Special Features

- Wetted parts in acid-proof, stainless steel and PEEK
- Compact, food compatible, hygienic design
- Hygienic connections conform to 3 A standards, FDA demands and EHEDG guidelines
- Precise switching point without calibration
- Process temperature $-40 \ldots . .200^{\circ} \mathrm{C}$
- Measures media with

DK-values >1.5
(DK = Dielectrical Constant)

- Not influenced by foam
- LED switch indicator
- Maintenance free
- Suitable for media separation measurement
- Configurable by FlexProgrammer 9701
- ATEX approval for gas and dust

The drawing shows how the sliding connection can be used for at least 4 applications:

1) Mounted at the top of a tank to adjust to a maximum level.
2) Serving as a cooling neck in high media temperature applications.
3) Adjusted to place the sensor tip deeper inside the tank.
4) To reach in through insulation material.

It is essential that the max. ambience temperature for the electronics is never exceeded. For ATEX approved products please refer to table 1.

Example, how to read Curve 1:
A 250 mm sliding connection is mounted in a tank with a total insert length of 150 mm . Hence the external length of the sliding connection will be 250-150 = 100 mm .
The media temperature will be max. $160^{\circ} \mathrm{C}$.
Read the x-axis at 100 mm an the y-axis at $160^{\circ} \mathrm{C}$ and find that the ambient temperature must be kept below $50^{\circ} \mathrm{C}$. In case the radiated heat from the tank will cause a higher ambient temperature at the housing efficient insulation of the tank must be established

The working conditions for the sliding connection in different media temperatures and specified ambient temperatures can be found in curve 1.

Accessories - Overview

## Ex ia G - Installation

A Level Switch LFFS-1xx is Ex ia IIC T5, ATEX II 1G approved for application in hasardous areas in accordance with the current EUdirectives. The product must be installed in accordance with prevailing guidelines for zone 0 with a barrier.

## Ex tD - Installation

A Level Switch LFFS-2xx is Ex tD A20 IP67 T100 ${ }^{\circ} \mathrm{C}$, ATEX II 1D approved for application in hasardous areas in accordance with the current EU-directives. The product must be installed in accordance with prevailing guidelines for zone 20 without a barrier.

## Ex ia G, Ex nA G - Installation

A Level Switch LFFS-3xx is Ex nA II T5, ATEX II 3G approved for application in hasardous areas in accordance with the current EUdirectives. The product must be installed in accordance with prevailing guidelines for zone 2 without a barrier.

${ }^{(1)}$ The 3A mark and the EHEDG certifcate is valid only when the product is mounted in a 3A marked or EHEDG certified counter part and installed according to the installation manual. Use also a 3A marked O-ring or gasket if relevant. The 3A marked products conforms to the 3A Sanitary Standard criteria. Materials and surfaces fulfill the FDA demands and are certified by EHEDG.
${ }^{(2)}$ Certified by EHEDG. Fulfills the FDA demand.
EPDM O-rings supplied with 3A marked products are conform to Sanitary Standard Class II (8\% milk fat max.)
EPDM gaskets supplied with 3A marked products are conform to Sanitary Standard Class I (8\% milk fat max.)
Refer to the 3A marked counter parts in the data sheet "Accessories Universal".

The washer ring kit for sliding connection, type no. 44018001
Can be ordered separately.
Baumer recommended to replace this kit if deformed.
