## Performance at Commonly Used Drive Currents

$V$ Series LED arrays are tested to the specifications shown using the nominal drive currents in Table 1. V Series LED Arrays may also be driven at other drive currents dependent on specific application design requirements. The performance at any drive current can be derived from the current vs. voltage characteristics shown in Figures $1 \& 2$ and the flux vs. current characteristics shown in Figures $3 \& 4$. The performance at commonly used drive currents is summarized in Table 3.

Bridgelux COB arrays have laser markings on the back side of the substrate to help with product identification. In addition to the product identification markings, Bridgelux COB arrays also contain markings for internal Bridgelux manufacturing use only. The image below shows which markings are for customer use and which ones are for Bridgelux internal use only. The Bridgelux internal manufacturing markings are subject to change without notice, however these will not impact the form, function or performance of the COB array.

## CAUTION: RISK OF BURN

Do not touch the $V$ Series LED array during operation. Allow the array to cool for a sufficient period of time before handling. The $V$ Series LED array may reach elevated temperatures such that could burn skin when touched.

## CAUTION

CONTACT WITH LIGHT EMITTING SURFACE (LES)
Avoid any contact with the LES. Do not touch the LES of the LED array or apply stress to the LES (yellow phosphor resin area). Contact may cause damage to the LED array.
Optics and reflectors must not be mounted in contact with the LES (yellow phosphor resin area).

[^1]:    Note for Figure 10:

    1. Color spectra measured at nominal current for $T_{j}=T_{C}=25^{\circ} \mathrm{C}$.
    2. Color spectra shown is 3000 K and 80 CRI .
    3. Color spectra shown is 4000 K and 80 CRI .
    4. Color spectra shown is 5000 K and 70 CRI .
    5. Color spectra shown is 6500 K and 70 CRI .
[^2]:    Notes for Figure 14:

    1. Each tube holds 30 V10 COB arrays.
    2. One tube is sealed in an anti-static bag. Four bags are placed in a shipping box. Depending on quantities ordered, a bigger shipping box, containing four boxes may be used to ship products.
    3. Each bag and box is to be labeled as shown above.
    4. Dimensions for each tube are $8.3(W) \times 15.4(H) \times 430(L)$. Dimensions for the anti-static bag are $75(\mathrm{~W}) \times 615(\mathrm{~L}) \times 3.1(\mathrm{~T}) \mathrm{mm}$. Dimensions for the shipping box are $58.7 \times 13.3 \times 7.9 \mathrm{~cm}$
