Table 1: Cable Type

Fig. 1: Cable Overview

Suitability for Drag Chain Applications

All cables mentioned in this document have been tested and declared suitable for use in drag chain applications. For test conditions, see Fig. 2. The cables are guaranteed for 1 million bending cycles.

The bending radius influences the number of bending cycles.

A bending radius larger than the one used during testing, leads to an increase in the number of bending cycles. A smaller bending radius has the opposite effect and results in a lower number of bending cycles.

Read the camera User's Manual including the safety warnings before connecting the cable to the camera. The User's Manual also contains further information about pin assignments, power requirements, as well as comprehensive information about installing and using the camera.

You can download the User's Manual and related documents for your camera free of charge from the Basler website: www.baslerweb.com.
