## NFS110 Series

Single \& Quad output

Total Power: 80-110 W
Input Voltage: 85-264 Vac
120-370 Vdc
\# of Outputs: Single, quad

## Special Features

- $7.0 \times 4.25 \times 1.8$ inch package
- Overvoltage and short circuit protection
- 110 W with 20 CFM
- Adjustable outputs
- EN55022, EN55011 conducted emissions level B
- UL, VDE and CSA safety approvals
- CE mark
- Available RoHS compliant
- 2 year warranty

## Safety

- VDE0805/EN60950/
- IEC950/IEC1010 File No. 10401-3336-0213
- Licence No. 40014677
- UL1950 File No. E132002
- CSA C22.2 No. 950 File No. LR41062C

## Notes

1 Convection cooled, 80 W maximum.
2 Peak outputs lasting less than 60 seconds with duty cycle less than 10\%. Total peak power must not exceed 110 W .
3 Forced air, 20 CFM at 1 atmosphere, 110 W maximum.
4 Figure is peak-to-peak. Output ripple is measured across a 50 MHz bandwidth using a 12 inch twisted pair terminated with a $47 \mu \mathrm{~F}$ capacitor.
5 Total regulation is defined as the static output regulation at $25^{\circ} \mathrm{C}$, including initial tolerance, line voltage within stated limits and output voltages adjusted to their factory settings.
6 To achieve stated regulation on the 24 V output on the NFS110-7602PJ, the following load condition must be true: $I_{A} / I_{B} \leq 5$, where:
$\mathrm{I}_{\mathrm{A}}=+5.1 \mathrm{~V}$ output current, and
$\mathrm{I}_{\mathrm{B}}=+24 \mathrm{~V}$ output current
The +24 V output will maintain $\pm 5.0 \%$ regulation under the following additional condition: $I_{A} \leq 5 \mathrm{~A}$.
7 Single output models have floating outputs which may be referenced as either positive or negative. Higher voltage supplies may be adjusted over a wide output voltage range, as long as the total output power does not exceed 80 Watts (natural convection) or 110 Watts (forced air).
8 Power fail detect not available on single output models.
9 Derating curve is application specific for ambient temperatures $>50^{\circ} \mathrm{C}$, for optimum reliability no part of the heatsink should exceed $90^{\circ} \mathrm{C}$ and no semiconductor case temperature should exceed $100{ }^{\circ} \mathrm{C}$.
10 Caution: Allow a minimum of 1 second after disconnecting the power when making thermal measurements.
11 Three orthogonal axes, random vibration, 10 minute test for each axis.
12 This product is only for inclusion by professional installers within other equipment and must not be operated as a stand alone product.
13 Recommend a minimum load of 11 W to achieve the design MTBF. See the derating curve on page 4.
14 Power failure detec is optional by including the suffix " $P$ " to the model number.
15 The 'J' suffix indicates that these parts are Pb-free (RoHS 6/6) compliant.
16 NOTICE: Some models do not support all options. Please contact your local Emerson Network Power representative or use the on-line model number search tool at http://www.PowerConversion.com to find a suitable alternative.

OPTIONAL POWER FAIL DETECT TIMING DIAGRAM

Power fail detect signal (Note 8)
$50 \mathrm{~ms} \leq \mathrm{T} 1 \leq 200 \mathrm{~ms}$
T2 will vary with line and load
$\mathrm{T} 3 \geq 3 \mathrm{~ms}$
Pout: 110W
PFD output is an open collector which will sink $\leq 40 \mathrm{~mA}$ in the low state.

## Mechanical Notes:

A Metallic or non-metallic stand-offs (maximum diameter 5.4 mm ) can be used in all four mounting holes without effecting safety approval.
B The ground pad of the mounting hole near J1, allows system grounding through a metal stand-off to the system chassis.
C The heat sink is grounded, and allows system grounding by mechanical connection to the system chassis.
D The supply must be mechanically supported using the PCB mounting holes and may be additionally supported by the heatsink mounting holes.
E It is always advisable to attach the power supply heat sink to another thermal dissipator (such as a chassis or finned heatsink etc). The resulting decrease in heat sink mounted component temperatures will improve power supply lifetime.
F A standard L-bracket and cover is available for mounting which contains all screws, connectors and necessary mounting hardware. The kit is available, order part number "NFS110CJ".
