1W Mini Power LED Light Source

Data Sheet

BROADCOM®

Description

This 1 W Mini Power LED Light Source is a high performance energy-efficient device that can handle high thermal and high driving current. An option with an electrically isolated metal slug is also available.

The White Mini Power LED is available in the range of color temperature from 2700 K to 10000 K.

The low profile package design and ultra small footprint is suitable for a wide variety of applications especially where space and height is a constraint.

The package is compatible with reflow soldering process. To facilitate easy pick and place assembly, the LEDs are packed in EIA-compliant tape and reel.
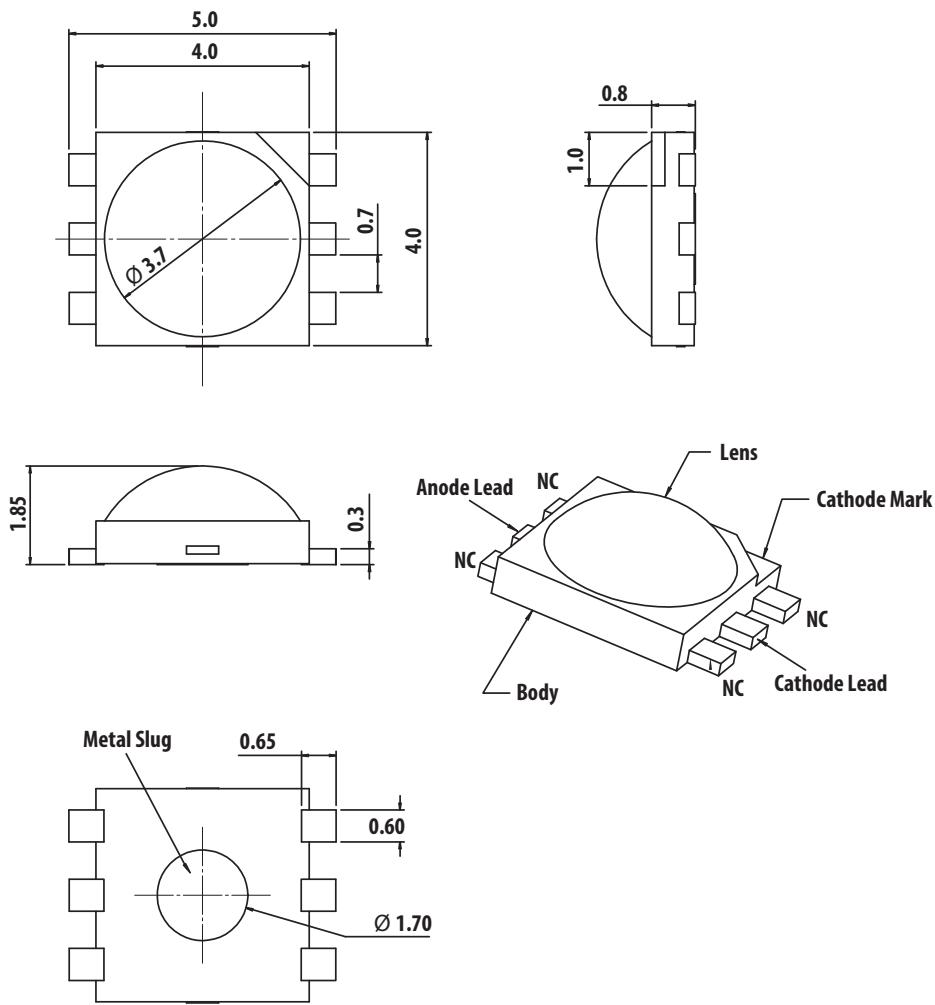

Features

- Available in red, amber, blue, royal blue, cyan, green, cool white, neutral white, and warm white colors
- Small footprint
- Energy efficient
- Direct heat transfer from metal slug to motherboard
- Compatible with reflow soldering process
- High current operation
- Long operation life
- Wide viewing angle
- Silicone encapsulation
- Non-ESD sensitive (threshold > 16 kV)
- MSL 1 products

Applications

- Architectural lighting
- Garden lighting
- Decorative lighting
- Sign backlight
- Safety, exit and emergency sign lightings
- Specialty lighting such as task lighting and reading lights
- Retail display
- Commercial lighting
- Accent or marker lightings, strip, or step lightings
- Portable lightings, bicycle head lamp, torch lights
- Pathway lighting
- Street lighting
- Tunnel lighting

CAUTION: The customer is advised to keep the LEDs in the MBB when not in use as prolonged exposure to environment might cause the silver plated leads to tarnish, which might cause difficulties in soldering.

NOTE

1. All dimensions in millimeters.
2. Metal slug is connected to anode for electrically non-isolated option.
3. Tolerance is ±0.1 mm unless otherwise specified.
4. Terminal finish: Ag plating.
5. Corresponding NC (No Connection) leads adjacent to anode and cathode leads can be electrically short.
