Wzzard™ Mesh Wireless Sensors – for Industrial Applications

Wireless Connectivity Where You Need It

The Wzzard™ intelligent wireless sensor platform creates a complete, quick and easy connectivity stack between your sensors and application – on your network or the Internet. The platform uses Wzzard mesh sensor edge nodes and a wireless 802.15.4e SmartMesh IP network to transmit sensor data to a SmartSwarm Gateway. The gateway can connect to the Internet via wired connections or cellular data networks and communicate with application platforms using the MQTT IoT protocol and JSON data formats.

Wzzard mesh wireless sensor nodes can accommodate virtually any industry-standard external sensors. Connections can be made via M12 connector or conduit fitting. The nodes provide a wide variety of sensor interface options, including general purpose analog input, digital input/output and thermocouple. All nodes contain an internal temperature sensor.

Secure, Reliable and Highly Scalable Wireless Networking

The 802.15.4e Wzzard platform uses mesh networking and time-synchronized channel hopping to provide up to 99.999% connectivity, even in the most demanding RF environments. New nodes may be added at any time and the SmartMesh IP network will dynamically self-configure as new nodes are added or removed.

Easy Configuration and Installation

Configuration of the Wzzard sensor platform is easy via the SmartSwarm Gateway. Nodes can be configured with scaling information, eng. units, friendly names, geo-location and other descriptive information.

The platform simplifies physical installation, too. Nodes can be attached to any surface via mounting ear flanges and screws or the embedded magnetic base. Magnetic mount is convenient for RF link location determination or other purposes. (Permanent use of the magnetic mount is not approved for UL installations.) The IP67 rated, fiber reinforced polyester PBT housing makes the units deployable in any industrial or commercial environment.

Intelligence at the Network Edge

The Wzzard wireless platform places intelligence at the network edge. The Wzzard mesh wireless sensor nodes can be configured to communicate data only when specified threshold or alert levels are exceeded. When reporting, they can associate useful information like geo-location, device name and uptime. This eliminates unnecessary network traffic, eases the processing burden on upstream resources and cuts the cost of cellular data plans when the gateway is using the cellular data network. Thanks to low-power wireless technology and programmable time synchronization, the Wzzard mesh wireless sensor nodes can operate for many years on battery power.

PRODUCT FEATURES

- + Ultra-low power 802.15.4e SmartMesh® IP technology
- + Communicates with SmartSwarm-342 gateway via scalable and reliable wireless mesh networks
- + Connect to most any industry standard sensors
- + Rugged, IP67 rated, fiber reinforced polyester PBT enclosure
- + MQTT and JSON IoT protocol to application platform
- + Sensor interface cable and antenna included
- + UL Listed C1/D2 for hazardous locations (conduit models only)

SPECIFICATIONS

POWER	
Internal	(2) 3.6V 2400 mAh Lithium Thionyl Chloride AA Batteries
Battery Life	>5 years – based on 1 min. sensor sampling and reporting
Optional External Input Voltage	10-30 VDC @ 40mA peak
SENSOR POWER OUT	
Switched Vbat	Battery Power – Turned on at time of measurement (20 mA max)
Switched Vref	3.3V (+/- 0.1%) – Turned on at time of measurement (20 mA max)
MECHANICAL	
Connection Options	Conduit (UL Type 3 outdoor approved): 12.7mm (0.5 in) - includes (1) one sensor interface cable - 8-pin 26-gauge wire harness, 1.8 m (6 ft) (Model# BB-WSCACO-6) M12 connector (Not UL rated for outdoor installations.)
Sensors	Analog Input (0 -10 VDC, 0 - 20 mA, 4 - 20 mA) Digital Input (0 - 48 VDC) Digital Input Frequency 1-1K Hz (accuracy +/- 1 Hz) Digital Input Counter Integrated Temperature Thermocouple (J, K, N, R, S, T, B, E) Digital Output, Sinking, up to 100mA @ 30VDC
External Antenna (included)	RP-SMA, Omni-directional, 3.8 dBi, 2.4 GHz (included) Dimensions: 194 mm (7.64 in)
Mounting Options	(4) Mounting Ears, M5 (#10) screws (UL approved option) Magnetic Mounting (via internal enclosure magnet) Pull Force 2.13 kg (4.7 lb) Note: Magnetic mounting (all models) not rated for UL installations.
Enclosure	IP67 rated fiber reinforced polyester PBT
Weight	0.34 kg (0.75 lb)
TECHNOLOGY	
Wireless	802.15.4e, SmartMesh IP
Protocols	MQTT, JSON
LED	Network Connectivity
ENVIRONMENTAL	
Installation	Indoor/Outdoor Note: M12 models are rated for outdoor use (except in UL installations).
Operating Temperature	-40 to +80 °C (-40 to +176 °F)
Storage Temperature	-40 to +85 °C (-40 to +185 °F)
Operating Humidity	0 to 95% Non-condensing
WIRELESS SECURITY	
Device Authentication	
128-bit, AES-based Encryption	– with multiple keys
Message Integrity Check (MIC)	
Synchronized Key Changeovers	
Customized Key Rotation
