## Low－Power，Two－Port，High－Speed，USB2．0（480Mbps） <br> DPDT Analog Switch BL1530

## Description

The BL1530 is a Low－Power，Two－Port，High－Speed，USB2．0（480Mbps）double－pole double－throw （DPDT）Analog Switch featuring an On－Resistance of 4.5 ohm at $\mathrm{VCC}=3 \mathrm{~V}$ and a Low On Capacitance 3．7pf Typical．

The BL1530 is compatible with the requirements of USB2．0 and the wide bandwidth needed to pass the third harmonic，resulting in signals with minimum edge and phase distortion．Superior channel－to channel crosstalk also minimizes interference．Break－before－make function for both parts eliminates signal disruption during switching from preventing both switches being enabled simultaneously．

The BL1530 contains special circuitry on the switch I／O pins for applications where the VCC supply is powered－off（ $\mathrm{VCC}=0$ ），which allows the device to withstand an over－voltage condition．This device is designed to minimize current consumption even when the control voltage applied to the Sel pin is lower than the supply voltage（VCC）．This feature is especially valuable to ultra－portable applications，such as cell phones，allowing for direct interface with the general purpose I／Os of the baseband processor．Other applications include switching and connector sharing in portable cell phones，PDAs，digital cameras， printers，and notebook computers．

## Pin Configuration

UTQFN1．8×1．4－10L

MSOP10L

## Features

－Wide Power Supply Range： 2.3 V to 5 V
－Low On Capacitance 3．7pf Typical
－Low On Resistance $4.5 \Omega$（typ）at 3 V VDD when $\mathrm{V}_{\text {SW }}=0.4 \mathrm{~V}$
－High Bandwidth（ -3 db ）：$>720 \mathrm{MHz}$ without $\mathrm{C}_{\mathrm{L}}$ and $>550 \mathrm{MHz}$ with $\mathrm{C}_{\mathrm{L}}=5 \mathrm{pF}$
－Low Power Consumption：1uA Maximum
－ESD：pass 8 kV HBM test
－Over voltage tolerance（OVT）on all USB ports up to 5.25 V without external components
－TTL／CMOS Compatible
－Break－Before－Make Switching
－Operation Temperature Range：$-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$
－UTQFN1．8×1．4－10L and MSOP10L Package

## Applications

Cell phone，PDAs，Digital camera，Notebook，LCD Monitor，TV，SET－TOP BOX

## Block Diagram

## Function Table

| $\mathbf{0}$ | $\mathbf{1}$ | Dp，Dn＝Dp2，Dn2 |

BL1530—DPDT USB2．0 Analog Switch

## Pin Description

| PIN num |  | Pin Name | Type | Description |
| :---: | :---: | :---: | :---: | :---: |
| UTQFN10L | MSOP10L |  |  |  |
| 1 | 2 | Dp1 | Input／Output | Data Port |
| 2 | 3 | Dp2 | Input／Output | Data Port |
| 3 | 4 | Dp | Input／Output | USB Data BUS |
| 4 | 5 | GND | Ground | Ground |
| 5 | 6 | Dn | Input／Output | USB Data BUS |
| 6 | 7 | Dn2 | Input／Output | Data Port |
| 7 | 8 | Dn1 | Input／Output | Data Port |
| 8 | 9 | OEb | Input | Switch enable |
| 9 | 10 | VCC | PWR | Power Supply |
| 10 | 1 | Sel | Input | Switch select |

## ABSOLUTE MAXIMUM RATINGS

| Parameter | Symbol | Min | Max | Units |
| :---: | :---: | :---: | :---: | :---: |
| DC Supply Voltage | VCC | -0.5 | 5.5 | V |
| DC Switch Voltage | $\mathrm{Dpn} / \mathrm{Dnn} / \mathrm{Dp} / \mathrm{Dn}$ | -0.5 | $\mathrm{VCC}+0.3$ | V |
| DC Input Voltage | $\mathrm{V}_{\mathrm{Oeb}} / \mathrm{V}_{\text {Sel }}$ | -0.5 | VCC | V |
| Continuous Current | $\mathrm{I}_{(\mathrm{Dpn} / \mathrm{Dnn} / \mathrm{Dp/Dn})}$ | -50 | +50 | mA |
| Peak Current ${ }^{(1)}$ | $\mathrm{I}_{\text {PEAKK（Dpn／Dnn／Dp／Dn）}}$ | -100 | +100 | mA |
| Operating Temperature Range | $\mathrm{T}_{\mathrm{A}}$ | -40 | 85 | ${ }^{\circ} \mathrm{C}$ |

## Notes：

（1）Pulsed at $1 \mathrm{~ms}, 50 \%$ duty circle
（2）Stress beyond above listed＂Absolute Maximum Ratings＂may lead permanent damage to the device． These are stress ratings only and operations of the device at these or any other conditions beyond those indicated in the operational sections of the specifications are not implied．Exposure to absolute maximum rating conditions for extended periods may affect device reliability．

## ORDERING INFORMATION

| MODEL | PIN- PACKAGE | SPECIFIED <br> TEMPERATURE <br> RANGE | PACKAGE <br> MARKING | ACKAGE OPTION |
| :---: | :---: | :---: | :---: | :---: |
| BL1530TQFN | UTQFN1.8 $\times 1.4-$ <br> 10 L | $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ | $\mathrm{IYW}^{(1)}$ | Tape and Reel, <br> 3000 |
| BL1530MSOP | MSOP10L | $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ | I1G <br> YWW | Tape and Reel, <br> 3000 |

WHERE(1):
"IYW" IS 3 DIGITS PRODUCTION ID COLOUR: LASER MARKING
"I" stands for the product BL1530.
" Y "stands for the product year, for example, " 1 " stands for the year 2011.
"W" stands for the product week, for example, "a" stands for the first week, "A" stands for the 27th week.

## Note：

（1）Typical characteristics are at $+25^{\circ} \mathrm{C}$
（2）Measured by the voltage drop between Dpn／Dnn and Dp／Dn pins at the indicated current through the switch．On resistance is determined by the lower of the voltage on the two（ $\mathrm{Dpn} / \mathrm{Dnn}$ and $\mathrm{Dp} / \mathrm{Dn}$ ports）．
（3）$\Delta \mathrm{R}_{\mathrm{ON}}=\mathrm{R}_{\mathrm{ON}(\mathrm{MAX})}-\mathrm{R}_{\mathrm{ON}(\mathrm{MIN})}$ ，between Dp and Dn ．

## APPLICATION NOTE

## Meeting USB 2．0 V ${ }_{\text {bus }}$ Short Requirements

（1）Power－Off Protection
For a $V_{\text {BUS }}$ short circuit the switch is expected to withstand such a condition for at least 24 hours．The BL1530 has the specially designed circuit which prevents unintended signal bleed through as well as guaranteed system reliability during a power－down，over－voltage condition．The protection has been added to the common pins（Dp，Dn）．

## （2）Power－On Protection

The USB 2.0 specification also notes that the USB device should be capable of withstanding a $V_{\text {BUS }}$ short during transmission of data．This modification works by limiting current flow back into the VCC rail during the over－voltage event so current remains within the safe operating range．
