Product Dimensions

Pulse Power Rating

The energy absorbed by the resistor expressed in Joules can be calculated by multiplying the peak power of the pulse in watts times the length of the pulse in seconds.

The energy should not exceed the limits shown in the graph. The overload voltage should not exceed 1.5 times the maximum operating voltage.

How to Order

PWR 247 T - 100 - 10R0 J

Model _____
PWR = Power Resistor
