

Programmable Triple Output DC Power Supplies9130C Series

The 9130C Series triple output linear programmable DC power supplies feature isolated outputs that can be adjusted independently or combined in series or parallel to output higher voltage or current. Additionally, these supplies can operate in tracking mode with user-configurable ratios between channels.

The front panel keys and rotary knob with convenient cursors let users quickly set voltage and current values. Up to 36 different instrument settings can be saved and recalled. The power-on state of the outputs can also be configured.

For remote control, the standard USB (USBTMC-compliant) and RS232 and interfaces supporting SCPI commands can be used to remotely control the power supplies via a PC. Alternatively, users can control the power supply, execute test sequences or log measurements using the provided PC software application.

These power supplies are suitable for a wide range of applications including production testing, telecommunications, R&D, electronic service, and labs.

Model	9130C	9131C	9132C
Voltage	0 to 30 V (ChI & Ch2) 0 to 5 V (Ch3)	0 to 30 V (ChI & Ch2) 0 to 5 V (Ch3)	0 to 60 V (ChI & Ch2) 0 to 5 V (Ch3)
Current	0 to 3 A (ChI, Ch2 & CH3)	0 to 6 A (ChI & Ch2) 0 to 3 A (Ch3)	0 to 3 A (ChI, Ch2 & Ch3)

Features and benefits

- Three independent and electrically isolated outputs
- Displays voltage and current settings for all three channels simultaneously
- Low noise, linear regulation
- High programming and readback resolution of
- Series and parallel modes combine channels to increase the output voltage or current
- Tracking mode allows users to set up channels to maintain a programmed ratio
- Fully programmable channels with Output On/Off control
- Store and recall up to 36 instrument settings
- Remote sense
- Timer-controlled output function adjustable from 0.1 99999.9 s
- Standard USB (USBTMC-compliant) and RS232 interfaces supporting SCPI commands for remote control
- NI certified LabVIEWTM driver and softpanel for remote control, test sequence generation, and datalogging available
- Overvoltage (OVP) and overtemperature (OTP) protection including keylock function
- Compact 19" half-rack form factor allows for side-by-side rack mounting of two units

Flexible operation

Combined series mode

÷	120.007	Series	5.0007
	3.000A	CH1+2	3.000A

ChI and Ch2 in Series mode

Channels I and 2 can be wired in series to increase the voltage. Selecting Series Combined Mode provides convenient metering of the channels connected in series.

Combined parallel mode

*	5.0007	Para	Para
	9.000A	ALL	ALL

All Channels in Parallel mode

Channels I and 2, 2 and 3, or All channels can be wired in parallel to increase the current. Selecting Parallel Combined Mode provides convenient metering of the channels connected in parallel.

Tracking mode

3	÷	Track		
		CH1+CH2	CH2+CH3	ALL

Tracking mode options

> 60.000V	20.000V	5.000٧
⊞3.000A	⊡1.000A	3.000A

ChI and Ch2 in Tracking mode

Tracking mode can be used to simplify adjustments across multiple channels by maintaining a user-defined ratio between outputs. Tracking mode can be set on channels I and 2, 2 and 3, or All channels.

Remote control and programming

Test system integration

These power supplies offer standard USB and RS232 interfaces to facilitate test system development and integration. The 9I30C Series supports SCPI-compliant protocols and come with LabVIEWTM drivers.

Appliction software

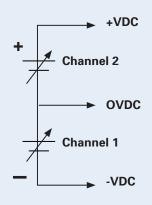

PC software is provided for front panel emulation, generating and executing test sequences or logging measurement data without the need to write source code.

- Log voltage, current, and power values of each channel as well as timestamp, CV/CC mode, and output status
- Create an unlimited number of external list files to be executed from PC memory. Save and recall list files to/from the PC.

Bipolar output configuration

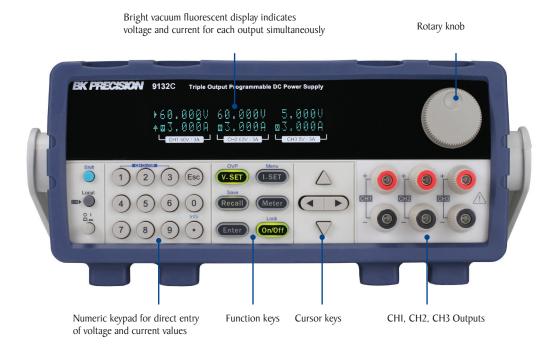

The independent and isolated outputs can be used to create positive and negative outputs between channels I and 2.

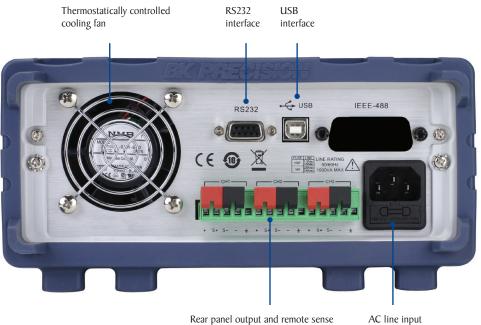

This feature is useful for powering bipolar circuits and devices.

Specifications

Note: All specifications apply to the unit after a temperature stabilization time of 15 minutes over an ambient temperature range of 23 $^{\circ}$ C \pm 5 $^{\circ}$ C.

About B&K Precision

For more than 70 years, B&K Precision has provided reliable and value-priced test and measurement instruments worldwide.

Our headquarters in Yorba Linda, California houses our administrative and executive functions as well as sales and marketing, design, service, and repair. Our European customers are most familiar with B&K through our French subsidiary, Sefram. Engineers in Asia know us through our B+K Precision Taiwan operation. The independent service center in Singapore services customers in Singapore, Malaysia, Vietnam, and Indonesia.

Service center location

Quality Management System

B&K Precision Corporation is an ISO9001 registered company employing traceable quality management practices for all processes including product development, service, and calibration.

ISO9001:2015

Certification body NSF-ISR Certificate number 6Z241-IS8
