Description

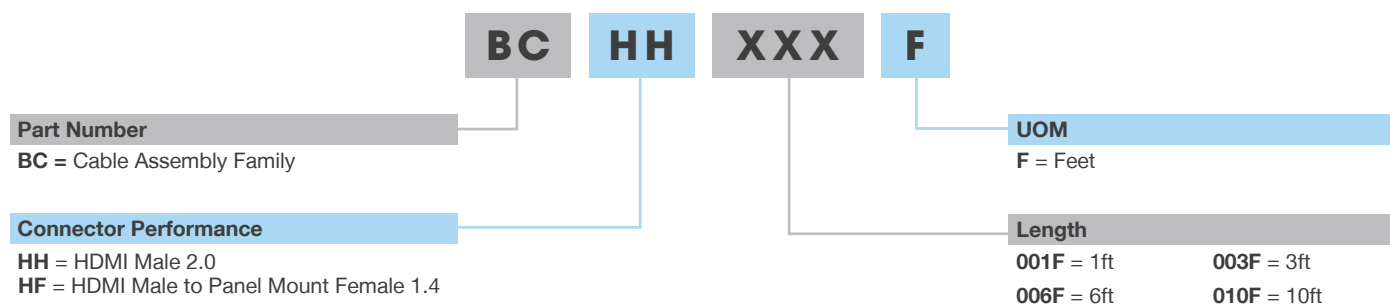

Bel's HDMI cable assemblies support standard enhanced or high-definition video plus multi-channel audio on a single cable. HDMI technology is an industry-supported, evolving standard that combines video and audio into a single digital interface used in many audio-visual technologies including televisions, screens and displays for IoT applications. The HDMI cable assemblies feature gold-plated connectors to provide superior transmission, high reliability, and durability. The HDMI male to female assemblies features a panel mount design to provide a secured HDMI connection on faceplates or panels.
