

IQS624EV04 Overview

Hall effect angle sensor with dual channel capacitive proximity/touch controller

The IQS624 ProxFusion® IC is a multifunctional capacitive, inductance and Hall Effect sensor designed for applications where any or all of the technologies may be required. The two Hall-effect sensors calculate the angle of a magnet rotating parallel with the IC. The IQS624 is an ultra-low power hall-effect rotation sensor. The sensor is fully I²C compatible and on-chip calculations enable the IC to stream the current angle of the magnet without extra calculations.
