## Panel Mount SMPS

## SPA Series

PRODUCT MANUAL

For your safety, read and follow the considerations written in the instruction manual, other manuals and Autonics website.
The specifications, dimensions, etc. are subject to change without notice for product improvement. Some models may be discontinued without notice.

## Major Features

- Stable power supply with minimal noise and ripple
- Built-in overcurrent protection circuit, output short-circuit protection circuit, overheat protection circuit, and overvoltage protection circuits (overvoltage protection: SPA075/100 only)
- EN 60950 (Safety of information technology equipment) compliant
- EN 50178 (Electronic equipment for use in power installations) compliant
- EN 61000-6-2 (EMC: Immunity for industrial environments) compliant
- EN 61000-6-4 (EMC: Emission standard for industrial environments) compliant
- Output voltage: $5 \mathrm{VDC}=-=, 12 \mathrm{VDC}=-=, 24 \mathrm{VDC}=-$
- Output power: $30 \mathrm{~W}, 50 \mathrm{~W}, 75 \mathrm{~W}, 100 \mathrm{~W}$
－Install the unit in the well ventilated place
－Do not use near the equipment which generates strong magnetic force or high frequency noise．
－In case of models using the user switching method for the input voltage selection， factory default is set to 220 V ．When switching over to 110 V ，remove the case of the product as below and select the voltage with the jumper switch within the range of the input voltage．

－This unit may be used in the following environments． －Indoors（in the environment condition rated in＇Specifications＇）
Altitude max．2，000 m
－Pollution degree 2
Installation category｜｜

## Ordering Information

This is only for reference，the actual product does not support all combinations． For selecting the specific model，follow the Autonics web site．

-10 to $50^{\circ} \mathrm{C}$（SPA－050－05，SPA－030－12，SPA－050－12：－ 10 to $40^{\circ} \mathrm{C}$ ）， storage：－ 25 to $65^{\circ} \mathrm{C}$（no freezing or condensation）
Ambient humidity 25 to $85 \%$ RH，storage： 25 to $90 \%$ RH（no freezing or condensation）
01）Since there is no separate input over－voltage protection for the voltage over the rated input voltage range， Supplying over－voltage may result in product damage．
2）It is in the rated input voltage $100 \mathrm{VAC} \sim$ with $100 \%$ load．
03）Use the output voltage adjusting volume within the voltage variable range．If the voltage exceeds the out－ put voltage range，overvoltage protection function is activated and the output is cut off．
04）Rate input voltage
SPA－030／ 050 series： $100-240 \mathrm{VAC} \mathrm{\sim}$（ $85-264 \mathrm{VAC} \sim$ ）with $100 \%$ of load
SPA－075／100 series：100－120／200－240（85－132／170－264 VAC～）with $100 \%$ of load
SPA－100－05 model：100－120／200－240 VAC～（ $100-132 / 190-264$ VAC $\sim)$ with $100 \%$ of load
05）It is for rate input voltage $100 \mathrm{VAC} \sim$ ．

## Dimensions

－Unit：mm，refer to the Autonics website for the details of the product．

|  |  | $050-24,075-12,075-24,100-24$ |

## Over-heating Protection

The over-heating protection function cuts off the output voltage when the temperature in an element increases due to over-heating.
When the over-heating protection function is activated, the product does not work properly. Please resupply power after cooling the product sufficiently.

## Output De-rating Curve by Ambient Temperature

$\square$ SPA-030-05, SPA-030-24, SPA-050-24, SPA-075-05, SPA-075-24, SPA-100-05, SPA-100-12, SPA-100-24

## $\square$ SPA-075-12

## Feature Data of Over-voltage Protection

To protect the connected load, the output is disconnected when the over-voltage is detected.
When the output is disconnected, apply the power after waiting at least 3 minutes.

- Not all models support this function. Check the specification before using.

## Feature Data of Over-current Protection

When the over rated current is flowed, the over-current protection circuit is operated to protect the product by reducing output voltage.
The protection circuit is released automatically when the load current is under the rated current.

- It is for the rated input voltage 100 VAC~ with $100 \%$ load.
