

Power supply: **230V 50/60Hz**
 Potentiometer: **10kOhm +20%**

Controller designed to control the speed of ventilators equipped with electronically commutated motors (EC) or other devices controlled by 0-10VDC signal. Required power supply is 10-12VDC/1mA, which is available on most of EC drivers. The output is stepless 0-10VDC signal. Controller is equipped with additional contact max. 3A/230VAC or 3A/12VDC. Protection grade: IP54. Manufactured in compliance with: EN61000-6-2, EN61000-6-3.
