, 37, 50).
- Choose either pin contacts (plug) or socket contacts (receptacle).
- Choose the required termination type.
- From the table on the appropriate connector page, using the filter letter designation chosen in step 1 above, select the part number.

Step 3: Specifying Options

- Refer to page 24 for special options including heavy gold plating, 4-40 mounting threads, grounding brackets, hardware, and others.
- Most options are available within the standard lead times.
- Some options require a part number suffix, while other combinations may require factory assistance for part number assignment. If a suffix is shown, add it to your selected part number. If more than one option is needed, contact APITech for part number assignment.

D-Subminiature Part Numbering System

Ordering Information

Example: 56-513-012-TI

To assist your efforts in selecting the correct Filtered Connector to meet your needs, we have developed a part numbering system. All of the standard products are shown in their respective catalog pages.

Part number 56-513-012-TI represents a Series 500 connector with 15 contacts in a socket to straight PCB mount configuration. All connector positions have a capacitance value of 840 pF and there are 4-40 threads on mounting flange.

D-Subminiature Connector Options

Threaded Inserts

Available on Series 500, 600 & 700.

- #4-40 UNC or metric M3.0 threaded inserts in mounting flanges.
- Allows ease of panel-assembly.
- Plated steel inserts with last thread upset for torque.

Grounding Bracket

For right angle mount PCB connectors, available on Series 700.

- Metal bracket in place of plastic.
- Provides ground connection direct from circuit board.
- Allows shell grounding to board.
- Includes 4-40 threads.

Stand-off with Board Lock Feature

For straight PCB connectors, available on Series 700.

- Allows shell grounding to board.
- Eliminates stress on filter temperature.
- Tin plated brass stand-off with snap-in feature.
- Available for .062" (1.57mm) or .093" (2.36mm).

Grounding Bracket with Board Lock

For right angle mount PCB connectors, available on Series 500 & 700.

- Metal bracket provides grounding.
- Snap-in, no hardware needed, 4-40 threads included.
- For use on .062" (1.57mm) thick boards.

Gold Plating

Available on Series 600 & 700.

- High reliability applications, 50µ" (1.27µm) gold over 50µ" nickel.

Solder Dipped Tails

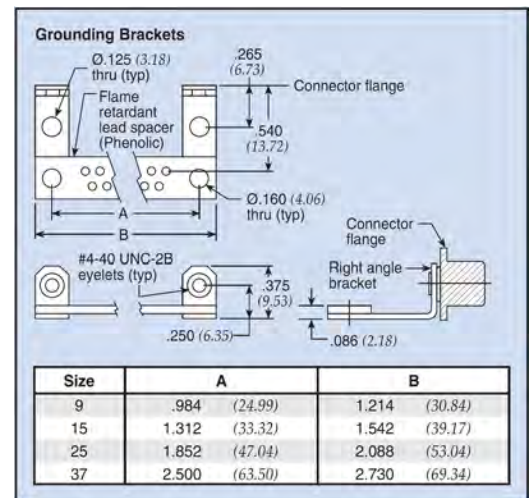

Available on Series 600 & 700 connectors.

- Solder dipped tails added standard gold flash.

Water Block

Consult APITech engineers for specifics.

- Internally sealed in accordance with NEMA Standard Rain Test section 6.4 (also UL50 part 28 ram test submersion, section 6.10.1.

Dimensions in inches (mm)

Filtered Combo D-Subminiature Connectors

APITech's line of EMI filtered combo D-subminiature connectors provide high insertion loss with capacitive filtering. These connectors are available with 20 Amp power contacts or 40 Amp power contacts. Configurations include male and female versions with straight PC terminals, right angle PC terminals, or solder cup terminals. Standard D-sub shell sizes provide intermateability with unfiltered connectors. High strength epoxy potting protects ceramic elements.

Capacitive filtering is available in 470, 820, 1000, and 1500 pF. Additional capacitance ranges and configurations can be provided upon request. Please contact APITech for additional information.

Applications

- Telecommunications base station equipment
- Switching and transmission equipment
- Power supplies
- Industrial equipment
- Computer work stations

Mechanical Specifications

<i>Shell</i>	Steel, tin plated
<i>Power Contacts</i>	Brass, gold plated .000030 in. (0.762 μm) minimum
<i>Signal Contacts</i>	Pin: brass, gold plated .000015 in. (0.762 μm) min. Socket: copper alloy, gold plated .000030 in. (0.762 μm) min.
<i>Insulator</i>	Glass-filled polyester, flammability UL94V-0
<i>Operating Temperature</i>	-55°C to +125°C
<i>Capacitors</i>	MLCC

Electrical Specifications

<i>Operating Voltage</i>	200 VDC
<i>Current Rating*</i>	40 Amp power/ 5 Amp signal
<i>Insulation Resistance</i>	1 Gohm at 100 VDC
<i>Capacitance</i>	See below for MLCC values. For other capacitance values contact factory

Dielectric Withstanding Voltage 600 VDC

*** 30 Amp available. Consult APITech.**

D-Subminiature Adapter Test Kit & Hardware

Adapter Test Kit

Specially designed for EMI evaluation process.

- Male/female adapter part
- Easily plugged into equipment under testing conditions
- Ideal for new products and retrofitting
- Each adapter test kit includes:
 - 20 filtered adapters
 - Four shell sizes 9, 15, 25, and 37
 - Four filter ranges:
 - Series 700**
 - 310 pF Pi
 - 830 pF FT
 - 1000 pF Pi
 - 4000 pF Pi

Adapter Test Kit

Ordering Information

Description	APITech Part Number
Adapter test kit	56-700-002
Adapter test kit with Jackscrew <i>Includes 40 pcs. 56-201-006</i>	56-700-002-JS
Hexagonal Spacer	56-201-001 (1 per)
Jackscrew Mounting Hardware <i>For .312" (7.92 mm) length</i>	56-201-004 (1 per)
Jackscrew Mounting Hardware <i>For .688" (17.47 mm) length</i>	56-201-006 (2 per)
Tubular Spacer	56-201-003 (1 per)

Hardware

Designed to provide simple and effective mounting.

Hexagonal Spacer

- Tapped spacer fits between flanges
- Provide retrofit of 4-40" threads
- Two spacers per adapter required, packaged in bulk

Jackscrew Mounting Hardware

- Male/female jackscrews
- Standard 4-40 threads for compatibility
- Two male thread lengths available
- Two screws per adapter required
- Lockwasher included, packaged in bulk

Micro D Series Filtered Connectors

For designs that require even smaller connector packages, APITech's brand has designed a line of EMI filtered Micro D-Subminiature connectors. This line of connectors offers a range of reliable filtering options, including capacitive, ESD versions, several sizes, and termination options. APITech has a Micro D-sub connector to satisfy your smallest space constraints.

Feature

- Light weight
- Compact size
- Environmentally sealed contact area when mated
- Corrosion resistant
- Durable (500 cycles min.)
- Superior electrical performance
- RoHS compliant

Mechanical Specifications

<i>Shell</i>	Aluminum, electroless nickel plated 500 μ in (12.7 μm) minimum
<i>Insulator</i>	High temperature plastic, flammability UL94V-0
<i>Contacts</i>	Copper alloy, gold plated 50 μ in (1.27 μm) minimum
<i>Potting</i>	Flammability UL94V-0
<i>Interfacial Seal</i>	Silicon

Electrical Specifications

<i>Operating Voltage</i>	100 VDC
<i>Dielectric Withstanding Voltage</i>	300 VDC
<i>Current Rating</i>	3 Amps
<i>Insulating Resistance</i>	5G ohms @ 100 VDC

Ordering Information

Example: 56-F011-1-10-JP

This part number represents a micro D-sub connector with a shell size of 15 and a pin to solder cup configuration. All lines are filtered with same capacitance value, which is 100 pF COB. The connector includes an optional #2-56 jack post.

* Right angle and PC tail length is 0.109. Other lengths available, consult APITech.

All capacitance values ±20% @ 25°C.

5G D-Sub Filtered Connector

Filter capable of 70 dB from 1 GHz to 6 GHz in a D-sub connector adapter form-factor.

Application

- Test enclosures for high frequency testing including 5G cellular hardware

Performance/Attributes

- Four pole circuit utilizing materials specifically designed for 5G cellular bands
- Coaxial filter design with all electrical connections soldered resulting in low ESR/ESL at frequencies up to 6 GHz and beyond
- 25-pin adapter geometry perfect for test enclosures applications that require fast and easy 'plug and play' on both sides
- One-piece die-cast housing and integrated ground clips for more effective high-frequency shielding and shell to shell continuity
- Threaded inserts for easy installation
- RoHS compliant

Product Specifications

<i>Dielectric Withstanding Voltage</i>	150V
<i>Working Voltage</i>	50V
<i>Temperature Range</i>	-55 to 125°C
<i>Capacitance levels</i>	1000pF and 4000pF available

Installation Guidelines

The connector must be properly grounded to system ground. APITech recommends mounting with silver filled silicone gasket (volume resistivity of 0.001 ohm/cm typical) between the connector housing and chassis/backplane.

Filtered D-Sub Connectors Capabilities

- One-piece die-cast connector shells, unmatched high-frequency performance with shielded interface
- Compliance testing (EMC and environmental)
- Fully vertically integrated (USA manufactured ceramics)
- Low-cost manufacturing
- Product 100% tested for defined key parameters
- Facilities and process are AS9100 certified

Custom Engineered Solutions

Despite the breadth of our filtered connector product line, there exist certain applications which demand a custom EMC solution. Our engineering staff will work with your design team to provide a custom filtered connector which meets your individual requirements. Examples of custom projects are shown below.

Special Mounting Flanges

Housings can be designed to be integrated into the customer's equipment. The housings are constructed of machined materials or precision diecast zinc.

Value-added Assemblies

APITech's capabilities extend beyond just supplying filtered connectors. Additional operations such as sourcing and assembling flexible circuits, adding flying leads, or making connector to connector assemblies, all can be provided in conjunction with the filter connector.

Custom Filter Arrangements

Complex filters involving unbalanced Pi types, LC types with large inductive components, special pin-in to pin-out translations, and overvoltage protective devices such as diodes and varistors can be packaged within the connector.

Other Connector Formats

Manufacturer specific connectors also can be filtered. Our involvement ranges from complete design to implementing minor modifications to include the addition of the filter components. Medical equipment and hand-held devices are examples of excellent applications for these connectors.

Special Mounting Flanges & Value-added

Custom Filter Arrangements & Connectors

Filtered Connector Performance Specifications

Filtered D-subminiature connectors shown in this catalog have been designed and tested to the following test plan.

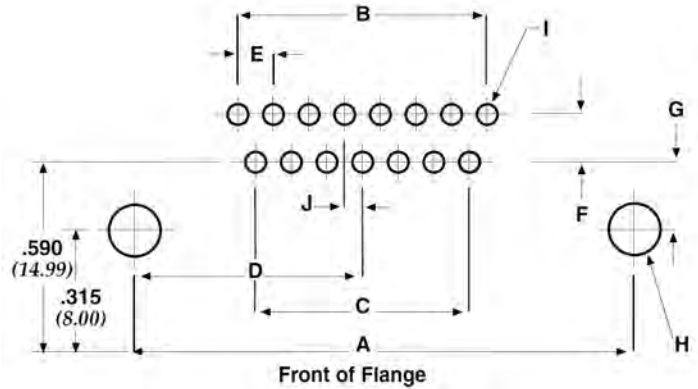

The information shown can be used as a basis for your filtered connector specifications. (Contact APITech for additional details.)

Test Group	Order of Test	Examination of Test	Test Method	Post Test Requirements
I	1	Visual and Mechanical Examination		In accordance with applicable requirements.
	2	Materials, Designs Construction and Workmanship		
	3	Physical Dimensions and Marking		
	4	Capacitance	MIL-STD-202 Method 305 1 KHz, 1VRMS max. 25°C	Within specified tolerance.
	5	Dielectric Withstanding Voltage	MIL-STD-202 Method 301	No breakdown or damage.
	6	Insulation Resistance	MIL-STD-202 Method 302, test condition at rated voltage	5000 megohm minimum.
	7	Insertion Loss	MIL-STD-220 No load	In accordance with applicable requirements.
II	1	Contact Engagement and Separation	MIL-C-24308, Para. 3.5.10	Maximum engagement force 18.0 oz., minimum separation force 0.7 oz.
	2	Mating and Unmating Force	MIL-C-24308, Para. 3.5.4	MIL-C-24308, Para. 3.5.4 Table II Limits: Shell size 1-5, class G only.
	3	Durability	MIL-C-24308, Para. 3.5.16, 4.7.18, except 100 cycles	MIL-C-24308, Para. 3.5.9 Contact resistance at 1 amp. 20 milliohms max.
	4	Thermal Shock	MIL-STD-202 Method 107, Test condition B, -55°C to +125°C	No evidence of damage. Insulation resistance not less than 2500 megohms.
	5	Solderability	MIL-STD-202; Method 208, RMA-Flux	Terminals shall meet solderability requirements.
	6	Moisture Resistance	MIL-STD-202 Method 106, less step seven	Insulation resistance not less than 500 megohms. Meet dielectric withstanding voltage requirements.
	7	Resistance to Soldering Heat	MIL-STD-202 Method 210, Test condition D	Insulation resistance not less than 500 megohms. Meet dielectric withstanding voltage requirements.
III	1	Vibration	MIL-STD-202 Method 204, Test condition D, 100 mA, current	No interruption of current flow longer than 1 microsecond. Insulation resistance greater than 5000 megohms.
	2	Shock	MIL-STD-202 Method 213. Test Condition G, 100 mA, current	No interruptions of current flow longer than 1 microsecond.
				Contact resistance at 1 amp. 15 milliohms max.
				Capacitance within specified limits.
3	Mounting Inserts a. Prevailing torque (locking) b. Installation torque (locking) c. Push-out Force	IFI-100	a. 3 inch-pounds max. b. 6 inch-pounds without damage c. 10 pounds axial force without loosening insert	
IV	1	Life	MIL-STD-202 Method 108, Test condition D, within 125% of rated voltage at the maximum operating temperature.	Filter shall meet all initial requirements except insulation resistance shall not be less than 500 megohms.
