## NFS110 Medical Series

 Single and quad outputTotal Power: 80-110 W
Input Voltage: 90-253 Vac 127-357 Vdc
\# of Outputs: Single, quad

## Special Features

- $7.0 \times 4.25 \times 1.8$ inch package
- Medical, dental and
laboratory applications
- Overvoltage and short circuit protection
- 110 W with 20 CFM
- UL, VDE and CSA safety approvals
- EN60601-1 and UL2601 medical approvals
- Available RoHS compliant
- 2 year warranty

## Safety

- VDE0805/EN60601-1/
- IEC60601/IEC1010
- File No. 10401-3336-1049
- Licence No. 2874
- UL60601-1 File No. E182560
- CSA C22.2 No. 125
- File No. LR41062C

## Notes

1 Convection cooled, 80 W maximum.
2 Peak outputs lasting less than 60 seconds with duty cycle less than 10\%. Total peak power must not exceed 110 W .
3 Forced air, 20 CFM at 1 atmosphere, 110 W maximum.
4 Figure is peak-to-peak. Output ripple is measured across a 50 MHz bandwidth using a 12 inch twisted pair terminated with a $47 \mu \mathrm{~F}$ capacitor.
5 Total regulation is defined at the static output regulation at $25^{\circ} \mathrm{C}$, including initial tolerance, line voltage within stated limits and output voltages adjusted to their factory settings. Also for NFS110-7902PJ, for 24 V output stated regulation $I_{A} / I_{B}{ }^{2} 5$. This output will maintain $\pm 5.0 \%$ regulation if $I_{A}{ }^{2} 5 \mathrm{~A}$, where $\mathrm{I}_{\mathrm{A}}=+5.1 \mathrm{~V}$ output current and $\mathrm{I}_{\mathrm{B}}=+24 \mathrm{~V}$ output current.
6 Single output models have floating outputs which may be referenced as either positive or negative. Higher voltage supplies, may be adjusted over a wide output voltage range, as long as the total output power does not exceed 80 Watts (natural convection) or 110 Watts (forced air).
7 Power fail detect not available on single output models.
8 Derating curve is application specific for ambient temperatures $>50^{\circ} \mathrm{C}$, for optimum reliability no part of the heatsink should exceed $90^{\circ} \mathrm{C}$ and no semiconductor case temperature should exceed $100^{\circ} \mathrm{C}$.
9 Caution: Allow a minimum of 1 second after disconnecting the power when making thermal measurements.
10 The user should read the PSU installation instructions in conjunction with the relevant national safety regulations in order to ensure compliance.
11 Three orthogonal axes, random vibration, 10 minute test for each axis.
12 This product is only for inclusion by professional installers within other equipment and must not be operated as a stand alone product.
13 The 'J' suffix indicates that these parts are Pb -free (RoHS 6/6) compliant. TSE RoHS 5/6 (non Pb-free) compliant versions may be available on special request, please contact your local sales representative for details.
14 NOTICE: Some models do not support all options. Please contact your local Emerson Network Power representative or use the on-line model number search tool at http://www.Emerson.com/EmbeddedPower to find a suitable alternative.

AC (J1) mating connector
Molex 09-50-3051 or Molex 09-91-0500 mating connector with 2478 or equivalent crimp terminals.

DC (J2) mating connector
Molex 09-50-3131 or Molex 09-91-1300 mating connector with 2478 or equivalent crimp terminals.

Power fail detect signal (Note 8)
$50 \mathrm{~ms} \leq \mathrm{T} 1 \leq 200 \mathrm{~ms}$
T2 will vary with line and load
$\mathrm{T} 3 \geq 3 \mathrm{~ms}$
Pout: 110W
PFD output is an open collector which will sink $\leq 40 \mathrm{~mA}$ in the low state.

Mechanical Notes
A Metallic or non-metallic stand-offs (maximum diameter 5.4 mm ) can be used in all four mounting holes without effecting safety approval.
B The ground pad of the mounting hole near J1, allows system grounding through a metal stand-off to the system chassis.
C The heat sink is grounded, and allows system grounding by mechanical connection to the system chassis.
D The supply must be mechanically supported using the PCB mounting holes and may be additionally supported by the heatsink mounting holes.
E It is always advisable to attach the power supply heat sink to another thermal dissipator (such as a chassis or finned heatsink etc). The resulting decrease in heat sink mounted component temperatures will improve power supply lifetime.
F A standard L-bracket and cover is available for mounting which contains all screws, connectors and necessary mounting hardware. The kit is available, order part number "NFS110CJ".
