## MAP55 Series <br> AC-DC Power Supplies

Bel Power Solutions MAP55 Series of power supplies provides reliable, tightly regulated DC power for industrial systems. MAP55 series complies with EMC product standard EN 61204-3. All units bear the CE Mark.

The MAP55 utilizes a thermally efficient U-channel chassis design. Other mechanical design innovations include metric and SAE mounting inserts on each mounting surface to provide integration flexibility. Dual-mode connectors provide traditional terminal block connections or popular single row Molex connector mating.

Single-output models feature wide-range output adjustability to meet a wide variety of standard and user-specific output voltage requirements.
