

18th November 2011

With immediate effect, we will be changing the colour of the epoxy resin that we use to build our connectors from blue to black. This change is required as the blue pigment previously used for our epoxy has been discontinued. The new black epoxy resin is to the same material specification as the blue epoxy and is procured from the same source. The change in colour is purely esthetic and will not affect the product functionality.

X-ON Electronics

Largest Supplier of Electrical and Electronic Components
