The **ESWGP206-2SFP-T** is an Industrial PoE+ Ethernet switch that complies with IEEE 802.3at standards. It provides four PoE+ 10/100/1000Mbps copper ports supplying up to 30W of power to PD devices such as CCTV and WI-FI. Two 1000Mbps SFP ports are available to support gigabit fiber.

The ESWGP206-2SFP-T also provided remote PD reset function to help eliminate the cost of sending personal to site. Unmanaged and easy to install in a variety of Ethernet applications, it provides PoE+, dual power inputs, wide temperature and an SFP form factor. The ESWGP206-2SFP-T is designed to work in hard to reach and harsh environments.

Power over Ethernet PoE+ 802.3at provides 30W of power per port and is backwards compatible with 802.3.af devices. The switch detects and classifies a PD device before providing the required power to the PD device. PoE power simplifies the installation of PD devices by eliminating the need for additional cable and power supplies.

Dual Power Input: To reduce the risk of power failure, the ESWGP206-2SFP-T provides two 24 to 52 VDC power inputs. If the power fails, the switch will automatically use the secondary power input.

Flexible Mounting: The switch features a space saving IP30 metal enclosure that can be DIN or Panel mounted.

Small Form-factor Pluggable (SFP) Port: The SFP Port provides flexibility when planning a network. The slot can accept any MSA-compliant SFP module. Gigabit fiber types for SM,MM & SSF.

Wide Operating Temperature: With an operating temperature of -40 to 85°C (-40 to 185°F), this switch is suitable for use in some of the harshest industrial environments.

Remote PoE+ Reset: Dip switch selectable, the PoE+ reset works on fiber loss off signal on both slots. PoE+ reset is an advanced function that, when enabled, will force the PSE output power to reset when LINK state is lost on the SFP ports

Easy Troubleshooting: LED indicators allow you to quickly diagnose
