In addition to our complete line of RF connectors, we offer a wide selection of products to meet the latest High-Definition TV, Cable TV, Satellite, DVD and Audio/Video standards, including the introduction of our new line of waterproof Compression Connectors. These connectors are designed to offer the highest quality data transmission for audio, video and data applications, and are available for RG-59 and RG-6 cable in BNC, 'F' and RCA versions.

Our BNC and RCA compression connectors are constructed of nickel plated, machined brass, with a gold plated center pin allowing the best conductivity while providing picture perfect video and superior sound quality. Our RCA connectors, with five colors to choose from, accommodate both Standard and High-Definition composite or component video connections, and our 'F' connectors consist of a smooth spin nut for easy finger tip installation. A GOLD Series of compression connectors

Compression

All three styles have an inner 'O' ring and a built-in plastic cable adapter which allows one connector to terminate regular, tri- and quad-shield cables and provides a water-tight double seal.

TERMINATION INSTRUCTIONS

IMPORTANT FOR PROPER
INSTALLATION OF CONNECTORS

TWIST-ON BNC/TNC

1. Trim cable as shown. Taking care not to nick the center conductor or outer braid.

2. Twist the outer braid in a clockwise direction in such a manner that at least 1/32 of inner dielectric is bared and the braid is left flat. (stray or loose braid can cause shorts)

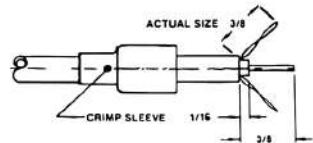

Back end of connector and inner dielectric flush. center conductor is now in place.

4. Firmly push the cable home as far as possible, then screw the connector on the cable in a clockwise direction until it stops.

3. Gently insert the center conductor down into the back end of the connector feeling it into the guide hole. When center conductor is not in place approx. 1/8" of center conductor will show.

TWO-PIECE CRIMP BNC/TNC

1. Run crimp sleeve down cable.
2. Trim cables as shown, taking care not to nick outer braid.
3. Insert center conductor into the guide hole in the rear of the connector. Then screw the connector on the cable in a clockwise direction

CABLE HOMED

CRIMPED SLEEVE

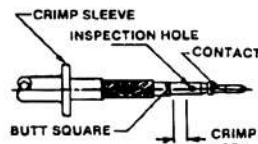

4. Push crimp sleeve into place, sandwiching the braid between the connector and sleeve.

5. Crimp the sleeve into place with the proper crimp tool.

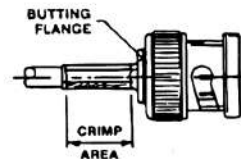

THREE-PIECE CRIMP BNC/TNC

1. Trim cable as shown. Taking care not to nick the inner conductor or braid.

2. Slip crimp sleeve over cable. Place inner conductor into contact. Note that the end of contact and inner dielectric must be butting and square. Crimp with appropriate tooling.

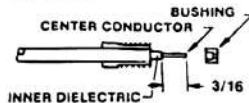

3. Flair outer braid and gently but firmly push the contact into the connector housing until a gentle snap is felt, indicating the contact is in place. Slip the crimp sleeve in place, butting the flange against the connector body and crimp with appropriate tooling.

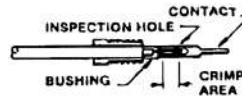

MINI BNC THREE-PIECE CRIMP

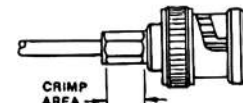

1. Slip support sleeve over cable, and trim jacket as shown, taking care not to nick the shielding braid.

2. Flair braid and lay it in position over the sleeve as shown, Trim away the inner dielectric taking care not to nick the center conductor.

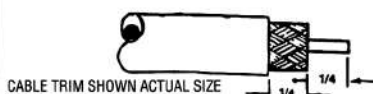

3. Place the bushing and contact in place on the cable and keeping the assembly snugly in place, crimp the contact with appropriate tooling.

4. Gently but firmly push the contact into the connector housing until a gentle snap is felt, indicating the contact is in place, crimp the connector together with appropriate tooling.

USED ON 27-9241, 27-9296, 27-9270, 27-9105

N-TWIST-ON

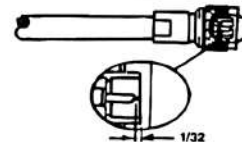

1. Trim cable as shown, taking care not to nick the center conductor or outer braid. Make sure that the outer braid lays flat. Trim any loose braid which can cause shorts.

USED ON 26-8019

2. Twist the contact in a clockwise direction on the inner conductor till the back end of the contact is flush with the inner dielectric.

3. Twist the connector onto the cable in a clockwise direction. The connector is properly installed when the end of the contact is positioned within 1/32" of the front edge of the connector.

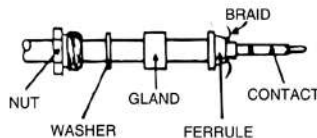

*To aid in twisting on contact insert paper clip in thru hole.

N-SOLDER CLAMP

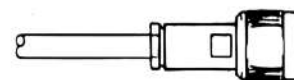

1. Trim cable as shown, taking care not to nick the center conductor or outer braid.

USED ON 26-8000, 26-8001, 26-8002, 26-8025, 26-8026, 26-8027

2. Run nut, washer, gland and ferrule over the cable, and flair the braid over the ferrule. Solder or crimp the contact to the center conductor.

3. Push the center contact home into the body assy., feeling it snap into place, and with all the loose components in place complete the assembly by wrench tightening the nut.
