Coax/Triax Adapters
Interface Solutions for Test Environments and Communication Systems

Today's complex cabling systems often incorporate the use of different cable types. The need to interface triax to SMA or SMP coax connectors often comes up in test environments and communication systems. Trompeter offers a complete line up of adapters to provide high quality signal integrity when moving from one cable type to another.
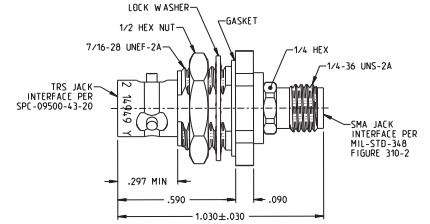

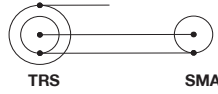

Features

- All metallic parts are machined/formed to extremely close tolerances
- All bodies are made of top quality brass with nickel-plated nontarnish finish
- Fully enclosed, heat-treated, beryllium-copper outer conductor spring (not half hard slotted brass)
- Heat-treated, beryllium-copper center socket contact with 50 microinches gold plating

Part No: 305-1932

Part No: 3-0347

Part No: 3-0349

Part No: 3-0350

Part No: 3-0351
