

# FXP7000 Series AC-DC Power Supply

## Key Features & Benefits

- Three-Phase AC Input
- Suitable for 3U or 5U Height Mounting
- Single-Wire Current Share or Droop Current Share
- Remote Voltage Adjust and Current Monitoring
- Overtemperature, Overload and Overvoltage Protection
- LED Supply Status Indicators
- Current Share Control for up to 30 Units
- Standard & Customized Rack Adaptors Available
- Front Panel Selectable-Input-Range
- RoHS Compliant

The FXP7000 Series of rack-mounted power systems provides AC front-end capability to automatic test equipment, telecom, data communications, and other distributed power designs. The hot-pluggable FXP supplies do not include an output isolation diode and may be paralleled up to 210 kW of total output power. These supplies provide excellent protection against input voltage transients.

Access to interfaces for remote sensing, remote voltage adjust, current sharing, current monitoring, power supply status, standby voltage and inhibit, as well as power connections, is through a connector at the rear of the supply. The FXP has its fan, handles, voltage adjust, and indicator lights on the front panel and a single hot-plug connector on the rear. Airflow is from the front through the rear. Alarm, monitoring, and control signals are floating from the main output and can be referenced to the positive or negative output or sense line of the power supply. The output is floating with respect to the chassis and may be used as a positive or negative polarity supply.

The FXP7000 Series meets international safety requirements and is CE Marked to the Low Voltage Directive. This series operates on three-phase European voltages as well as (up to) 480 VAC, delta or wye.

| Voltage Sag Immunity         | Per SEMI F47-0200 FXC/FXP7000  |        |     | Pending      |          |
| Leakage Current              | Per UL60950 and EN60950:<br>FXP7000 at 240 VAC, 60 Hz:<br>FXP7000 at 400 VAC, 50 Hz:<br>FXP7000 at 480 VAC, 60 Hz:                                 |        |     | 5<br>7<br>10 | mA       |

<sup>3</sup> All logic outputs listed below feature a standard active pull-down output with 0.4V max at 40mA sink capability, and a 100k pull-up to 5V.

<sup>4</sup> In addition to those listed below, signals and front-panel LEDs are provided to indicate: overtemperature / fan fault, AC phase imbalance, output good, interlock open, and supply inhibited. The FXP also provides 4 LED's indicating output loading.

<sup>5</sup> **Both signals must be pulled to logic ground for the unit to operate.**

Enables are 100% redundant internally for applications where redundant inhibit is desirable. Contact factory for additional design details.
