

The Beta 951 T-handle wrench has been designed on high-resistance screws, it is the name for quick handling, accurate fit and flexible use. Ongoing production improvements have translated, for example, into sandblasted finishes and sharp-edged hexagon ends which allow a better fit onto any screws, including damaged ones. Laser marking results in a sturdier rod.

**Features:**

- Designed to develop high torque values
- Calibrated hexagon ends for perfect screw fit
- Hexagon bar can be stopped in required position throughout length; a safety catch prevents bar from coming out.
