## Introduction

AVX's Varicon product range is available as two-piece input / output and board level connectors (intermateable plugs and receptacles). Varicon contacts are also available in strips, on disposable carriers, ready for staking to p.c. cards. They all use the famous, fork-like Varicon® (fixed) or Varilok® (insertable / removable) hermaphroditic contact design.

### VARICON DESIGN ADVANTAGES

AVX's hermaphroditic Varicon contact utilizes a fork-like design incorporating four large mating surfaces that are coined to achieve exceptional hardness and smoothness. The mating surfaces are wedged together by the spring-like design of the contact and by the innate properties of the contact material. The Varicon contact has proven its reliability in innumerable applications and with over one-million contacts being produced daily, billions of successful, trouble-free operating hours have been logged.

### FEATURES

- Four intimate contact areas, electrically parallel
- High current carrying capability, excellent heat dissipation
- Self-cleaning, wiping action burnishes contacting surfaces reducing constrictive resistance
- Low contact resistance 3 to 4 milliohms
- Stable in vibration and adverse environments
- High contact normal pressure achieved at low stress levels

### HIGH RELIABILITY

The mating surfaces provide a gas-tight connection and resists corrosion caused by adverse environments. This seal is made possible by the spring-like properties of the Varicon contact and by the smoothness of the coined mating surfaces. After being mated for years, the contacts still retain clean, unoxidized mating surfaces.

### LOW RESISTANCE

Because of the spring-like properties of the Varicon contact, both sides of the contact are always under considerable pressure when mated. Their sliding and wiping action burnishes the surfaces in a self-cleaning action reducing any constrictive resistance. The low contact resistance remains a permanent feature of the Varicon contact even after thousands of mating and unmating cycles.

### HIGH CURRENT CAPACITY

The low contact resistance contributes substantially to Varicon's high current-carrying capacity. Also, its heat-dissipating characteristics are enhanced by its flat configuration.

### SHOCK AND VIBRATION RESISTANCE

Should external forces cause any decrease in contact pressure between two of the four mating surfaces, it is automatically compensated by redistributing the contact pressure between the other two mating surfaces.

### ECONOMY

Varicon contacts are stamped from sheet stock instead of screw-machined. Consequently, this production method not only increases the production capacity but decreases production cost as there is little waste.

### VERSATILITY

The Varicon concept can be used in a card-mounted plug that mates with a receptacle, or Varicon contacts can be staked directly to a pc board and soldered into place. This latter method eliminates the need for a conventional plug reducing the cost of the connection system while retaining the proven reliability of the Varicon interconnection.

### CONTACT TYPES

Two basic sizes of our Varicon contact are available: standard and miniature Varicon. And each size has two major variations: the fixed Varicon contact and the Varilok insertable / removable version. The standard size is rated at 8 amps and has a withdrawal force range of 2 to 16 ounces per contact. The miniature size is specifically for high density applications and is rated at 5 amps with a withdrawal force of 2 to 8 ounces per contact. (For exact specifications, check the individual series listing.)

Miniature Varicon®

Standard Varicon®

## Introduction

---

### CONTACT MATERIAL

The primary contact material used is phosphor bronze. The electrical conductivity of copper alloys are extremely good. Within the Varicon concept, the contacts must also perform as springs and these alloys offer the elastic properties and the endurance required by today's rugged applications.

### CONTACT PLATING

A nickel underplate of 50 to 100 microinches, followed by a minimum of 10 microinches of gold plate is AVX's standard contact plating. The gold plate prevents the formation of insulating oxide films while the nickel plate provides a hard backing. It, in turn, reduces wear on the gold and prevents diffusion between the gold and base metal. Other plating thicknesses, such as those required by military specifications, can be supplied on request.

### VARILOK CRIMP-AND-INSERT CONTACTS

The crimp-termination, insertable / removable Varilok contact offers a solderless connection between wire and contact as well as strain relief for the wire. This contact snaps into the insulator quickly and easily. With our simple tool it can be removed without difficulty, yet it locks securely into place and cannot twist or bend out of alignment.

**Loose Varilok Contacts**

**Reel-Mounted Varilok Contacts**

Varilok contacts also are available with wire-wrappable, solder and taper-tab tail configurations. Available loose for small scale production and replacement purposes, the Varilok contact is also supplied on reels for use with fast, economical automatic crimping machines reducing man-hour requirements and production costs in medium and large-scale production runs. Because the contact can be crimped to the wire and installed into the insulator at any point during the manufacturing operation, it offers the user convenience and flexibility. Reels contain 1800 standard contacts or 3000 miniature contacts.

***All commercial Varicon products are RoHS compliant.***

## Introduction

### MINI-VARILOK

The Mini-Varilok is half the size of the standard Varilok contact. It's designed for hand or machine crimping to solid or stranded AWG #22 to #30 wire. Its basic features are identical to the standard Varilok however it also incorporates a decreased insertion force and is used for high density applications. Production methods for the Mini-Varilok are the same as the standard Varilok.

### CONTACT RETENTION

The Varilok contact, after undergoing five insertion / extraction cycles and being subjected to the vibration and shock tests of MIL-C-28731, still withstands an axial load in excess of 10 pounds (6 for mini-varilok).

### WIRE SIZE

The Varilok contact with its open crimp barrel conforms to practically all specifications written for screw-machined contacts with closed crimp barrels. The crimp barrel of the Varilok contact is designed to accommodate wire sizes AWG #18 to #26. It's also possible to crimp together two stranded #22 or smaller wires. The Mini-Varilok accommodates wire sizes AWG #22 to #30. Table I lists the various sizes of wire to which Varilok contacts can be crimped, and indicates the minimum conductor diameter and the maximum insulator diameter that can be accommodated by the contacts. The crimp barrel is also crimped to the wire's insulation for strain relief and the large, overlapping ears of the barrel accommodate a wide range of wire insulation sizes (Table I). For an optimum crimp connection, the insulation is stripped one-eighth inch from the end of the conductor.

**Table I  
Wire Sizes  
(AWG)**

(Ref: MIL-W-16878/4 – Type E wire)

| Single Wire    | Varilok | Mini-Varilok | Conductor Diameter (Nominal) | Insulator Diameter (Max. Overall) |
|----------------|---------|--------------|------------------------------|-----------------------------------|
| #18            | Yes     | No           | .048                         | .074                              |
| #20            | Yes     | No           | .038                         | .062                              |
| #22            | Yes     | Yes          | .030                         | .054                              |
| #24            | Yes     | Yes          | .024                         | .048                              |
| #26            | Yes     | Yes          | .019                         | .043                              |
| #28            | No      | Yes          | .015                         | .039                              |
| #30 (Stranded) | No      | Yes          | .012                         | .036                              |

### CRIMP CHARACTERISTICS

The illustration shows an enlarged cross-section of a typical Varilok crimp on a #22 stranded wire. No significant voids are visible. The complete deformation of the wire strands indicates optimum contact between the contact barrel and the conductors.

### TENSILE STRENGTH

Table II lists the values, in pounds, of tensile strength (wire pull-out force) for Varilok and Mini-Varilok contacts crimped to stranded AWG #18 to #30 wires.

**Table II  
Tensile Strength  
(In Pounds)**

| Wire Size (AWG) | #18 | #20 | #22 | #24 | #26 | #28 | #30 |
|-----------------|-----|-----|-----|-----|-----|-----|-----|
| Stranded Wire   | 40  | 25  | 15  | 10  | 5   | 3   | 1.5 |

### CRIMPING EQUIPMENT

All equipment needed to crimp Varilok and Mini-Varilok contacts is normally available from stock. Crimping equipment for production crimping as well as hand-operated crimping pliers are designed to realize the full electrical, mechanical and economical advantages of the Varilok and Mini-Varilok contact.

## Series 7008 – 0.100" Staggered Dual Row

### FEATURES

- Available with or without card guides
- Sizes 17, 23, 29, 35, 41
- Wide range of contact terminations
- For 1/16" thick PCB
- Polarization insert
- Mates with Series 7000 and 7022 Plugs

### TECHNICAL SPECIFICATIONS

**Current Rating:**  
10 amperes

**Contact Resistance:**  
6 milliohms, maximum

**Contact Material and Plating:**  
Phosphor Bronze per QQ-B-750, Composition A.

Gold, 10 microinches minimum, over nickel, 30 to 100 microinches

**Insulator Material:**  
Diallyl phthalate, glass-filled, flame resistant, per MIL-M-14F, Type SDGF.

**Insulation Resistance:**  
25,000 megohms, minimum

**Dielectric Withstanding Voltage:**  
Sea Level: 2000 Volts rms  
3.4" Hg: 675 Volts rms

**Insertion/Withdrawal Force:**  
2 to 16 ounces per contact

**Operating Temperature:**  
-40°C to +125°C

### P.C. CARD LAYOUT

### CHASSIS MOUNTING

## Series 7022 – 0.100" Staggered Dual Row

### FEATURES

- Insulator rigidity reduces p.c. card warp
- Insulator maintains exact spacing between contacts
- Reduces cost of card punching operation (fewer holes)
- Reduces cost of contact staking operation (one operation instead of two)
- Reduces assembly time (no plastic strip to remove)
- For 1/16" or 3/32" p.c. card
- Mates with Series 7000 Receptacles with or without card guides

### TECHNICAL SPECIFICATIONS

**Current Rating:**  
10 amperes

## Series 7024 – 0.100" Staggered Dual Row

### FEATURES

- Guide sockets facilitate mating, ensure correct alignment
- Open-ended card slot; use with p.c. card of any width
- Wide range of contact terminations
- Sizes 17, 23, 29, 35, 41
- For 1/16" or 3/32" p.c. card
- Mates with Series 7023 Plug

### TECHNICAL SPECIFICATIONS

**Current Rating:**  
10 amperes

**Contact Resistance:**  
6 milliohms, maximum

**Contact Material and Plating:**  
Phosphor Bronze per QQ-B-750, Composition A.

Gold, 10 microinches minimum, over nickel, 30 to 100 microinches

**Insulator Material:**  
Diallyl phthalate, glass-filled, flame resistant, per MIL-M-14F, Type SDGF.

**Insulation Resistance:**  
25,000 megohms, minimum

**Dielectric Withstanding Voltage:**  
Sea Level: 1800 Volts rms  
3.4" Hg: 675 Volts rms

**Insertion/Withdrawal Force:**  
2 to 16 ounces per contact

**Operating Temperature:**  
-40°C to +120°C

# Varicon®

## Series 7038 – 0.100"

### Staggered Dual Row

## FEATURES

- Varilok® contacts are insertable and removable by user
- Crimp, solderless wrap, tapered tab, and wire hole terminations available
- All crimping, insertion, and extraction equipment available (see page 26)
- Guide sockets facilitate mating, ensure correct alignment
- Open-ended card slot; no p.c. card notching necessary
- Mates with Series 7023 Plug

## TECHNICAL SPECIFICATIONS

### Current Rating:

8 amperes

### Contact Resistance:

6 milliohms, maximum

### Contact Material and Plating:

Phosphor Bronze

Gold, 10 microinches minimum, over nickel, 50 to 100 microinches

### Insulator Material:

Diallyl phthalate, glass-filled, flame resistant, per MIL-M-14F, Type SDGF.

### Insulation Resistance:

5,000 megohms, minimum

### Dielectric Withstanding Voltage:

Sea Level: 1800 Volts rms

3.4" Hg: 675 Volts rms

### Insertion/Withdrawal Force:

2 to 16 ounces per contact

### Operating Temperature:

-40°C to +120°C

**MOUNTING LAYOUT**

## Series 8016 – .075" x .130" x .150" Grid Pattern

### FEATURES

- Available in five sizes: 20, 38, 56, 90 and 120 contacts
- Insertable / removable Varilok contacts
- Crimp, solder, solderless wrap, and taper tab terminations
- Exceptional versatility: all hardware can be mounted on plug or receptacle (see ordering code)
- Actuating screw facilitates mating and unmating, locks mated connectors together
- Polarizing hardware can be set to any of six positions at factory; can also be reset by user (see polarizing code)
- Optional cover with top or side cable entry and clamp
- Optional cable strain relief clamp with adjustable strap for large or small cable bundles (fits on sizes 38 and 56)
- Plug and receptacle contacts are protected from mishandling
- Guide pins and sockets ensure correct alignment when mating
- Aluminum covers
- CSA acceptable polyester material

### TECHNICAL SPECIFICATIONS

**Current Rating:**

8 amperes, maximum

**Contact Resistance:**

6 milliohms, maximum

**Contact Material:**

Phosphor bronze

**Contact Plating:**

Gold, 10 microinches min.,  
over Nickel,  
50-100 microinches

**Insulator Material:**

Thermoplastic 94V-O glass  
filled polyester

**Insulation Resistance:**

5,000 megohms, min.  
(polyester)

\* Indicates standard contact

Plating code 343 = 0.50 µm Gold all over

\*\* Order code to be used when purchasing through a USA source.

## CONNECTOR POLARIZATION

Varicon® 8016 Series connectors are designed with an integral polarizing system to ensure in high density environments that the correct halves are mated together.

As a factory standard, male plugs are set to the code PG1G1, with the female receptacles being set to the opposite matching code RS1S1.

Customers who need to change the standard polarization to another position can do so by ordering the connectors with the required polarization (eg: PG1G4 or RS2S5, etc) When ordering a different polarization from normal, the polarization is called out at the end of the part number (Ex: 00 8016 056 000 601PG2G4, etc).

## ORDERING CODE

## Tools

### CONTACT INSERTION TOOLS

These are small hand tools which provide a positive method for inserting contacts into the rear of the insulator by applying pressure on the contacts directly to the end of the insulation crimp.

| Tool                | Contact Capability         | Connector Series       |
|---------------------|----------------------------|------------------------|
| 06 1742 0400 00 000 | Varilok®                   |                        |
|                     | No. 60 8017 Contact Family | 7038, 8016, 8017, 8020 |

### HAND CRIMP TOOLS

This tool is designed for hand crimping of contacts. The tool is well suited for maintenance, model shop, laboratory and small scale production purposes. Two crimping cavities are available; Upper Cavity will crimp wire 18-20 AWG and the Lower Cavity will crimp wire 22-26 AWG.

| Part No.                             | Contact Capability | Wire Type & Size |
|--------------------------------------|--------------------|------------------|
| 06 7852 0100 00 000<br>(Standard)    | Varilok®           | Stranded AWG     |

|                                      | No. 60 8017 0313   | No. 18-26        |
| 06 7858 01 000 0000                  | Mini Varilok®      | Stranded AWG     |
|                                      | No. 60 8216 0313   | No. 22-30        |

### CONTACT EXTRACTION TOOLS

This tool is designed to extract contacts from the front of the insulator quickly and easily, without damage to either contacts or insulator.

| Tool                | Contact Capability         | Connector Series       |
|---------------------|----------------------------|------------------------|
| 06 1877 0400 00 000 | Varilok®                   |                        |
|                     | No. 60 8017 Contact Family | 7038, 8016, 8017, 8020 |
| 06 7699 01 000 0000 | Mini Varilok®              |                        |
|                     | No. 60 8216 Contact Family | 8223                   |

## Series 8020 – Cable Connector

### APPLICATION

In line connection of 2 or 3 wire of 18-26 AWG, insulation  $\phi$ 1.03 mm to 1.88 mm.

### FEATURES AND BENEFITS

- 2 and 3 position in single row
- Uses identical molding for plug and socket
- Uses identical contact for plug and socket
- Uses standard Varicon 8016 contacts
- Uses standard Varicon Crimping Tools, Contact Extraction Tools and Insertion Tools
- Has combined nylon mounting and locking clip common to both sizes
- Contacts for both solder and crimp termination

### TECHNICAL SPECIFICATIONS

**Contact:**

Single row of 2 or 3 Varilok contacts

**Contact Rating:**

8.5 amperes

**Insulation Resistance:**

5,000 megohms (min)

**Configuration:**

On a 0.200 inch pitch, 5.08 mm

**Contact Resistance:**

6 milliohms (max)

**Voltage Proof:**

2,500 volts R.M.S. Sea Level

### CONNECTOR DIMENSIONS (mm)

### LOCKING CLIP DIMENSIONS (mm)

## Series 8218 – 0.050" Staggered Dual Row

### FEATURES

- High contact density
- For parallel or perpendicular p.c. card mounting
- High mounting density (.050" centers, minimum)
- Nylon end sections for mounting and card guidance
- Mounting hardware supplied with connector
- Mates with 8219 Series

### TECHNICAL SPECIFICATIONS

**Current Rating:**

5 amperes, maximum

**Contact Resistance:**

0.005 ohm, maximum

**Contact Material and Plating:**

Phosphor Bronze  
nickel plate, 30 to 50 microinches followed by  
gold plate, 10 to 20 microinches

**Insulator Material:**

Diallyl phthalate, glass-filled, flame resistant,  
end guides: nylon

**Insulation Resistance:**

5,000 megohms, minimum

**Dielectric Withstanding Voltage:**

Sea Level: 1000 Volts rms  
3.4" Hg: 500 Volts rms

**Insertion/Withdrawal Force:**

2 to 16 ounces per contact

## Series 8219 – 0.050" Staggered Dual Row

### FEATURES

- For p.c. card-to-card applications
- High contact density
- Low withdrawal force contacts
- Rugged, color coded end guides
- Parallel or perpendicular p.c. board mounting
- Mates with Series 8218

### TECHNICAL SPECIFICATIONS

**Current Rating:**

5 amperes, maximum

**Contact Resistance:**

6 milliohms, maximum

**Contact Material and Plating:**

Phosphor Bronze

Gold, 10 microinches minimum,  
over nickel, 50 to 100 microinches

**Insulator Material:**

Diallyl phthalate, glass-filled, flame resistant per MIL-M-14F, Type SDGF.

**Guidance Hardware:**

Left hand guides: Metal, gold color  
Right hand guides: Metal, silver color

**Insulation Resistance:**

5,000 megohms, minimum

**Dielectric Withstanding Voltage:**

Sea Level: 1000 Volts rms

3.4" Hg: 500 Volts rms

**Insertion/Withdrawal Force:**

2 to 8 ounces per contact

## RECEPTACLE 001 MATES WITH PLUGS 002 AND 005

### PLUG - VARIATION 002

### PLUG - VARIATION 005

## MOUNTING LAYOUTS

\*When used in metal panel with Code Contact 722 cut out diam. Is .210".

## Series 8223 – 0.100" Dual Row Square Grid

### FEATURES

- Wide range of contact terminations including wire wrapping, P.C. solder tail, wire hole, wire crimp
- For 1/16", 3/32" P.C. card
- Polarity and keying are built into the connector body to prevent mismatching
- Perpendicular or parallel connector mounting
- Proven Varicon® contact reliability
- Protected male; recessed female contacts

### TECHNICAL SPECIFICATIONS CONTACTS

**Current Rating:**  
5 amperes with 22 AWG wire

**Contact Resistance:**  
6 milliohms, maximum

**Contact Material and Plating:**  
Phosphor Bronze  
Nickel plate, 50 to 100 micro-inches, followed by gold plate.  
10 microinches minimum

### INSULATORS

**Material:**  
Diallyl Phthalate, glass-filled, flame resistant, per MIL-M-14-F, Type SDGF

**Insulation Resistance:**  
5,000 megohms, minimum

**Dielectric Withstanding Voltage:**  
Sea Level: 1,000 Volts rms

**Insertion/Withdrawal Force:**  
2 to 8 ounces per contact

### ORDERING CODE

00

8223

024

000

001

**Number of Contacts**  
024, 048, 072 & 096

**Contact Code**

**Variation Code**

Use three digit code number when contacts are to be factory installed. If contacts are to be supplied loose, or contact tails to be formed, use three zeros (000) in contact code section. Note that the wire crimp tail contacts can only be ordered as separate items by part numbers.

## Contact Strip

### FEATURES

- Contacts supplied imbedded in vinyl strips, correctly spaced and ready for insertion and staking into p.c. card
- For 1/16" thick p.c. cards
- Mates with Series 7000 Receptacles

### TECHNICAL SPECIFICATIONS

**Current Rating:**  
10 amperes

**Contact Resistance:**  
6 milliohms, maximum

**Contact Material and Plating:**  
Phosphor Bronze per QQ-B-750, Composition A.

†Gold, 10 microinches minimum, over nickel, 30 to 100 microinches

**Insertion/Withdrawal Force:**  
2 to 16 ounces per contact

**Contact Resistance:**  
0.006 Ohm, maximum

**Contact Material and Plating:**  
Phosphor Bronze  
Gold, 50 microinches minimum,  
over nickel, 50 to 100 microinches

**Insertion/Withdrawal Force:**  
2 to 16 ounces per contact

- Contacts – Contacts are available on four spacings; each spacing has a corresponding maximum number of contacts. Fewer contacts can be ordered.
  - .200" spacing with a max. of 60 contacts per strip
  - .150" spacing with a max. of 80 contacts per strip
  - .125" spacing with a max. of 90 contacts per strip

## Perpendicular Cards – Pad Spacing .100"

### FEATURES

- For 1/16" and 3/32" thick p.c. cards
- Contacts supplied imbedded in vinyl strips, correctly spaced and ready for insertion and staking into p.c. card
- Complete set of plug contacts supplied on two disposable plastic strips, one for upper-tier contacts, the other for lower-tier contacts
- Efficient and economical installation equipment includes staking and strip removal tools for all applications
