## Data Sheet

## Description

The 8 mm ( 0.31 inch) LED seven segment displays are Avago's most space-efficient character size. They are designed for viewing distances up to 3 metres (10 feet). The numeric devices feature a right hand decimal point. All devices are available as either common anode or common cathode.

Typical applications include appliances, temperature controllers, and digital panel meters.

## Features

- Compact package
- 8 mm ( 0.31 inch) character height
- Choice of colors:
- Wide range of colors
- Excellent appearance:
- Evenly lighted segments
- Mitered corners on segments
- Gray/black surface gives optimum contrast
- $\pm 50^{\circ}$ viewing angle
- Design flexibility:
- Common anode or common cathode
- Right hand decimal point
- Categorized for luminous intensity:
- Yellow and Green also categorized for color
- Use of like categories yields a uniform display
- High light output
- High peak current
- Excellent for long digit string multiplexing
- Intensity and color selection option

## Part Numbering System

Notes:

1. For codes not listed in the figure above, please refer to the respective data sheet or contact your nearest Avago representative for details.
2. Bin options refer to shippable bins for a part-number. Color and Intensity Bins are typically restricted to 1 bin per tube (exceptions may apply).

Please refer to respective data sheet for specific bin limit information.

Notes:

1. Case temperature of device immediately prior to the intensity measurement is $25^{\circ} \mathrm{C}$.
2. The digits are categorized for luminous intensity. The intensity category is designated by a letter on the side of the package.
3. The dominant wavelength, $\lambda_{\mathrm{d}}$, is derived from the CIE chromaticity diagram and is that single wavelength which defines the color of the device.
4. Typical specification for reference only. Do not exceed absolute maximum ratings.
5. The Yellow (HDSP-U3XX) series and Green (HDSP-U5XX) series displays are categorized for dominant wavelength. The category is designated by a number adjacent to the luminous intensity category letter.

Note:
All categories are established for classification of products. Products may not be available in all categories. Please contact your local Avago representatives for further clarification/information.

## Electrical/Optical

For more information on electrical/optical characteristics, please see Application Note 1005.

## Contrast Enhancement

For information on contrast enhancement, please see Application Note 1015.

## Soldering/Cleaning

Cleaning agents from the ketone family (acetone, methyl ethyl ketone, etc.) and from the chorinated hydrocarbon family (methylene chloride, trichloroethylene, carbon tetrachloride, etc.) are not recommended for cleaning LED parts. All of these various solvents attack or dissolve the encapsulating materials used to form the package of plastic LED parts.

For more information on soldering LEDs, please refer to Application Note 1027.
