

## BeagleBone<sup>®</sup> AI

Fast Track to Embedded Artificial Intelligence

### What is BeagleBone<sup>®</sup> AI?

Built on the proven BeagleBoard.org<sup>®</sup> open source Linux approach, BeagleBone<sup>®</sup> AI fills the gap between small SBCs and more powerful industrial computers. Based on the Texas Instruments AM5729, developers have access to the powerful SoC with the ease of BeagleBone<sup>®</sup> Black header and mechanical compatibility. BeagleBone<sup>®</sup> AI makes it easy to explore how artificial intelligence (AI) can be used in everyday life via the TI C66x digital-signal-processor (DSP) cores and embedded-vision-engine (EVE) cores supported through an optimized TIDL machine learning OpenCL API with pre-installed tools. Focused on everyday automation in industrial, commercial and home applications.
