

APM HEXSEAL was founded in 1947 with the mission to develop and

manufacture environmental sealing solutions to protect and prolong the life of electromechanical switches and circuit breakers in hostile environmental conditions around the globe. This focused effort resulted in the development of an extensive line of standard silicone sealing boots that are compatible with the vast majority of switches, breakers, encoders, potentiometers and rotary devices used throughout the world today.

Complimentary sealing products were soon developed and patented, including a complete line of reusable, self-sealing fasteners, and silicone colorizing incandescent lamp filters that transmit colors for instrument panels and lighted pushbutton switches.

Drawing upon our experience with precision

transfer and compression molding using a wide range of elastomers, rubber-to-metal bonding and coating treatments, APM Hexseal's Custom Design Department offers an efficient method to develop your custom sealing needs,

from concept all the way to production.

#### **Sealing Boots & Bushings**

- Switch and Potentiometer Boots
- ♦ Circuit Breaker Boots
- Specialty Bushing Seals
- Custom Elastomeric Sealing Solutions

#### Self-Sealing Hardware

- ♦ SEELSKREW® Self-Sealing Screws
- ♦ SEELBOLT® Self-Sealing Bolts
- ♦ SEELNUT® Molded Self-Sealing Nuts
- ♦ SEELOC® Molded Sealing Washers

"APM Hexseal has a solution looking for your problem."

ISO 9001:2015 Registered

## **APM Hexseal Boots for Toggle, Pushbutton** & Rotary Switches

Any unsealed electrical devices mounted to a control panel or piece of electrical equipment can fall victim to the impacts of hostile environmental factors if not properly protected. In this context, "environmental" is a very broad term, encompassing any number of possible factors, including weather conditions like rain, snow or prolonged wind and sun exposure, pressure changes from submersion in fluids or changes in altitude, contaminants such as water, ice, salt, air, dust, dirt, grease, chemicals, and even spilled beverages.

APM Hexseal's Sealing Boots are designed to protect the vulnerable areas of a device, and create a seal against the mounting panel, providing strong protection for the device itself, and for the overall function of the system.

#### **MATERIAL SPECIFICATIONS**

For APM Hexseal® Standard Threaded Toggle, Pushbutton & Rotary Boots

Elastomer: Silicone † conforms to A-A-59588, Class 3A, GR50, Gray ‡

Mounting Nut: Brass. Nickel Plated

Temperature Range: -103° F to +400° F ( -75° C to +204° C)

Resistant to: Splash, salt spray, sunlight, ozone, weather, fungus, dust, and most acids

and lubricating oils.

Figure 1

Shelf Life: Excess of 25 years.

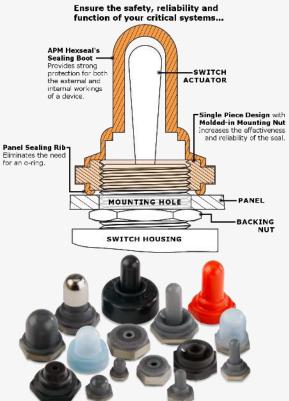

Enclosure Protection: IEC IP66 / IP68 •

**Full Toggle Boot with Secondary Inner Seal** 

**Full Toggle Boot with Constant Internal Diameter** 

- † Alternative elastomers options are available by request. (See table on page 7 for options.) ‡ Additional durometer and color options available. Please contact us for details.
- A dual IP code rating indicates that both ratings apply.

APM Hexseal's UL and ULC Recognized Components conform to UL Standard 50. Contact us for a complete list of our Recognized Components and ratings.

### **APM Hexseal Bushing Seals For Switch Panel Cut-Outs**

Bushing Seals pack all the sealing power of a boot, but focus on the mounting hole as opposed to the switch itself. Installed before a switch locking nut, the bushing seal fits snugly against the mounting panel, sealing the mounting hole from any possible intrusion. Bushing Seals are small, inconspicuous and perfect for already sealed toggle, push button and rotary switches.

#### **MATERIAL SPECIFICATIONS**

For APM Hexseal® Standard Bushing Seals

Elastomer: Silicone conforms to A-A-59588, Class 3A, GR50 †, Gray ‡

Mounting Nut: 18/8 Stainless Steel

Temperature Range: -103° F to +400° F ( -75° C to +204° C)

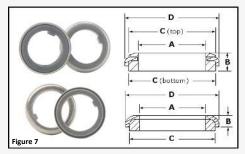

Resistant to: Splash, salt spray, sunlight, ozone, weather, fungus, dust, and most acids and lubri-

cating oils.

Shelf Life: Excess of 25 years. Enclosure Protection: IEC IP66 / IP68 •

- † Durometer options available. Please contact us for details. ‡ Additional colors available. Please contact us for details.
- A dual IP code rating indicates that both ratings apply.

APM Hexseal's UL and ULC Recognized Components conform to UL Standard 50. Contact us for a complete list of our Recognized Components and ratings.

### **APM Hexseal Boots for Circuit Breakers & Rocker Switches**

Circuit breakers perform a very valuable role in all sorts of control systems, protecting equipment from short circuits and electrical overloads. APM Hexseal's leveractuated circuit breaker boots are designed to protect these critical devices, extending breaker life-spans and in turn helping to ensure long-term security of the system as a whole. Molded from APM Hexseal's transparent silicone RUBRGLAS®, which is specially formulated to maintain clarity and prevent yellowing over time,

these boots allow for easy device operation and status recognition while maintaining APM Hexseal's exceptional environmental protection from weather exposure, wash downs, salt water, lubricants, solvents, dust, dirt, grease and any number of other environmental elements that could potentially threaten electrical components. Our two distinct boot styles are Back-of-Panel, secured behind the breaker mounting panel, and Front-of-Panel, mounted to the outside of a

panel using a sturdy metal frame. Both styles are secured using APM Hexseal's self-sealing Seelskrews. Much like our Circuit Breaker Boots, APM Hexseal's Rocker Boots are often molded from transparent silicone RUBRGLAS® which makes for easy viewing of the switch position. The majority of our Rocker Boots do not include an insert or frame, and are designed to install on the switch prior to the switch installation.

#### **MATERIAL SPECIFICATIONS**

For APM Hexseal® Standard Rocker and Lever-Actuated Circuit Breaker Boots

Elastomer: APM HEXSEAL RUBRGLAS® (transparent Silicone) conforms to A-A-59588, Class 3A, GR50 †

Frame (Front-of-Panel Mounted Only): Low Carbon Steel ‡ with Zinc-Chromate Plating • Temperature Range: -103° F to +400° F ( -75° C to +204° C)

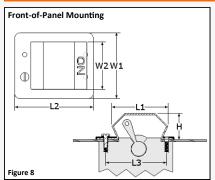

Resistant to: Splash, salt spray, sunlight, ozone, weather, fungus, dust, and most acids and lubricating

Shelf Life: Excess of 25 years.

Enclosure Protection: Rocker Boots— IEC IP55; Front-of-Panel Mounted— IEC IP66 / IP68 0; Back-of-Panel Mounted— IEC IP66 / IP68 ◊

- † Durometer options available. Please contact us for details.
- ‡ Frames are also available in Stainless Steel for extremely aggressive environments.
- Contact us for details on our standard 3-step frame finish.
- ♦ A dual IP code rating indicates that both ratings apply.

APM Hexseal's UL and ULC Recognized Components conform to UL Standard 50. Contact us for a complete list of our Recognized Components and ratings.

### **APM Hexseal's High-Pressure Self-Sealing Fasteners**

APM Hexseal holds the notable distinction of having designed and patented the very first self-sealing fasteners, which became our trademarked Seelskrews® and Seelbolts®. In addition to fastening, our self-sealing screws and bolts offer a reliable and reusable seal, preventing (or containing!) contamination from dust, air, water, lubricants and other liquid or gaseous substances. They are also vibration resistant, making them a great choice for applications that encounter day-to-day jarring, or repetitive movement. Should you need a more serious level of vibration resistance, our screws and bolts are available with locking features such as self-locking pellets, strips and patches. Some additional customizations include specialty threadforming variations, tamper-resistant drives, thread captivation, as well as paint and finish options. Contact us for additional thread size and o-ring elastomer options.

#### MATERIAL SPECIFICATIONS

For APM Hexseal® Standard Seelskrews® & Seelbolts®

Screw/Bolt Material: 18/8 Stainless Steel, passivated (other materials available) Thread Class: Imperial — Class 2A A; Metric — Class 6g

O-Ring Elastomer: Silicone conforms to A-A-59588, Class 2, GR60 or GR70, Red ◆ Temperature Range: -80° F to +425° F ( -62° C to +219° C)

Pressure Range: Up to 20,000 psig internal and external (subject to clearance hole dimensions).

Resistant to: Splash, salt spray, sunlight, ozone, weather, fungus, dust, and most acids and lubricating oils.

Shelf Life: Excess of 25 years.

Enclosure Protection: IEC IP66 / IP68 ★

- Standard for stock screws and bolts.
- Alternative o-ring elastomers are available by request. (See table on page 7 for options.)
- ★ A dual IP code rating indicates that both ratings apply.

APM Hexseal's UL and ULC Recognized Components conform to UL Standard 50. Contact us for a complete list of our Recognized Components and ratings.

### APM Hexseal's High-Pressure Self-Sealing Nuts

APM Hexseal's Seelnuts® are made from high quality rubber, molded into a specially shaped cavity in the nut itself. With threads molded directly into the rubber, these self-sealing nuts form a positive seal along the threaded section of the Seelnut, as well as with the contact surface, removing the need for gaskets, sealing compounds or extra surface preparation. Seelnuts install just like conventional nuts, and are designed for use with ordinary screws, bolts and studs, making them a quick and easy sealing option for all sorts of applications, especially where there is a need to withstand high internal or external pressures. Seelnuts are also reusable, meaning that they can be easily removed and reapplied, reestablishing the same reliable seal when torqued. Our Seelnuts are available in all standard thread sizes as well as a variety of different elastomers to suit your application needs. For applications where excessive vibration is an issue, Seelnuts can be supplied with self-locking pellets.

**MATERIAL SPECIFICATIONS** 

For APM Hexseal® Standard Seelnuts® Nut Material: Low Carbon Steel with Zinc-Chromate Plating †

Threads: Imperial - Class 2B ‡; Metric - Class 6H

Elastomer: Silicone conforms to A-A-59588, Class 3A, GR60, Red ◊

Temperature Range: -103° F to +400° F ( -75° C to +204° C)

Pressure Range: Up to 20,000 psig internal and external (subject to clearance hole dimensions).

Resistant to: Splash, salt spray, sunlight, ozone, weather, fungus, dust, and most acids and lubricating oils.

Shelf Life: Excess of 25 years.

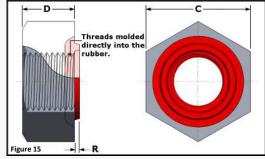

Enclosure Protection: IEC IP66 / IP68 •

- † Standard Jam Nut material is Brass with Nickel Plating.
- ‡ Standard for stock nuts.
- Alternative elastomers are available by special order. A dual IP code rating indicates that both ratings apply.

APM Hexseal's UL and ULC Recognized Components conform to UL Standard 50. Contact us for a complete list of our Recognized Components and ratings.

★ APM Hexseal's standard material for metric nuts is Stainless-Steel.

### Ordering Instructions for Products with Type Codes - Seelskrews®, Seelbolts® & Seelnuts®

The following information is required in order for our Sales Team to process any kind of Purchase Order or Request for Quote:

- ① Indicate the desired **Type Code** (Type Codes are short series' of letters that can be found in corresponding parts tables)
- 2 Specify the desired Thread Size as listed in the parts table
- (3) Specify the **Length**, if applicable
- Specify the desired O-Ring Material, if applicable (Please see Elastomer Options for APM Hexseal® O-Rings on page 7)

Any additions, such as alternate materials, finish options and locking features, should be discussed with a Sales Associate at the time of order.

### **APM Hexseal Air-Tight Sealing Washers**

APM Hexseal's Seeloc® Washers consist of molded silicone rubber bonded to specially formed stainless steel washers. Designed to be used in conjunction with conventional screws, bolts or studs, Seeloc Washers are a simple sealing solution that is ideal for all sorts of applications, especially where spray, vapors or wash-downs are present, or where there is concern of contamination from dust, oils or salt build-up. The silicone contact surface features a continuous ridge which, upon compression, creates a 360° sealing barrier around the periphery of the washer face. The silicone rubber also forms a seal under the head of the associated fastener and makes full vertical contact with the threads/shank, making for a complete, high-pressure seal unlike any other. Seeloc Washers can be used over conventional mounting holes, extra-large holes, or even oddly shaped adjustment slots. Their reusability make them perfect for applications that might require periodic maintenance or adjustments.

#### **MATERIAL SPECIFICATIONS**

For APM Hexseal® Standard Seeloc® Washers

Washer Material: 18/8 Stainless Steel

Elastomer: Silicone † conforms to A-A-59588, Class 3A, GR50, Green ‡

Temperature Range: -103° F to +400° F ( -75° C to +204° C) Pressure Range: Up to 100 psig internal and external.

Resistant to: Splash, salt spray, sunlight, ozone, weather, fungus, dust, and most acids and lubri-

cating oils.

Shelf Life: Excess of 25 years.

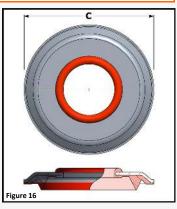

Enclosure Protection: IEC IP66 / IP68 ◊

- † Alternative materials are available. Consult Elastomer Options table below.
- ‡ Standard color for Metric Seeloc Washers is red. Alternative colors are available by special order. ◊ A dual IP code rating indicates that both ratings apply.

APM Hexseal's UL and ULC Recognized Components conform to UL Standard 50. Contact us for a complete list of our Recognized Components and ratings.

### APM Hexseal's Available Elastomers

Cautionary Note: These tables are to be used as a guide ONLY. The information provided does not take into account the possible variations that can, and do, exist from one application to another, and thus cannot be relied upon as definite. APM Hexseal strongly recommends that the material you select be rigorously tested in the actual application in order to independently verify that the material is well suited for your particular installation or use.

#### Suitability of APM Hexseal® Products to Customer Application

The information contained in APM Hexseal literature, website, drawings, etc., is offered in good faith and is believed to be accurate. Since APM Hexseal cannot foresee or control the varied conditions under which this information and/or APM Hexseal products may be used, APM Hexseal does not guarantee the applicability of this information, or the suitability of APM Hexseal products. Customers are expected to perform their own evaluation to determine the suitability of APM Hexseal products for their specific purposes and applications.

# ALL NEW PRODUCTS FROM APM HEXSEAL®

**SNAPSEEL® BOOT for PUSHBUTTON SWITCHES** 

Compatible with Cole Hersee Momentary Switches

Part # 1211/71 12 Kit

Kit includes Snapseel® boot and 5/8-32 UN-2B shouldered mounting nut.

**HEAVY DUTY SEELOC® WASHERS** 

Capable of withstanding at LEAST 50% higher torque values than our original

Seeloc® Washers.

Part # Series 75XXX HD

Currently available in 1/2" and 1" Outer Diameter sizes.

Contact us for size options and availability.

## **X-ON Electronics**

Largest Supplier of Electrical and Electronic Components
